- a/ All boundaries may be changed to include such other areas as may hereafter be authorized by a federal court for that tribe's treaty fishery.
- b/ Applicable lengths, in inches, for dressed, head-off salmon, are 18 inches for chinook and 12 inches for coho. There are no minimum size or retention limits for ceremonial and subsistence harvest.
- c/ The overall treaty troll ocean quotas are:  
 Option I: 60,000 chinook and 90,000 coho;  
 Option II: 40,000 chinook and 75,000 coho; and  
 Option III: 30,000 chinook and 60,000 coho.  
 The overall chinook quota is divided into 50% of the chinook quota for the May/June chinook-directed fishery and 50% of the chinook quota for the July through Sept. all-salmon season. If the chinook quota for the May/June fishery is not fully utilized, the excess fish cannot be transferred into the later all-salmon season. The quotas include troll catches by the S'Klallam and Makah tribes in Washington State Statistical Area 4B from May 1 thru Sept. 15. The Quileute Tribe will continue a ceremonial and subsistence fishery during the time frame of September 15 through October 15; fish taken during this fishery are to be counted against treaty troll quotas established for the 2004 season. **Note:** The fisheries in Option I will need to be restructured if negotiations in the North of Falcon forum or final preseason catch expectations for Canadian and Alaskan fisheries do not result in an SRFI at or below 0.70 as required by the NMFS ESA consultation standard.
- d/ The area within a 6 nautical mile radius of the mouths of the Queets River (47°31'42" N. lat.) and the Hoh River (47°45'12" N. lat.) will be closed to commercial fishing. A closure within 2 nautical miles of the mouth of the Quinault River (47°21'00" N. lat.) may be enacted by the Quinault Nation and/or the State of Washington and will not adversely affect the Secretary of Commerce's management regime.
