Drift gillnet vessels with multifilament gillnets (≥ 14 in. mesh) onboard, must carry enough pingers to meet the following configuration requirements:

- Pingers must be attached every 300 ft. and within 30 ft. of the FLOATLINE
- Pingers must be attached every 300 ft. and within 36 ft. of the LEADLINE
- Pingers on or near the floatline and on or near the leadline must be staggered such that the horizontal distance between them is 150 ft.
