NMFS Near-Term Priorities

As stated in November 2014 ([Agenda Item J.1.b, Supplemental NMFS Report 2](#)) and consistent with the groundfish workload priorities from March 2015 ([Agenda Item I.5.a, Attachment 3](#)), NMFS maintains attention to routine actions (e.g. groundfish, whiting, and halibut specifications & inseason actions) and several actions already at various stages of implementation (e.g., electronic monitoring, whiting clean-up, whiting season date change, ecosystem/Am 25, sablefish, and Essential Fish Habitat phase 3/regulations). In addition, NMFS has the following near-term priority:

- Salmon ESA Section 7 Consultation for Groundfish FMP.
