

HIGHLY MIGRATORY SPECIES ADVISORY SUBPANEL REPORT ON
FUTURE COUNCIL MEETING AGENDA AND WORKLOAD PLANNING

The Highly Migratory Species Advisory Subpanel (HMSAS) is requesting a webinar approximately one week preceding each of the Council meetings that the HMSAS will be attending for the following reasons:

- Most of the HMSAS members are extremely busy with work outside the Council and having a webinar prior to the Council meetings would give HMSAS members preliminary information that would expedite the actual advisory panel meetings.
- The webinar would inform the HMSAS members on the current legislative issues and enable the members to have input into the legislation that affects our fisheries. The Legislative Committee (LC) meets prior to the advisory panel meetings and this would be an opportunity to have real input into the LC's recommendations.
