

RECENT YEAR ALLOCATIONS RELEVANT TO DECIDING A RANGE OF
2017-2018 ALLOCATIONS

Item 1. Attachment 1. September 2015 Groundfish Management Team Scorecard: This is the most recent scorecard, under the 2015 regulations, updated with the latest West Coast Groundfish Observer Data (2013 bycatch rates), tribal impacts, exempted fishing permits impacts, and research impacts. Bocaccio, canary, cowcod, petrale sole, and yelloweye allocations are based on the Council's recommendations for two-year allocations while darkblotched, Pacific Ocean Perch, and widow values represent the Amendment 21 allocations.

Item 2. 2015-2016 Allocation Values and Percentages from Final Council Action in June 2014.

Item 3. 2013-2014 Allocation Values and Percentages from Final Council Action in June 2012.

Item 4. 2011-2012 Allocation Values and Percentages from Final Council Action in June 2010.

Item 1

Scorecard from the September 2015 Council meeting. Allocations ^{a/} and projected mortality (mt) of overfished species in 2015.

Fishery	Bocaccio b/		Canary		Cow cod b/		Dkbl		Petrale		POP		Yellow eye

			= Fixed Values											
			= off the top deductions											

a/ Formal allocations are represented in the black shaded cells and are specified in regulation in Tables 1b and 1e. The other values in the allocation columns are 1) off the top deductions, 2) set asides from the trawl allocation (at-sea petrale only)

3) ad-hoc allocations recommended in the 2013-14 EIS process, 4) HG for the recreational fisheries for canary and YE.

b/ South of 40°10' N. lat.

c/ EFPs are amounts deducted from the ACL to accommodate anticipated applications. Values in this table represent the estimates from the 15-16 biennial cycle, which are currently specified in regulation.

d/ Includes NMFS trawl shelf-slope surveys, the IPHC halibut survey, and expected impacts from SRPs and LOAs.

e/ The GMT's best estimate of impacts as analyzed in the 2015-2016 Environmental Impact Statement (Appendix B), which are currently specified in regulation.

f/ Tribal values in the allocation column represent the values in regulation. Projected impacts are the tribes best estimate of catch.

g/ the cowcod harvest specification is a 4.0 mt Annual Catch Target (ACT). The off the top deductions are subtracted from the 10 mt ACL

ITEM 2

2015-2016 Allocation Values and Percentages from Final Council Action in June 2014.

2015

	Bocaccio		Canary		Cowcod		Yelloweye	
	% of HG	MT	% of HG	MT	% of HG	MT	% of HG	MT
