

HISTORICAL CATCH SHARING PLAN ALLOCATIONS AND CATCH

Table 1. Pacific halibut allocations from the Area 2A Catch Sharing Plan from 2004-2015, excerpted from the **Environmental assessment and regulatory impact review for continuing implementation of the Catch Sharing Plan for Pacific Halibut in Area 2A, 2014-2016** (Table 3.3) and provided by National Marine Fisheries Service (2015). Data are in net weight, pounds.

a/ Net weight is defined in IPHC regulations as the weight of halibut that is without gills and entrails, head-off, washed, and without ice and slime. If a halibut is weighed with the head on or with ice and slime, the required conversion factors for calculating net weight are a 2 percent deduction for ice and slime and a 10 percent deduction for the head.

b/ 2015 values are considered preliminary until published by the IPHC in the Annual Report in the fall.
