

GROUND FISH ADVISORY SUBPANEL REPORT ON THE
2017-2018 HARVEST SPECIFICATIONS AND MANAGEMENT MEASURES
RULEMAKING UPDATE AND CLARIFICATIONS

The Groundfish Advisory Subpanel (GAP) reviewed the [Situation Summary](#) and [supplemental Groundfish Management Team \(GMT\) statement](#) and we agree with the GMT for managing blackgill rockfish and yellowtail trip limits and we also are comfortable with no buffer on canary rockfish in 2018.
