

ENFORCEMENT CONSULTANTS REPORT ON PRELIMINARY APPROVAL OF  
EXEMPTED FISHING PERMITS FOR 2015 FISHERIES

The Enforcement Consultants (EC) reviewed Agenda Item G.3.a, Attachment 4, the Preliminary Exempted Fishing Permit (EFP) Application for Alternative Swordfish Target Fishing Gears and Methods by Alliance of Communities for Sustainable Fisheries. The EC would like to receive further details on the Preliminary Associate Applicants to ensure that the applicants have the demonstrated expertise and experience needed to participate in this EFP. These additional details should include information such as vessel names and associated permits, size of the vessel pool that will be participating, and fishermen's names and associated licenses. In addition, the EC would like the participating vessels to be equipped with an operational vessel monitoring system when participating under this EFP.
