

## IDENTIFICATION OF MANAGEMENT OBJECTIVES AND PRELIMINARY DEFINITION OF 2010 SALMON MANAGEMENT OPTIONS

Using the Salmon Advisory Subpanel (SAS) management recommendations as a base, the Council should identify the range of management elements in the options for public review (harvest ranges, special restrictions, and basic season structure). The Salmon Technical Team (STT) will attempt to collate the Council's identified management elements into coordinated coastwide options. The collated options will be returned to the Council for review and any further direction on Tuesday, March 9, 2010 followed by STT analysis and final adoption of the options on Thursday, March 11, 2010. Agenda Item G.4.a, Attachment 1 provides guidance for developing and assessing the options.

Any option considered for adoption that deviates from Salmon Fishery Management Plan (FMP) objectives will require implementation by emergency rule. If an emergency rule appears to be necessary, the Council must clearly identify and justify the need for such an action consistent with emergency criteria established by the Council (Agenda Item G.4.a, Attachment 2) and National Marine Fisheries Service (Agenda Item G.4.a, Attachment 3).

Before defining the options, the Council should be briefed on any pertinent management constraints resulting from: actions by the Pacific Salmon Commission (PSC), action by the California Fish and Game Commission to set the allocation of Klamath River fall Chinook or Sacramento River fall Chinook for the inside recreational fisheries, and National Marine Fisheries Service constraints for stocks listed under the Endangered Species Act.

The Council may also want to consider recommendations for inseason action to modify fisheries scheduled to open prior to May 1, 2010, as impacts accrued in these fisheries may be subject to provisions in the FMP regarding Overfishing Criteria and they will affect opportunity in summer fisheries. Currently, the Oregon commercial fishery from Cape Falcon to the OR/CA border and the Oregon recreational fishery from Cape Falcon to Humbug Mt. are scheduled to open March 15, 2010, and the California recreational fishery from Horse Mt. to the U.S./Mexico border is scheduled to open April 3, 2010.

### **Council Task:**

- 1. Using the SAS proposals and other agency and public input, define basic management elements and alternatives for STT collation into coastwide management options.**
- 2. Consider the need for inseason action to address fisheries opening prior to May 1, 2010.**
