

Table 1. Final preferred 2013 and 2014 overfishing limits (OFLs in mt) and acceptable biological catches (ABCs in mt) and preliminary preferred 2013 and 2014 annual catch limits (ACLs in mt) for non-overfished west coast groundfish stocks and stock complexes (stocks with new assessments in bold; PPA = preliminary preferred alternative). (PFMC, 11/10/2011 2:54:53 PM)

Stock	2013 OFL	2014 OFL	2013 ABC	2014 ABC	PPA ACLs		2013-14 ACL Range for Analysis		
					2013	2014	Alt 1	Alt 2	Alt 3
NON-OVERFISHED STOCKS									
Arrowtooth Flounder	7,391	6,912	6,157	5,758	6,157	5,758

Starry Flounder	1,825	1,834	1,520	1,528	1,520	1,528			
WIDOW	4,841	4,435	4,598	4,212	1,500	1,500	600	1,500	2,500
Yellowtail N. of 40°10'	4,579	4,584	4,378	4,382	4,378	4,382			
STOCK COMPLEXES									
Minor Nearshore Rockfish North	110	110	94	94	94	94			

Stock	2013 OFL	2014 OFL	2013 ABC	2014 ABC	PPA ACLs		2013-14 ACL Range for Analysis		
					2013	2014	Alt 1	Alt 2	Alt 3
Minor Shelf Rockfish North	2,183	2,195	1,920	1,932	968	968			
Minor Slope Rockfish North	1,518	1,553	1,381	1,414	1,160	1,160			
Minor Nearshore Rockfish South	1,164	1,160	1,005	1,001	990	990			
Minor Shelf Rockfish South	1,910	1,913	1,617	1,620	714	714			
Minor Slope Rockfish South	681	685	618	622	618	622			
Other Flatfish	10,060	10,060	6,982	6,982	4,884	4,884			
Other Fish a/	3,328	3,298	2,286	2,265	2,286	2,265			

a/ Values for these specifications are the sum of known contributions of component stocks. Fully specified OFLs and ABCs would require the addition of new species to the complex (e.g., non-FMP skates and grenadiers) since many of these species are landed in generic market categories (e.g., unspecified skates).
