Beginning in 1985, the following closure has been in effect for Quinalt, Quilleute and Hoh fisheries: the area within a 6-mile radius of the mouths of the Hoh, Queets and Quillayute rivers is closed. h/ Sharing of impacts on ESA listed Puget Sound chinook also affected the shaping of ocean and inside fisheries.

i/ For 2002, the Council elected to constrain fishing so that the OCN exploitation rate would not exceed 12.5% per ODFW's recommendation to provide additional protection for lower Columbia River natural coho, which are listed as endangered under the Oregon State-ESA. The FMP objective for OCN coho was 15%.

**GENERAL MANAGEMENT ACTIONS AND INSEASON CONFERENCES**

Mar. 11	National Marine Fisheries Service (NMFS) provides the Council with a letter outlining the 2002 management guidance for stocks listed under the Endangered Species Act (ESA).
Mar. 12	NMFS inseason conference number one (at the Council meeting) results in a Council recommendation to open the commercial fishery off Oregon from Cape Falcon to the Oregon/California border on March 20 for all salmon except coho, and the recreational fishery from Cape Falcon to Humbug Mt. on April 1 for all salmon except coho. There were no requests for test fisheries opening prior to May 1.
Mar. 14	Council adopts three troll and three recreational ocean salmon fishery management options for public review.
Mar. 20-21	North of Cape Falcon Salmon Forum meets in Portland, Oregon to initiate consideration of recommendations for treaty Indian and non-Indian salmon management options.
Apr. 1-2	Council holds public hearings on proposed 2002 management options in three locations within the three West Coast states. The states of Oregon and California hold additional hearings in Tillamook, Oregon and Moss Landing, California, respectively.
Apr. 2-3	North of Cape Falcon Salmon Forum meets in Seattle, Washington to further consider recommendations for treaty Indian and non-Indian salmon management options.
Apr. 11	Council adopts final ocean salmon fishery management recommendations for approval and implementation by the U.S. Secretary of Commerce. The proposed measures include selective fisheries and comply with the salmon fishery management plan (FMP) and the current biological opinions for listed species. An emergency rule is not required for implementation.
May 7	Ocean salmon seasons implemented as recommended by the Council and published in the <i>Federal Register</i> on May 7 (67 FR 36016).
June 5	NMFS inseason conference number two results in closure of the U.S./Canada border to Cape Falcon non-Indian commercial troll fishery effective midnight, June 7, 2002, as the 50,000-chinook quota was projected to be taken.
June 26	NMFS inseason conference number three results in an initial opening period of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon from July 1-8 with a 250-fish landing limit per vessel for the eight-day period.
July 11	NMFS inseason conference number four results in a second opening period of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon from July 12-22 with a 400-fish landing limit per vessel for the 11-day period; requirements to land fish within 24 hours of the closure; and a requirement to notify Oregon Department of Fish and Wildlife for vessels landing fish south of Cape Falcon.
July 18	NMFS inseason conference number five results a minimum size limit of 28 inches for chinook in the Westport, La Push, and Neah Bay ocean recreational salmon fishery effective July 21 and a minimum size limit of 26 inches in the Columbia River ocean recreational salmon fishery, to slow the chinook catch rate. The respective chinook guidelines for the four areas north of Cape Falcon were combined into one quota for the entire area and recalculated to account for hook-and-release mortality of fish less than the new minimum sizes. The new quota is 42,769 (47,500 preseason plus 569 rollover from May/June fishery minus 5,300 hook-and-release mortality).
July 23	NMFS inseason conference number six results in closure of the Horse Mt. to Point Arena non-Indian commercial salmon fishery effective July 23, 2002, as the 10,000-chinook quota was projected to be taken.
July 25	NMFS inseason conference number seven results in an update of the Cape Falcon to Humbug Mt. selective recreational coho fishery, but no action was taken as the quota was not projected to be taken until the following week.

**GENERAL MANAGEMENT ACTIONS AND INSEASON CONFERENCES, (continued)**

July 25	NMFS inseason conference number eight results in a third opening period of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon from July 26 to August 5 with a 500-fish landing limit per vessel for the 11-day period.
July 26	NMFS inseason conference number nine results in closure of the Humbug Mt. to Oregon/California border non-Indian commercial salmon fishery effective July 26, 2002 as the 1,500-chinook quota was projected to be taken.
July 29	NMFS inseason conference number ten results in closure of the Cape Falcon to Humbug Mt. selective recreational coho fishery effective August 1, 2002 as the quota of 22,500 adipose fin clipped coho was projected to be taken.
Aug. 2	NMFS inseason conference number 11 results in a fourth opening period of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon from August 9-18 with a 400-fish landing limit per vessel for the ten-day period, and rescinding the restriction of a maximum of four spreads per line in the Cape Falcon to Leadbetter Point area to allow better access to coho.
Aug. 14	NMFS inseason conference number 12 results in prohibiting chinook retention in the Columbia River, La Push, and Neah Bay recreational ocean fisheries effective August 8, 2002; changing the bag limit in the Westport recreational ocean salmon fishery to two salmon, no more than one of which may be a chinook, effective August 11-15; and closing the Westport fishery on Friday and Saturday, August 16-17 pending an update. The overall chinook quota for the north of Cape Falcon recreational ocean salmon fishery was reduced by 1,800 chinook to 40,969 to account for hook-and-release mortality associated with the coho-only regulation for the Columbia River, La Push, and Neah Bay areas.
Aug. 15	NMFS inseason conference number 13 results in allowing two additional days in the Westport recreational ocean salmon fishery, August 18-19, with closure of the fishery effective midnight August 19, 2002.
Aug. 21	NMFS inseason conference number 14 results in a fifth opening period of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon from August 22-28 with a 250-fish landing limit per vessel for the seven-day period.
Aug. 29	NMFS inseason conference number 15 results in closure of the Columbia River recreational fishery effective midnight September 2, and provided a contingency to transfer 5,000 coho from the Westport recreational area quota to the Columbia River recreational area if necessary to continue the Columbia River area recreational fishery through September 2. This contingency was not exercised.
Aug. 30	NMFS inseason conference number 16 results in an update of the non-Indian commercial troll salmon season from the U.S./Canada border to Cape Falcon, and a determination the fishery remain closed for the season.
Sept. 4	NMFS inseason conference number 17 results in transfer of the remaining coho from Neah Bay (3,433), and La Push (1,130) quotas, and up to 9,000 from the Westport quota to the Columbia River area recreational fishery, and reopening of the Columbia River fishery September 6-15 for selective retention adipose fin clipped coho only.
Sept. 9	NMFS inseason conference number 18 results in closure of the Humbug Mt. to Oregon/California border non-Indian commercial salmon fishery effective September 9, 2002 as the 2,000-chinook quota was projected to be taken.
Sept. 19	NMFS inseason conference number 19 results in closure of the Oregon/California border to Humboldt south jetty non-Indian commercial salmon fishery effective September 20, 2002 as the 10,000-chinook quota was projected to be taken.
