

The KFMC passed the following motion on March 8, 2000.

**Motion: to modify Option 1 of the recreational management options proposed by the SAS for ocean salmon 2000 fisheries for the KMZ sport fishery as follows: a 2 fish daily bag limit on all salmon except coho, with a 20% effort buffer, that would assure maintaining a 17% share of the ocean allocation for the KMZ sport fishery, 50/50 tribal/non-tribal sharing, and a 35,000 natural spawner floor.**
