

SCIENTIFIC AND STATISTICAL COMMITTEE REPORT ON  
COWCOD REBUILDING PLAN DEVELOPMENT

The Scientific and Statistical Committee (SSC) reviewed a draft cowcod rebuilding analysis prepared by Dr. John Butler of the National Marine Fisheries Service and Mr. Tom Barnes of the California Department of Fish and Game. The SSC provided advice to the authors regarding changes to the analysis that we would like to see in September. The current draft analysis indicates rebuilding will take many decades, even with very small catches.
