

Overview of approximate sablefish poundages available to various sectors under alternative discard accounting approaches.

	2001a		2001b		2001c		2001d		Sector discard mortality assumed
	mts		mts		mts		mts		
discard accounting	10% off the top		current method using EDCP (17.7%)		individual sector accounting using EDCP		individual sector accounting using EDCP		
LE allocation between trawl / fixed-gear	58% / 42% landed catch		58% / 42% landed catch		58% / 42% total catch		61% / 39% total catch (58% / 42% landed catch)		
Harvest Guideline (mt)	6,895		6,895		6,895		6,895		
Discard	690		1,220						
Tribal	621		567		621	9%	621	9%	10%
Open access	525		480		525	9%	525	9%	10%
Limited entry Trawl	2,935		2,684		2,315	-14%	2,435	-9%	29%
Limited entry fixed-gear	2,125		1,943		2,220	14%	2,061	6%	6%

Difference between landed catch and total catch allocations, based on the discard assumptions made during the late-1980s

	Landed catch		Total catch	
	mts	distribution	mts	distribution
Trawl	58	58%	68.2	61%
Fixed-gear	42	42%	42.9	39%
Total	100	100%	111.1	100%
