

SALMON ADVISORY SUBPANEL COMMENTS ON
REVIEW OF 2000 FISHERIES AND SUMMARY OF 2001 STOCK ABUNDANCE ESTIMATES

The Salmon Advisory Subpanel (SAS) commends the Salmon Technical Team for its excellent job of compiling previous season catch statistics and preseason run size predictions.

We would like to see a section in Preseason I that summarizes the current year's stocks of concern. This section would include Table 1-3, a table showing Endangered Species Act listed stocks, and a brief narrative describing which stocks will affect which geographical areas.
