**C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS**

- C.1. Compliance with Minimum Size or Other Special Restrictions: All salmon on board a vessel must meet the minimum size or other special requirements for the area being fished and the area in which they are landed if that area is open. Salmon may be landed in an area that is closed only if they meet the minimum size or other special requirements for the area in which they were caught.
- C.2. Gear Restrictions:

TABLE 1. **Non-Indian commercial troll** management measures proposed by the SAS for ocean salmon fisheries, 2001.  
(Page 3 of 4)

---

- a. Single point, single shank barbless hooks are required in all fisheries.
  - b. *Off Oregon South of Cape Falcon*: No more than 4 spreads are allowed per line.  
*Spread defined*: A single leader connected to an individual lure or bait.
  - c. *Off California*: No more than 6 lines are allowed per vessel and barbless **circle** hooks are required when fishing with bait by any means other than trolling.  
*Circle hook defined*: A hook with a generally circular shape and a point which turns inward, pointing directly to the shank at a 90° angle;  
*Trolling defined*: Fishing from a boat or floating device that is making way by means of a source of power, other than drifting by means of the prevailing water current or weather conditions.
- C.3. Transit Through Closed Areas with Salmon on Board: It is unlawful for a vessel to have troll gear in the water while transiting any area closed to salmon fishing while possessing salmon, however, fishing for species other than salmon is not prohibited if the area is open for such species and no salmon are in possession.
- C.4. Control Zone Definitions:
- a. *Cape Flattery Control Zone (Figure 1)* - The area from Cape Flattery (48°23'00" N lat.) to the northern boundary of the U.S. EEZ; and the area from Cape Flattery south to Cape Alava. 48°10'00" N lat. and west of 125° 05'00" W long.
  - b. *Columbia Control Zone* - An area at the Columbia River mouth, bounded on the west by a line running northeast/southwest between the red lighted Buoy #4 (46° 13'35" N. Lat., 124° 06'50" W. long.) and the green lighted Buoy #7 (46° 15'09" N. lat., 124° 06'16" W. long.); on the east, by the Buoy #10 line which bears north/south at 357° true from the south jetty at 46° 14'00" N. lat., 124° 03'07" West. long. to its intersection with the north jetty; on the north, by a line running northeast/southwest between the green lighted Buoy #7 to the tip of the north jetty (46° 14'48" N. lat., 124° 05'20" W. long.) and then along the north jetty to the point of intersection with the Buoy #10 line; and, on the south, by a line running northeast/southwest between the red lighted Buoy #4 and tip of the south jetty (46° 14'03" N. lat., 124° 04'05" W. long.), and then along the south jetty to the point of intersection with the Buoy #10 line.
  - c. *Klamath Control Zone* - The ocean area at the Klamath River mouth bounded on the north by 41° 38'48" N. lat. (approximately 6 nautical miles north of the Klamath River mouth); on the west, by 124° 23'00" W. long. (approximately 12 nautical miles off shore); and, on the south, by 41° 26'48" N. lat. (approximately 6 nautical miles south of the Klamath River mouth).
- C.5. Notification When Unsafe Conditions Prevent Compliance with Regulations: If prevented by unsafe weather conditions or mechanical problems from meeting special management area landing restrictions, vessels must notify the U.S. Coast Guard and receive acknowledgment of such notification prior to leaving the area. This notification shall include the name of the vessel, port where delivery will be made, approximate amount of salmon (by species) on board and the estimated time of arrival. This stipulation will be implemented by state regulations for California, Oregon and Washington, as required.

**C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS (Continued)**

C.6. **Incidental Halibut Harvest:** During authorized periods, the operator of a vessel that has been issued an incidental halibut harvest license may retain Pacific halibut caught incidentally in Area 2A while trolling for salmon. License applications for incidental harvest must be obtained from the International Pacific Halibut Commission (phone 206/634-1838). Applicants must apply prior to April 1 of each year. Incidental harvest is authorized only during **May and June** troll seasons and after June 30 if quota remains and if announced on the NMFS hotline (phone 800-662-9825). ODFW and WDFW will monitor landings. If the landings are projected to exceed the 34,046 pound preseason allocation or the total Area 2A non-Indian commercial halibut allocation, NMFS will take inseason action to close the incidental halibut fishery.

**Option 1:** License holders may land no more than 1 halibut per each 3 chinook, except 1 halibut may be landed without meeting the ratio requirement, and no more than 35 halibut may be landed per trip. Halibut retained must be no less than 32 inches in total length (with head on).

**Option 2:** License holders may land no more than 1 halibut per each 2 chinook, except 2 halibut may be landed without meeting the ratio requirement, and no more than 50 halibut may be landed per trip. Halibut retained must be no less than 32 inches in total length (with head on).

C.7. **Inseason Management:** In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance is provided to NMFS:

a. In the overall non-Indian commercial chinook quota north of Cape Falcon, any chinook remaining in the May/June harvest guideline may be transferred to the July/August harvest guidelines at a rate to be determined prior to April 6.

b. At the March 2002 meeting, the Council will consider inseason recommendations to: (1) open commercial seasons for all salmon except coho prior to May 1 in areas off Oregon and California south of Point Sur, and (2) identify the areas, season, quota, and special regulations for any experimental April fisheries (proposals must meet Council protocol and be received in November 2001).

C.8. Consistent with Council management objectives, the State of Oregon may establish additional late-season, chinook-only fisheries in state waters. Check state regulations for details.

C.9. For the purposes of CDFG Code, Section 8232.5, the definition of the KMZ for the ocean salmon season shall be that area from Humbug Mt., Oregon to Horse Mt., California.
