

Fishery

To The Chair of The Pacific Management Council
Dr. Hans Radtke,

I am Sarah Josephine Martin, a new Oregon resident, Jan 4, 2002.

Formerly, I was a resident of Graylake, Illinois; and I am a conservationist.

My credentials are these: John Stanton Martin, now deceased, was the owner and operator of Martin Landscape and Tree Company of Graylake, Ill.

I accompanied my father, for over 20 years, and I work in my fathers business for over five years.

Mr. John Stanton, had the highest honors from the President of the United States for conservation of land and water.

He was involved in The National and International Shade Tree Conventions.

He was noted as saving the Elms in Evanston from the Dutch Elm Disease, utilizing a specific chemical to kill the the larvae and the Beetle - thru systematic injection in the trees root system.

He was honored in Cook County, Lake County and Graylake, and Illinois State for his Conservation of trees, water, and space.

He continued to Educated himself, until the year of his death at The University of Ill. and shared his knowledge with

The Farm Bureau Extension of
The U.S. Department of Agriculture

I used my father's credentials,
as my own, having worked in
management with him, and being
his daughter listening & watching
his conservationist actions, and
the changing of some of his
original conservation ideas -
which he shared with me as
his daughter.

He managed hundreds of
acres in best possible conservative fashion
and I help & witnessed this work,
also reading his findings and studying
the materials he read.

While father live, a flag flew on
Draylake, which he landscaped for,
to his honor, Draylake was recognized
as Tree City of the United States. Trees
survive a Great Lakes Naval Base -
because of his tree surgery and
rodding and felling properly.

On these ~~so~~ credentials I stand,
as a knowledgeable Conservationist.

^{Draft}
Subject: The Fishery Management
my comments are listed after
reading the 50 page report of the Agenda
Community Fisheries Crisis Meeting,
Hatfield Marine Science Center Auditorium,
conducted 3-5, August 5, 2002, Newport, Or.

Comments as follows

(1) No further altering of the Pacific Coast line should be allowed.

Reason: By altering the Natural Coastline one changes the natural habitat of the common fish life present.

(2) No Damming or Blockage of ^{natural} Salmon Runs should occur in Oregon; such as the Blockage By the Area known as Salmon Run, by HUD Housing off 70th Street, - or any other Coastal State

Reason: stops SALMON FROM reaching their ^{natural} reproductive sites

(3) No Further Oil Refineries should be allowed, OFF the PACIFIC COAST.

Reason: Preservation of the Fish Life; Refineries leak oil - change water temperature. Noise of Refineries - CAN damage or Kill or demish Fish species in deep or shallow water. MANY species of Fish ARE affected negatively by sound vibrations; AS ARE human beings.

4. Every Effort possible to stop pollution by Sanitary Waste leaking into the Pacific Coast should be of primary concern to local, county, ^{STATE AND FED. OFFIC}

Reason: extinction of Fish species; illness, death or infection to human beings

5. No Further Nuclear Plant on the Pacific Coast Line, or near Lake waters, or in the nation.

Reason: pollutes water - raises water temperature; causes extinction to certain species - Both in shallow & deeper depths.

6. ALL EFFORTS ON the LOCAL, county, state, ~~Fed~~ level should try to avert disastrous damage of dumping dangerous materials into LAKES OR OCEAN such; AS OCCURRED IN LAKE MICHIGAN BY THE JOHNSON MOTORS ^(SON) MANFIEDS) CATASTROPHIC dumping of INDUSTRIAL WASTE - MAKING THE FISH NON-EATABLE IN Waukegan, IL. AREA ~~IL~~ + Further areas of Lake.
 REASON: CONTAMINATED FISH - AND ENDANGERED HUMAN LIVES.

7. As previously stated - there should be NO CHANGING OF THE PACIFIC COAST LINE - TO STRESS FURTHER + STOP ANY SUCH PASSAGE OF THE PACIFIC INTO INTERNAL LAKE - AS WAS CREATED BY OPENING THE GREAT LAKES BY ~~ERIE CANAL~~ CANAL.
 REASON: opening caused mingling of species such as the destructive entrance of the OCEANS LAMPRE ^{SP} ELE which poisons or kills fish it attaches to; ALSO HARMING HUMAN BEINGS EATING SUCH FISH.

8. The experienced, HUMANITARIAN, FISHERMAN'S OR CAPTAINS KNOWLEDGE ^{OF THE} INDIGENOUS AREA, OR PARTICULAR STATE - THAT THEY LIVE IN; MUST BE COUPLED TO THE SCIENTIST - ON A ONE TO ONE BASIS - TO REACH ANY EXPERIMENTAL NUMBERING TO PROPERLY ACCESS THE DWINDLING OF A PARTICULAR SPECIES OR THE OVER ABUNDANCE OF A SPECIES.

FURTHER, THE INTERNAL KNOWLEDGE OF A HUMANITARIAN CAPTAIN OR FISHERMAN SHOULD BE AS HIGHLY RECOMPENSED AS EACH SCIENTIST INVOLVED.
 REASON: COMMON SENSE AND CORRECT PRIORITIES,
 → COMMENTS ON

9. EXPERIMENTAL GEAR - SIMILAR TO ABOVE - THE KNOWLEDGE GAINED THRU YEARS OF FISHING THE PACIFIC AREA OR CAPTAINING THE AREAS - THIS KNOWLEDGE SHOULD BE ASSIMILATED INTO THE GEAR THE SCIENTIST WOULD USE FOR NUMBERING OR STUDYING ^{ANY} SPECIES - AND DEPTHS ^{AND SHALLOWS} - RECOMPENSED AS HIGH AS THE EVIDENCE ^{NECESSARY} FOR THE EXPERIMENTAL GEAR.

AUG 15 '02 04:49PM PORT LAZAROUCK
 04:49PM PORT LAZAROUCK
 04:49PM PORT LAZAROUCK

9. Reason: Common Sense + correct priorities

10. All boats or ships from Foreign Harbor Area Risk to Pacific Fishing industry and Interior Lakes

Reason: Being the residual plants or different sea creatures that cling to the bottom or exterior of ~~the~~ the ship or boat.

Example: An Asiatic weed from a boat enter the waters of Grays Lake, IL. (A spring feed lake) and had devastating effect on the lake. Swimmers were unable to swim in the red ~~red~~ ~~weed~~ ~~weed~~.

Weed cutter helped; ~~some~~ pulling weed up from roots - however community voted to spray with chemicals and killed a large majority of fish indigenous to the lake.

From my father's education - I vetoed the chemicals.

However: the community sprayed - animal that drank water died - my feet were burned weeks later by residue of spray that landed on rocks by the water - but the chemicals were so strong - they burnt through cotton canvas + burned my skin.

11. From my father's last statements to me - he truly believed chemicals are a last resort.

12. Further comments on the Pacific Coast problems: Foreign plants should not be brought to Pacific coast or planted. Reason: changes whole ecology - ex. Florida Everglades

13. Foreign species should not be introduced into the waters deliberately: Reason - death to ^{native} species. ex. Lamprey et.

15. Comment for Pacific Coast: Solar Energy

is truly understood and so is Hydro water power, and solar energy combined with hydrolic power is truly understood and should be used on the Pacific Coast.

Reason: Clean Agents - creating Industrial Power - so Canning industry

15. CONTINUED - could be located in OREGON COASTAL AREAS - AND OTHER PACIFIC LOCATIONS THAT WOULD NOT ENDANGER HUMAN LIFE; FISH LIFE; OR PLANT LIFE.

16. SOLAR - HYDRO POWER IS UNDERSTOOD SCIENTIFICALLY ^{TO SCIENTIST} - AND ALSO BY LAY PEOPLE - AND I BELIEVE SHOULD BE USED FOR MORE CANNERIES - IN OREGON AND THE PACIFIC COAST.

REASON: CREATE MORE JOBS - A HEALTHIER ATMOSPHERE CLEANER WATER - CLEANER AIR - HEALTHIER FISH & HUMAN BEING. OFTEN LOBBIST FOR GAS CO. OIL CO. ELECTRIC CO. HINDER THE USE + PRODUCTION OF SOLAR - HYDRO POWER INDUSTRY. REASON: MORE FINANCIAL GAIN FOR GAS CO. ELECTRIC CO - OIL CO.

17. I WISH THE LEGISLATION FOR PACIFIC COAST WOULD ORIGINATE IN THE PACIFIC COASTAL AREA - RATHER THAN BILLS ORIGINATING IN THE INTERIOR STATES.

18. LASTLY, I AM A CONSERVATIONIST, MY NEPHEW, WILLIAM TAYLOR WINN IS A FISHERMAN AND CAPTAIN FAMILIAR WITH THE PACIFIC COAST - AND ESPECIALLY A SPECIALIST ON OREGON WATERS AND MY SECOND NEPHEW TODY JOSEPH WINN, TOP GRADUATE FROM THE UNIVERSITY OF OREGON, 2002, IS ~~quite~~ AND A PREVIOUS RESIDENT OF NEWPORT, HAS KNOWLEDGE AS A SOLAR ENERGIST; AND I BELIEVE THAT BOTH THESE INDIVIDUALS COULD AID GREATLY ^{in solving} THE PACIFIC FISHERY CRISIS - AND SHOULD BE ~~RECOMMENDED~~ ^{RECOMMENDED} FOR THEIR KNOWLEDGE. MY 3RD NEPHEW, AARON TAYLOR WINN IS QUITE PROFICIENT IN COMPUTERS, A NEW RESIDENT ^{in OR, previously a} RESIDENT OF CAN. - I WOULD VOLUNTEER MY TIME, WHEN I AM WANTED.

In a Final Tribute to my Father, John Stanton Martin, LANDSCAPER, FORESTER, CONSERVATIONIST, TREE SURGEON - FOR NEARLY HIS WHOLE LIFESPAN - HE STATED BEWARE OF CHEMICAL USUALLY THEY KILL MORE THAN SAVE - "I THINK IT BEST TO WATER WITH WATER"
