

Comparison of projected trawl revenues (including at-sea whiting) in a base period, represented by the average of 2000 and 2001, with three sets of 2003 OY options under consideration by the Council, using the bycatch projection model and assuming that depth-based management is possible for the 2003 fishery.

	Avg. trawl rev. from 2000-2001	Projected trawl revenue under 2003 OY options		
		Low OYs	Allocation Committee Preferred-OY Alternative	High OYs
<b>Total</b>	\$ 44,434,585	\$ 29,815,295	\$ 34,422,328	\$ 39,144,207
<b>Reduction from 2000-2001</b>				
Revenue		\$ 14,619,289	\$ 10,012,257	\$ 5,290,377
Percentage		33%	23%	12%
