

SALMON ADVISORY SUBPANEL REPORT ON
PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

The Salmon Advisory Subpanel (SAS) supports the efforts of Oregon Sea Grant, the Council, and NMFS to explore and develop communication strategies. The SAS appreciates the recent efforts by the Council to increase access to information such as providing a toll free phone number to the Council office and increased postings on the Council website. We feel challenges still exist, and hope the agencies continue to work on communications issues.
