Subject: Support for Preferred Alternative Marine Reserve Network at the Channel Islands

Dear Pacific Fishery Management Council:

I write to encourage your support for the establishment of a network of fully protected marine reserves within the federal waters of the Channel Islands National Marine Sanctuary. The preferred alternative is fully supported by the CEQA document and by the California Fish and Game Commission.

Fully protecting portions of the waters around the Channel Islands within a network of marine reserves is the only real way to help the once thriving marine life around the Islands rebound and thrive. The islands receive important protections as a National Marine Sanctuary, however new measures are needed to restore declining fisheries and preserve habitat.

There is now compelling scientific evidence that an appropriately designed system of marine reserves can help restore damaged rockfish and invertebrate populations. To ignore these problems at this time simply invites a more severe crisis in the future. Our Channel Islands support diverse marine habitats and a unique ocean ecosystem. I strongly urge that you support a configuration of fully protected marine reserves, which protects the Islands' many habitats, including rocky reefs, sandy seafloor, and subsea canyons. By leaving a portion of our coastal waters undisturbed, marine reserves can restore biological diversity and prevent the extinction of individual species. The resulting protected areas can also provide tangible, long-term benefits to commercial and recreational fishermen.

Please finish the marine reserve network recently approved by the California State Fish and Game Commission, by completing the federal portion of this carefully-negotiated, science-based protection for key ecosystems at the Channel Islands.

Thank you for your attention to this pressing matter.

Sincerely,

Rita Whalen
