us doc noaa id 052504A - meeting

i cannot attend the meeting on jun 13 but have  
comments for the record.

1. establish marine sanctuaries in plentitude now.
2. cut call commercial fish quotas by 50% immediately  
and 10% each succeeding year.
3. raise all sizes of fish to be caught by 10% this  
year and 10% each year thereafter.
4. stop any trawl netting or longlining of any kind.
5. take the recommendations of the pew foundation  
report on overfishing, the united nations report on  
overfishing saying this is dangerous and the pew  
foundation report on the biased makeup of regional  
fishing councils into account and into effect and stop  
the scam of the american public that is taking place.  
those fish belong to every single american and not to  
some commercial fish profiteer.
6. it is time to spend money on enforcement and catch  
thecommercial fish profiteering cheats. they report  
catch of one thing. they are out there really catching  
double that. high fines of \$100,000 for the first  
violation; \$500,000 for the second violation and jail  
for ten years and seizure of boat for the third  
violations. these people are cheating other americans.  
we need to stop this.
