

HIGHLY MIGRATORY SPECIES ADVISORY SUBPANEL REPORT ON BIGEYE TUNA  
OVERFISHING RESPONSE

The Highly Migratory Species Advisory Subpanel (HMSAS) discussed the bigeye tuna alternatives (Agenda Item J.5.a, Attachment 1), and the HMSAS feels the range of alternatives is adequate for public review. Furthermore, in light of the diminutive impacts of this Council's fisheries, the HMSAS suggests Alternative 3 as the preferred option.
