

INTER-AMERICAN TROPICAL TUNA COMMISSION  
COMISIÓN INTERAMERICANA DEL ATÚN TROPICAL

**73<sup>RD</sup> MEETING**

LANZAROTE (SPAIN)  
20-24 JUNE 2005

**PROP IATTC-73-C1**

**PROPOSAL BY JAPAN AND THE UNITED STATES**

**RESOLUTION ON NORTHERN ALBACORE TUNA**

*The Inter-American Tropical Tuna Commission (IATTC)*, having responsibility for the scientific study of tunas and tuna-like fishes of the eastern Pacific Ocean, and for the formulation of recommendations to the Contracting Parties, cooperating non-Parties, fishing entities and regional economic integration organizations (CPCs) with regard to the conservation and management of these resources,

*Observing* that the best scientific evidence on North Pacific albacore tuna from the International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean indicates that the species is either fully exploited, or may be experiencing fishing mortality above levels that are sustainable in the long term, and

*Taking note* that the IATTC staff has said that the stock assessment for Northern Pacific albacore tuna suggests a need for management measures to avoid increases in fishing mortality, and

*Recognizing* the importance of working with the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (WCPFC), as provided for in Article XXIV of the Antigua Convention, in order to manage North Pacific albacore tuna throughout its migratory range, and

*Recalling further* Article 22(4) of the WCPFC Convention that provides for cooperation with the IATTC regarding fish stocks that occur in the convention areas of both organizations;

*The IATTC therefore resolves that:*

1. The total level of fishing effort for North Pacific albacore tuna in the Eastern Pacific Ocean not be increased beyond current levels.
2. The CPCs shall take necessary measures to ensure that the level of fishing effort by their vessels fishing for North Pacific albacore tuna is not increased;
3. All CPCs shall report all catches of North Pacific albacore tuna by gear type to the IATTC every six months.
4. The Director shall, in coordination with other scientific bodies conducting scientific reviews of this stock, monitor the status of North Pacific albacore tuna and report on the status of the stock at each annual meeting;
5. The CPCs shall consider future actions with respect to North Pacific albacore tuna as may be warranted based on the results of such future analysis.
6. The CPCs call upon the members of the WCPFC to consider, at the earliest opportunity, taking such action as may be necessary to ensure the effective conservation and management of North Pacific albacore tuna throughout its range including, in particular, measures to ensure that fishing effort on the stock in the WCPFC area does not increase and, as necessary, measures to reduce fishing effort to levels commensurate with the long-term sustainability of the resource.
7. The Commission through the Director shall communicate with the WCPFC and request them to take

similar measures.

8. The provisions of paragraph 2 shall not prejudice the rights and obligations under international law of those coastal CPCs in the EPO whose current fishing activity for northern Pacific albacore tuna is limited, but that have a real interest in, and history of, fishing for the species, that may wish to develop their own fisheries for northern Pacific albacore tuna in the future.
