

SCIENTIFIC AND STATISTICAL COMMITTEE REPORT ON  
SALMON METHODOLOGY REVIEW

The Scientific and Statistical Committee (SSC) met with Mr. Larrie LaVoy (Model Evaluation Workgroup) and Mr. Chuck Tracy to identify items for review by the SSC Salmon Subcommittee at its October meeting. The following items were identified as ready for review:

- Chinook and Coho Fishery Regulation Assessment Model (FRAM) Documentation;
- Columbia River fall Chinook ocean abundance forecast;
- experimental design for near-shore commercial test fisheries.

The SSC Salmon Subcommittee will review these products in October prior to the full SSC meeting in November. As always, the SSC requires good documentation and ample review time to make efficient use of the SSC Salmon Subcommittee's time. Materials to be reviewed should be submitted at least two weeks prior to the scheduled review. Agencies should be responsible for ensuring that materials submitted to the SSC are technically sound, comprehensive, clearly documented, and identified by author.
