

GROUND FISH ADVISORY SUBPANEL REPORT ON  
INCIDENTAL CATCH REGULATIONS IN THE SALMON TROLL AND FIXED GEAR  
SABLEFISH FISHERIES

The Groundfish Advisory Subpanel (GAP) considered regulations involving incidental halibut harvest of the above fisheries.

Having viewed the fact that harvest quota is to be unchanged from 2006 the GAP recommends status quo for 2007. The range of landing restrictions from the 2006 season would be equally applicable for 2007.
