

2002 Fisheries Enforcement Report

- Overview of D13 Coast Guard Resources
- Fisheries Enforcement Activity Summary for 2002
 - Fisheries Enforcement Comparison to previous years
 - Annual Summaries of:
 - . Resource hours expended on fisheries enforcement
 - Fisheries boardings by fishery
 - . Fisheries boardings by region
 - . Fisheries violations by jurisdiction

2002 Fisheries Enforcement Report

- Summary of Commercial Fishing Vessel Safety Compliance Statistics
- Summary of Joint Enforcement Efforts
- Future Outlook of District 13 Fisheries Enforcement Program
 - Impacts of Transition into the Department of Homeland Security

2002 Fisheries Boardings

- 348 recreational and commercial fisheries boardings were conducted resulting in 43 citations:
 - 1st Quarter 63 boardings, 8 citations
 - 2nd Quarter 137 boardings, 18 citations
 - 3rd Quarter 99 boardings, 11 citations
 - 4th Quarter 49 boardings, 6 citations
- Boardings conducted in previous years:

2001 - 600

2000 - 666

1999 - 730

69 citations

93 citations

129 citations

2002 Fisheries Boardings

Boardings by fishery:

- Groundfish 95
- Salmon 64
- Crab 55
- Shrimp 28
- Recreational and other State fisheries – 106

Violations by Jurisdiction:

- State 34
- Federal 5
- Tribal 4

2002 Joint Operations and Training with NOAA Fisheries and State **Officers** Surveillance Flights 11 5 **Surface Patrols** 8 **Boardings** Documented **Violations** 10 Enforcement **Training Sessions** 5

- D13 shares surface and air patrol schedules with NOAA Fisheries and the States to maximize patrol effectiveness.
- February 2003 night surveillance flight with NOAA Fisheries resulted in first documented RCA incursion.

PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

Situation: Ms. Flaxen Conway, an Oregon Sea Grant extension agent, was invited by the Council to give a presentation on communication in fisheries management. This presentation is based on a study conducted by Ms. Jennifer Gilden (prior to working with the Council) and Ms. Conway. The research was conducted in 2000-2001 and was based on interviews with people in fisheries management and the fishing industry. A report on the study, "An Investment in Trust," provides context, outlines some of the challenges to communication in fisheries management, describes methods currently used to communicate, and offers suggestions on how to improve communication.

Council Task:

1. Discussion on ways to improve communication with fishing communities.

Related Materials:

1. A limited number of "An Investment in Trust: Communication in the Commercial Fishing and Fisheries Management Communities" are available upon request.

Reference Materials: None.

Agenda Order:

- a. Agendum Overview
- Jennifer Gilden b. Report on Enhancing Communication with Fishing Communities Flaxen Conway
- c. Reports and Comments of Advisory Bodies
- d. Public Comments
- e. Council Discussion

PFMC 03/24/03

An Investment in Trust:

Communication in the Commercial Fishing and Fisheries Management Communities

Flaxen D.L. Conway **Oregon Sea Grant Extension**

Funded by Oregon Sea Grant and Oregon Sea Grant Extension, with additional support from the Pacific States Marine Fisheries Commission and the National Marine Fisheries Service.

What We Did

- Semi-structured ethnographic interviews
- We interviewed members of two communities:
 - Commercial Fishing Community
 - Fisheries Management Community
- n 4 regions
 - North Coast
 - Mid Coast
 - South Coast
 - Urban Centers

What We Did

- we looked at several communication strategies
 - Face to face communication
 - Written communication
 - Communication via electronic media
- And various tools within each strategy
 - Within face to face, tools like
 - word of mouth
 - liaisons
 - meetings
 - Within written...
 - newsletters, etc.
 - Within electronic...
 - the Internet and WWWeb

- We learned a lot from participants
 - about what is working
 - what is not working
 - and what could work better by small but important adjustments
 - for example, the Internet works fairly well but only with people who have access or use it!
- n People you know, work with, or constituents taught us a lot...and this is captured in the publication.

"There aren't any villains. Everybody's trying to do the right thing. Sometimes we don't know what it is, and sometimes we don't have the tools, and sometimes it's just a difference of opinion."

What We Learned From Participants

- We learned about both communities.
- n We learned about the issues that influence communication.
- We learned about how these things ultimately affect the relationship between both communities.

Fishing community: competition and distrust

- "Fishing industry" actually comprises many different and often conflicting interest groups based on gear types, fisheries, geographic locations, and other factors
- Most communication in the fishing community takes place within, and not across, these interest groups
- Processors and gear suppliers have unique communication needs and concerns
- n Reach the entire community (crew, on-shore partners)

- Sincere interest to communicate
- The lack of time and funding, overwork, lawsuits, and bureaucracy are major constraints
- There is a lack of communication and understanding about what agencies are and do
 - public views NMFS and the Council as the same

We Learned About the Issues that Influence Communication... and how they affect the relationship between these communities.

- n Information needs are directly related to the receiver's (listener/reader) priorities
- n Trust and power
- n Communication skills
 - language differences
 - listening
 - willingness to change
- n Cultural differences and Stereotyping
- n Representation
- n Data

Why Invest in Communication... and Ultimately Trust?

- Communication is not the "sliver bullet" but...
- n Research participants shared over 50 "actions to improve..." (page 64-67) that could be put into use
 - on an individual level
 - on a community level
- Plus other helpful suggestions scattered throughout the publication:
 - listening skills (p. 13)
 - working with liaisons (p. 44)
 - holding effective meetings (p. 46)
 - using the Internet (p. 56)

Why Invest?

- Pay now or pay later
 - hot topics deserve adequate, effective communication
 - invest time now (build trust) to save time later
- n Improvements in communication and trust can
 - improve understanding and confidence
 - improve how meetings function
 - get more buy-in
 - save time because you don't have to fix things later
- n This is not extra work. Rather, improvements in strategies and tools used that can make a difference in the
 - work we do,
 - the products we produce,
 - and the relationships we have (or will have later)

COASTAL PELAGIC SPECIES ADVISORY SUBPANEL REPORT ON PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

The Coastal Pelagic Species Advisory Subpanel (CPSAS) heard a presentation from Ms. Jennifer Gilden on the report "An Investment in Trust." The CPSAS unanimously agrees that communications between fisheries managers and the fishing industry are critically important. The CPSAS is pleased the Council is working in this important area and supports any efforts by the Council to improve communications between managers and the industry, including allocating funds to distribute additional copies of the report "An Investment in Trust."

PFMC 04/10/03

GROUNDFISH ADVISORY SUBPANEL REPORT ON PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

The Groundfish Advisory Subpanel (GAP) received a presentation from Council staff member, Ms. Jennifer Gilden, regarding a report she and Ms. Flaxen Conway of Oregon Sea Grant will be presenting to the Council.

The GAP has always supported finding better means of communication among fishing communities, fisheries managers, and scientists. Mis-communication (and no communication) makes fisheries management more difficult and breeds distrust among those involved. The GAP endorses the work done by Ms. Gilden and Ms. Conway and suggests that further efforts be made to foster communication.

PFMC 04/10/03

HABITAT COMMITTEE COMMENTS ON PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

The Habitat Committee endorses Council efforts to enhance communication with fishing communities and other constituent groups. Habitat issues can be an effective arena for bringing together diverse interests. Groups such as watershed councils and others that are working to restore salmon habitat should be included in communication efforts, and educated about how fishery management works and how their on-the-ground efforts complement Council management recovery strategies.

PFMC 04/10/03

SALMON ADVISORY SUBPANEL REPORT ON PLANNING SESSION ON ENHANCING COMMUNICATION WITH FISHING COMMUNITIES

The Salmon Advisory Subpanel (SAS) supports the efforts of Oregon Sea Grant, the Council, and NMFS to explore and develop communication strategies. The SAS appreciates the recent efforts by the Council to increase access to information such as providing a toll free phone number to the Council office and increased postings on the Council website. We feel challenges still exist, and hope the agencies continue to work on communications issues.

PFMC 04/10/03

METHODOLOGY REVIEW PROCESS FOR 2003

<u>Situation</u>: Each year, the Scientific and Statistical Committee (SSC) completes a methodology review to help assure new or significantly modified methodologies employed to estimate impacts of the Council's salmon management use the best available science. This review is preparatory to the Council's adoption, at the November meeting, of all proposed changes to be implemented in the coming season or, in certain limited cases, providing directions for handling any unresolved methodology problems prior to the formulation of salmon management options in March. Because there is insufficient time to review new or modified methods at the March meeting, the Council may reject their use if they have not been approved the preceding November.

In 2003, the SSC reviewed development of:

- 1. A revised Chinook Fishery Regulation Assessment Model (FRAM) capable of assessing the effects of mark selective chinook fisheries.
- 2. A revised Coho FRAM that split the final time step from September-December into two time steps: September and October-December..

Both of these revisions were given final approval at the March 2003 Council meeting.

The SSC will receive input from the Salmon Technical Team and provide recommendations for methodologies to be reviewed in 2003. A draft review schedule is included in Exhibit B.3.a, supplemental SSC report.

Council Action:

- Provide guidance to the SSC regarding priorities for methodologies to be reviewed.
- 2. Request affected agencies develop and provide needed materials to the SSC, as appropriate.

Reference Materials:

1. Scientific and Statistical Committee Report on Methodology Reviews for 2003 (Exhibit B.3.a, Supplemental SSC Report).

Agenda Order:

a. Agendum Overview

Chuck Tracy Pete Lawson

- b. Report of the Scientific and Statistical Committee
- c. Recommendations of the States, Tribes, and Federal Agencies
- d. Reports and Comments of Advisory Bodies
- e. Public Comment
- f. **Council Action:** Establish 2003 Schedule and Methodologies To Be Reviewed.

PFMC 08/8/13

LEGISLATIVE COMMITTEE REPORT

The Legislative Committee discussed current legislative matters and heard a presentation from Dr. Steve Freese (NMFS-NWR) on aspects and implementation of the West Coast groundfish buyback program. The buyback program was passed by Congress in January 2003. In May 2003, NMFS intends to publish for public review and comment in the *Federal Register* specific aspects of the buyback program, including implementation steps. Dr. Freese characterized the workload burden for the Pacific Fishery Management Council (Council), in the near term, as modest. For the time being, Council involvement would be limited to commenting on the proposed implementation process.

Relative to congressional activity on fishery-related legislation, no new legislation has been introduced, and it appears congressional activity on fishery-related matters has slowed for the time being. Magnuson-Stevens Fishery Conservation and Management Act on guidelines for individual fishing quota (IFQ) programs could be delayed due to competing legislative activity and changes to the chairs of Senate Appropriations and Commerce committees. The net effect may be no new restrictions on development and implementation of IFQ programs for up to two years. The Council may want to consider this opportunity relative to groundfish fleet rationalization and capacity reduction.

Per Council guidance, Council staff sent a letter to NMFS-Office of Sustainable Fisheries with comments on the need for revision to National Standard-1 guidelines. The letter stressed the strong desire for full and formal Council participation in the review.

Finally, legislative staff from the offices of Senator Murray, Senator Cantwell, and Congressman Baird attended the Legislative Committee meeting. The committee appreciates congressional interest in the Council process and recommends Council staff continue to invite congressional representatives and staff to attend Legislative Committee and Council meetings.

PFMC 04/10/03

APPOINTMENTS TO ADVISORY BODIES, STANDING COMMITTEES, AND OTHER FORUMS

<u>Situation</u>: The issues for this agendum include guidance and action on appointments to advisory bodies as described below.

- 1. Appointments to vacancies on the Scientific and Statistical Committee (SSC) and the Highly Migratory Species Advisory Subpanel (HMSAS) At the time of the March Council meeting, no nominations had been received to fill the social scientist At-Large vacancy on the SSC nor the Northern Processor (north of Cape Mendocino) position on the HMSAS. Announcements requesting nominees for these positions will be issued prior to the April Council meeting and the Council will hopefully have nominees to consider for appointment at the June Council meeting.
- 2. Temporary replacement for the Oregon Department of Fish and Wildlife (ODFW) position on the Habitat Committee (HC) The ODFW has requested that Ms. Arlene Merems temporarily replace Mr. David Fox as the agency representative on the HC (Closed Session A, Attachment 1).
- 3. Other Appointments or Advisory Body Issues or Information At the time of Briefing Book preparation, no other appointment issues have been identified.

Council Action:

- 1. Provide discussion and guidance on soliciting nominees for the SSC and HMSAS.
- 2. Confirm the temporary replacement for the ODFW position on the HC.
- 3. Discuss other advisory body membership issues as necessary.

Reference Materials:

1. Letter of March 10, 2003 from ODFW (Closed Session A, Attachment 1).

Agenda Order:

a. Agendum Overview

John Coon

- b. Appointments to Advisory Bodies
- c. Reports and Comments of Advisory Bodies
- d. Public Comment
- e. **Council Action:** Consider Appointing New Members and Addressing Other Membership Issues

GROUNDFISH ADVISORY SUBPANEL STATEMENT ON STANDARDS AND CRITERIA FOR APPROVING EXEMPTED FISHING PERMITS

The Groundfish Advisory Subpanel (GAP) reviewed the proposed timetable and changes in Council operating procedures developed by the Groundfish Management Team (GMT) and provided in Exhibit B.6.b GMT Reports 1 through 3.

While the GAP generally agrees with the GMT recommendations, it suggests one modification to the timetable. As proposed, unused "set asides" are scheduled for release in April of each year. However, because the Council has adopted a system of using two, one-year optimum yields (OYs) within the two-year management process, it is unlikely we will know in April whether an exempted fishing permit (EFP) "set aside" will be fully used, especially for new EFPs and those that involve a summer-only fishery. The GAP recommends additional check points be established that will allow unused "set asides" to be released in time for any inseason adjustments that could occur for the remainder of the year.

An alternative could involve a roll-over of unused OY and EFP "set asides" to the second year of the two-year cycle, thus bringing us closer to true two-year management and allowing greater stability in the fisheries.

The GAP also suggests there is a policy issue implicit in the EFP process which must be considered by the Councils: at low OY levels, does the use of fish for EFPs "trump" the use of fish for directed fisheries and/or incidental catch in directed fisheries? The Council will need to keep this issue in mind each and every time it approves an EFP and develop some standards on how to weigh the costs and benefits of using scarce fish for EFPs versus directed fisheries.
