INTRODUCTION

This document contains or identifies the various elements, documents, and sources comprising the complete and official record of Council meeting discussions and actions. In addition to the Meeting Summary, which follows this introductory section (see #7 below), it includes information or references that serve as the functional detailed minutes for this Council meeting as required by §302(i)(2)(E) of the Magnuson-Stevens Act. The full record is maintained at the Council office, is available on the Council website (<http://www.pcouncil.org/>) or upon request from the Council office, and consists of the following:

1. **Meeting Notice and Proposed Agenda** – These documents are available on the Council Website prior to and following each meeting at <http://www.pcouncil.org/>.
2. **Attendance Records** – These documents are available for the Council meeting and each advisory body meeting by request from the Council office.
3. **All Documents, Reports, and Presentations for Council Consideration** – These items include (1) all documents produced or received for the meeting briefing book, validated by a label assigned by the Council Secretariat and distributed to Council Members; (2) written public comments received at the Council meeting in accordance with agenda labeling requirements; and (3) electronic material or handout materials used in presentations to Council Members during the open session. They are available from links in the Meeting Summary of this document or at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.
4. **Council Decisions Summary Document** – This document is distributed shortly after each Council meeting. It provides very brief descriptions of most key Council decisions and is available at <http://www.pcouncil.org/resources/archives/council-meeting-decisions/> and also provided by agenda item in the Meeting Summary of this document.
5. **Draft or Final Decision Documents Finalized after the Council Meeting** – Documents such as Environmental Impact Statements or Environmental Assessments are available on the Council website as they are completed.
6. **Gavel-to-Gavel Audio Recordings** – These recordings contain the testimony, presentations, discussions, and actions occurring at the meeting and are labeled by date and time and have been annotated as to the time on the recording for the start of each agenda line item to help facilitate review (e.g., mp3:04-11-15am1@0:18:04). The recordings may be accessed from the links contained within the Meeting Summary of this document or at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.
7. **Meeting Summary** (immediately follows this section) – The Meeting Summary lists, in agenda item order, the briefing book documents, reports, presentations, and Council motions and actions, including a brief summary from the Council Decisions Summary Document for each agenda item. It constitutes the meeting record formally approved by the Council. The agenda heading for each agenda item, and most listed documents, serve as internet links to the actual briefing book documents. Internet links in brackets (e.g., [[mp3: 11-11-14pm1 @01:21:15](#)]) refer to the audio recording and elapsed time on the recording at which the agenda item was initiated. Links to the audio recordings are annotated by agenda item and may also be accessed at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.

c. Council Action: Provide Recommendations on Consultation Standards for Groundfish Fisheries

Motion: Move that NMFS convene a workshop between now and the September Council meeting, it would brief stakeholders about their current progress and garner input from groundfish fishermen, salmon fishermen, and other stakeholders. Ideas and concepts generated through the workshop could then be incorporated by NMFS into the information they present to the Council in September or future Council meetings.

Dale Myer/Dan Wolford (Motion carried unanimously)

Staff Summary: *The Council endorsed NMFS' proposal to convene a workshop in mid-August in order to brief stakeholders on the development of the biological opinion for Endangered Species Act- (ESA) listed Chinook salmon stocks caught in the Pacific coast groundfish fishery, and to obtain input from stakeholders on realistic estimates by catch in existing and future groundfish fisheries and potential measures to reduce Chinook salmon bycatch. NMFS will report on workshop outcomes at the September Council meeting. This information will help the Council to develop proposed incidental catch levels for various groundfish fisheries to be evaluated through the reinitiated NMFS ESA section 7 consultation with regard to their jeopardizing listed salmon stocks' existence.*

c. Council Action: Review Pacific Coast Groundfish and Endangered Species Workgroup Recommendations and Identify Measures to be Evaluated for the 2017-2018 Biennial Management Period or Other Appropriate Actions

Motion: None

Staff Summary: *The Council took the following action in response to recommendations of the Groundfish ESA Workgroup:*

- *Requested that United States Fish and Wildlife Service reinitiate ESA section 7 consultation for eulachon or modify the current Incidental Take Statement to develop a take estimate that accounts for the increase in eulachon abundance and includes the shorebased hake fishery, as well as bottom trawl and at-sea sectors.*
- *Requested that NMFS reinitiate ESA section 7 consultation for short-tailed albatross to incorporate new information on population status and fishery takes.*
- *Tasked the Scientific and Statistical Committee (SSC) with review of methods to estimate rare event bycatch in the absence of 100 percent observer coverage.*
- *Began the process to implement a logbook requirement for all commercial groundfish fisheries, especially for those fisheries with low observer coverage rates.*

The Council recognized that implementing the logbook requirement will be complicated, although electronic logbooks could provide some efficiencies. The Council will consider scheduling action on this topic at a future meeting.

c. Council Action: Adopt a Process for Specifications and Management Measures for 2017-2018 Fisheries [[mp3: 6-13-15am1](#) @ 0:25:32]

Motion: Adopt the process and schedule for 2017-2018 harvest specifications and management measures as described in Agenda Item D.5, Attachment 1.

Troy Buell/Dan Wolford (Motion carried, Ms. Culver voted no)

Staff Summary: *The Council adopted the process and schedule as described in [Agenda Item D.5, Attachment 1](#). The Council also scheduled a further discussion at the September Council Meeting regarding a contingency plan, should the January 1 fishing year start date become threatened as in prior years, and adding additional elements to the process and schedule regarding a Fishery Management Plan amendment to better address within-biennium implementation of rebuilt stock implications (a “green light” mechanism).*

c. Council Guidance [[mp3: 6-13-15am2 @ 1:26:14](#)]

Motion: Council directs that it be made clear for all action alternatives being developed that any proposed or adopted alternative is subject to change based on government-to-government consultations between National Oceanic and Atmospheric Administration and an affected tribe or tribes.

David Sones/Frank Lockhart (Motion carried unanimously)

Staff Summary: *The Council provided guidance on the development of alternatives to change groundfish essential fish habitat (EFH), including an update from the collaborative group of industry and nongovernmental organization participants. The collaborative group will continue outreach meetings and intends to submit a proposed alternative to modify EFH closed areas and rockfish conservation areas for the advance September briefing book.*

The Council also passed a motion recognizing that any EFH changes affecting Tribal usual and accustomed areas would be subject to government consultation between NMFS and the affected tribe or tribes.

Motion: Adopt the following:

- Sablefish north of 36° N. latitude: increase the daily trip limit (DTL) LE north trip limit to 1,125 lbs/wk and 3,375 lbs/2 months and the DTL open access (OA) north trip limit to 350 lbs/day, 1,600 lbs/wk, and 3,200 lbs/2 months for periods 4 through 6, beginning as quickly as possible in period 4.

- Minor shelf rockfish complex, shortbelly, widow, and chilipepper between 40° 10' N. latitude and 34° 27' N. latitude: Increase the OA trip limit to 500 lbs/2 months for periods 4 through 6.
- Blackgill rockfish south of 40° 10' N. latitude: increase the LE sub-limit to 1,600 lbs/2 months and increase the OA sub-limit to 550 lbs/2 months for periods 4 through 6, beginning as quickly as possible in period 4.
- California scorpionfish: increase the trip limit to 1,500 lbs/2 months for both the LE and OA sectors for periods 4 through 6, beginning as quickly as possible in period 4.
- Black rockfish between 40° 10' and 42° N. latitude: decrease the trip limit from 8,500 lbs/2 months to 6,000 lbs/2 months beginning at the start of the next bi-monthly period (either July 1 or September 1).
- Adopt a 50 percent discard mortality rate for big skate caught as bycatch with trawl gear (SSC recommendation).

Joanna Grebel/David Crabbe (Motion carried, Mr. Lockhart abstained)

Motion: Adopt big skate trip limits of 35,000 pounds per 2 months for periods 4 through 6.

Troy Buell/David Sones (Motion carried, Mr. Lockhart abstained)

Staff Summary: *The Council adopted a revised skate discard mortality rate recommended by the SSC. Additionally, the Council considered the latest information on groundfish landings and adopted increases to the big skate trip limits for the Shorebased Individual Fishing Quota Program. Trip limit increases were also adopted for the fixed gear fleets including the LE and OA sablefish DTL fisheries north of 36° N. latitude; OA fishery for minor shelf Rockfish complex, shortbelly, widow, and chilipepper between 40° 10' and 34° 27' N. latitude; LE and OA blackgill rockfish south of 40° 10' N. latitude; and LE and OA fisheries for California scorpionfish. Reductions to the LE and OA fixed gear black rockfish trip limits were adopted between 40° 10' and 42° N. latitude. c. Council Action: Refine Alternatives for Blackgill and Slope Rockfish Quota Share Allocation [[mp3: 6-15-15am2](#) @ 0:52:37]

Motion: Remove the LE trawl quota share allocation alternatives to the No Action Alternative for blackgill rockfish and the remaining species in the slope rockfish complex south of 40° 10' N. latitude from detailed analysis. Also remove from detailed analysis the alternative sub-options to status quo regarding the equal sharing portion of the quota share allocated with the LE trawl permits retired in the buyback program. This action would maintain the default Amendment 20 quota share allocation mechanism where the amount of permit quota share for the current slope rockfish south complex is used to allocate both blackgill rockfish and the remaining species in the complex.

Joanna Grebel/David Crabbe (Motion carried, Mr. Wolford Abstained)

Staff Summary: *The Council decided to drop alternatives for the reallocation of LE trawl quota shares in association with removing blackgill rockfish from the Slope Rockfish complex south of 40° 10' N. latitude. If the Council decides to go forward with this proposed action, quota share allocations of blackgill rockfish and the remaining species in the southern Slope Rockfish complex will be established using the default Amendment 20 rules that apply to such a situation. Additionally, as part of the action in September, the Council will consider whether adjustments to the vessel usage caps would be appropriate if the stock complex is restructured. The carryover of quota pounds from the year before the restructuring to the year after will also be addressed.*

Staff Summary: *The Council received a briefing from Ms. Chantel Wetzel on a new management strategy evaluation (MSE) which analyzes the long-term trade-offs associated with different strategies for revising existing rebuilding plans. The Council provided guidance to add alternatives and new performance metrics to the MSE as recommended by the SSC ([Agenda Item D.10.a, Supplemental SSC Report](#)) and the Groundfish Advisory Subpanel ([Agenda Item D.10. a, Supplemental GAP Report](#)). The Council concluded the MSE potentially provides useful information to inform future decisions on revising rebuilding plans and expressed interest in further development of this analytical tool. Motion: Recommend issuance of an exempted fishing permit (EFP) to the Alliance of Communities for Sustainable Fisheries as shown in Agenda Item E.2, Attachment 1 with the following changes.

- 1) One leatherback turtle mortality, or seriously injured as determined by the onboard observer, would terminate the EFP.
- 2) The EFP will include two drift gillnet (DGN) boats only.

- 3) Catch, bycatch, and bycatch mortality data will be collected from each participating vessel. Catch, bycatch, and bycatch rates will be computed on a catch per day and catch per set-minute basis as the two catch per unit of effort (CPUE) statistics used in statistical analysis. These rates will be compared to the average catch and bycatch rates for the 2015 concurrent DGN fishery outside the Pacific Leatherback Conservation Area (PLCA) and for the DGN fishery operating in prior years when fishing activity was allowed in the PLCA. In all cases, observer data will be the source of the CPUE data. NOAA Fisheries staff will be relied upon for the compilation of CPUE data or the appropriate entity.
- 4) The EFP applicants will consult with scientists about present-day ocean climate conditions that are thought to be favorable for identification of optimal time/area locations to conduct test fishery operations. This would involve the use of near-real-time oceanographic data to predict general times and areas where target catch rates are expected to be high relative to bycatch rates, especially of protected species. Once a test location has been identified, the boat captains will provide notice to NOAA fisheries of intent to conduct the test fishery.
- 5) At sea, vessel operators or onboard observers will collect the following oceanographic information at the time of DGN deployment, and again at the time of net retrieval: sea surface temperature (SST), water clarity, thermocline, and other information available from sonar, echo sounder, terrafin or other onboard technology.
- 6) Operators will keep a complete log of active tending methods utilized during all fishing operations, specific to the set, soak time, and net retrieval. Operators will also provide a written description of the reasons why the determined set location is expected to be optimal to maximize take of target species with minimal bycatch of protected species (i.e., no visible sign of whales/dolphins in the area at time of deployment; temperature/current breaks, etc.)
- 7) The EFP shall be conducted with 100 percent human observer coverage.
- 8) Gear modifications listed in Agenda Item E.2.a, Supplemental HMSAS Report, June 2015 will be included in the EFP.
- 9) A per year by-catch limit for marlins is to be developed by NMFS; if obtained, the EFP would close for the remainder of the year.
- 10) Pacific leatherback turtle critical habitat along the U.S. West Coast is a recognized sensitive area during leatherback migration and fishing in the area will be prohibited.

David Crabbe/Marci Yaremko

Amendment 1: Under part 1 strike the word “seriously” and change “injured” to “injury”
Dan Wolford/Buzz Brizendine (Amendment 1 carried unanimously)

Amendment 2: Add the following:

- 11) Recommend NMFS review available data and information to assist in narrowing the area for the EFP within the PLCA to reduce encounters with ESA-listed species.

Michele Culver/Rich Lincoln

Amendment 3: (As a substitution to the Culver/Lincoln Amendment 2): Add the following:

- 11) Recommend NMFS review available data and information to determine any areas of consistently high presence of ESA-listed or other protected species in order to aid the applicants in selecting fishing areas.

Chris Kerns/David Sones (Amendment 3 carried unanimously)

Amendment 4: Make the following change under item 3: Strike “2015” and replace with “concurrent”

Dan Wolford/Rich Lincoln (Amendment 4 carried unanimously).

Motion, as amended, carried unanimously.

Staff Summary: *The Council recommended that NMFS issue an EFP to the Alliance of Communities for Sustainable Fisheries based on their application (see [Agenda Item E.2, Attachment 1, June 2015](#)). The Council recommended 11 points of changes and adjustments to the proposed activities and additional conditions, consolidated into the 6 points below.*

1. *No more than two large mesh DGN vessels could fish under the EFP.*
 2. *100 percent observer coverage.*
 3. *One leatherback sea turtle mortality or injury as determined by the onboard observer would terminate the EFP. Similar caps would be applied to other protected species and striped marlin.*
 4. *Fishing is prohibited in leatherback sea turtle critical habitat and other restrictions on the area of operation.*
 5. *The EFP applicants will consult with scientists about current ocean climate conditions that are thought to be favorable for identification of optimal time/area locations to conduct test fishery operations. This would involve the use of near-real-time oceanographic data to predict general times and areas where target catch rates are expected to be high relative to bycatch rates, especially of protected species.*
 6. *The EFP applicants will collect data on catch and bycatch, gear deployment, and ocean conditions.*

c. Council Action: Consider Swordfish Management Plan and Refine Alternatives for Monitoring Plan Hardcaps [[mp3: 6-14-15pm3](#) @ 1:00:45]

Motion: Include within the range of alternatives, the HMSMT alternative (both aligned with the biennial specifications and the rolling window) which would apply a 2-year average bycatch cap for Alternative 4 and Alternative 5.

Joanna Grebel/Dan Wolford (Motion carried unanimously)

Motion: Request the Highly Migratory Species Management Team (HMSMT) move forward with developing the swordfish management and monitoring plan as described in Agenda Item E.3.a, HMSMT Report (June 2015) and Agenda Item E.3.a, Supplemental HMSMT Report 2 (June 2015) and consider the comments in Agenda Item E.3.a, Supplemental SSC Report (June 2015) in light of the Council's previous action at the March 2015 meeting with regard to appropriate observer coverage levels, and consider the methodology in the "Ecological Applications" manuscript by Martin et al., 2015.

Michele Culver/Rich Lincoln (Motion carried unanimously)

Staff Summary: *The Council adopted additional alternatives and directed the HMSMT to analyze them for Council final action in September 2015. These alternatives would be variations on the current hard cap alternatives 4 and 5, where a two-year average of takes of high priority protected species would be counted against the hard caps in those alternatives. The two-year period for counting takes against the caps would be aligned with the two-year biennial management period, or would be a rolling period where takes in the current fishing season and the previous fishing season would be counted against the caps.*

The Council also directed the HMSMT to further develop the Swordfish Fishery Management and Monitoring Plan and to continue investigating optimal levels of observer coverage to detect rare event bycatch while considering the costs of observer coverage. The Council also expressed interest in obtaining more detail on alternatives that include performance standards for finfish bycatch.

Motion: Approve the Pacific mackerel stock assessment identified in Agenda Item G.2.a, Attachment 1 for use in management for the 2015-2016 and 2016-2017 fishing seasons. Additionally, adopt the harvest specifications identified in Table 3 from the Supplemental CPSMT Report for 2015-2016, and the specifications in Table 4 for 2016-2017. Also adopt the incidental fishery provisions outlined in item 3 on the bottom of page 1 of the Supplemental CPSMT Report.

Marci Yaremko/David Crabbe (Motion carried unanimously)

Amendment: Add to the motion the underlined language in the following sentence: “Additionally, adopt the harvest specifications identified in Table 3 from the Supplemental CPSMT report for 2015-16, and the specifications in Table 4 for 2016-2017 except adjust the P* down to 0.40.”

Corey Niles/Rich Lincoln (Amendment failed, Mr. Niles, Mr. Myers and Mr. Lincoln voted in the affirmative)

Motion carried unanimously

Staff Summary: *The Council adopted the stock assessment, overfishing limit (OFL), and annual specifications for both the 2015-16 and the 2016-17 fishing years. The Council also adopted the following management measures: for each separate fishing year, should the directed fishery realize the annual catch target (ACT), the Council should recommend that NMFS close the directed fishery and shift to an incidental-catch-only fishery for the remainder of the fishing season, with a 45 percent incidental landing allowance when Pacific mackerel are landed with other coastal pelagic species (CPS), with the exception that up to 3 mt of Pacific mackerel per landing could be landed in non-CPS fisheries.*
