Webinar Series on Ecosystem Indicators to be held in January- February 2016

The Pacific Fishery Management Council's (Council) Ecosystem Workgroup (EWG) will host a series of five webinars in January and February 2016, which are open to the public.

Dates and Time of Webinars

The webinars will be held on the dates listed below, from 1:30 p.m. Pacific Time and last for approximately two hours. Information on how to participate is below.

- Tuesday, January 12: Contents of the Annual California Current Ecosystem Status Report; physical oceanography indicators
- Thursday, January 14: Biological indicators
- Tuesday, January 26: Human dimensions indicators
- Thursday, January 28: Habitat indicators
- Tuesday, February 2: Risk assessments and application of indicators to decision making

Each webinar will begin with a short presentation by members of [NOAA's California Current Integrated Ecosystem Assessment Team](#), followed by a discussion facilitated by the EWG. This webinar series is part of the Coordinated Ecosystem Indicator Review Initiative intended to address goals and objectives from the Council's [Fishery Ecosystem Plan](#). Through these webinars, the EWG seeks input from Council advisory bodies and the public on the indicators presented in the Annual Report and how they can effectively support the Council's goal of integrating ecosystem considerations into fishery management decisions.

Background Material
