INTRODUCTION

This document contains or identifies the various elements, documents, and sources comprising the complete and official record of Council meeting discussions and actions. In addition to the Meeting Summary, which follows this introductory section (see #7 below), it includes information or references that serve as the functional detailed minutes for this Council meeting as required by §302(i)(2)(E) of the Magnuson-Stevens Act. The full record is maintained at the Council office, is available on the Council website (<http://www.pcouncil.org/>) or upon request from the Council office, and consists of the following:

1. **Meeting Notice and Proposed Agenda** – These documents are available on the Council Website prior to and following each meeting at <http://www.pcouncil.org/>.
2. **Attendance Records** – These documents are available for the Council meeting and each advisory body meeting by request from the Council office.
3. **All Documents, Reports, and Presentations for Council Consideration** – These items include (1) all documents produced or received for the meeting briefing book, validated by a label assigned by the Council Secretariat and distributed to Council Members; (2) written public comments received at the Council meeting in accordance with agenda labeling requirements; and (3) electronic material or handout materials used in presentations to Council Members during the open session. They are available from links in the Meeting Summary of this document or at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.
4. **Council Decisions Summary Document** – This document is distributed shortly after each Council meeting. It provides very brief descriptions of most key Council decisions and is available at <http://www.pcouncil.org/resources/archives/council-meeting-decisions/> and also provided by agenda item in the Meeting Summary of this document.
5. **Draft or Final Decision Documents Finalized after the Council Meeting** – Documents such as Environmental Impact Statements or Environmental Assessments are available on the Council website as they are completed.
6. **Gavel-to-Gavel Audio Recordings** – These recordings contain the testimony, presentations, discussions, and actions occurring at the meeting and are labeled by date and time (e.g., 04-11-15am1) and have been annotated as to the time on the recording for the start of each agenda line item to help facilitate review. The recordings may be accessed from the links contained within the Meeting Summary of this document or at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.
7. **Meeting Summary** (immediately follows this section) – The Meeting Summary lists, in agenda item order, the briefing book documents, reports, presentations, and Council motions and actions, including a brief summary from the Council Decisions Summary Document for each agenda item. It constitutes the meeting record formally approved by the Council. The agenda heading for each agenda item, and most listed documents, serve as internet links to the actual briefing book documents. Internet links in brackets (e.g., [[mp3: 11-11-14pm1 @01:21:15](#)]) refer to the audio recording and elapsed time on the recording at which the agenda item was initiated. Links to the audio recordings are annotated by agenda item and may also be accessed at <http://www.pcouncil.org/council-operations/council-meetings/past-meetings/>.

c. **Council Action: Adopt Final Methodology changes and Consider Preliminary Test Fishing Proposals** [[mp3: 11-14-15am2](#) @ 1:16:32]

Motion: Adopt the two model algorithm changes proposed for the Chinook FRAM— apportioning sublegal encounters among stocks and age classes and derivation of growth functions—as recommended by the Scientific and Statistical Committee for use once the new base period goes into effect for management.

Joseph Oatman/Kyle Adicks (Motion carried unanimously)

Staff Summary: The Council was encouraged by work done on the new base period for the Chinook Fishery Regulation Evaluation Model (FRAM) and approved new algorithms for addressing growth and sublegal encounters, but did not approve other FRAM updates that result in moving to a new base period. Additional co-manager review and validation of the new base period is expected to occur over the winter and the Council anticipates receiving a letter from the co-managers by February 1, 2016 regarding their findings. Due to limited supporting data and in keeping with the recommendations of the Scientific and Statistical Committee and Salmon Technical Team, the Council did not adopt new management lines at Pt. Sur or Pt. Reyes. The Council also received a proposal for an industry-sponsored test fishery in the California Klamath Management Zone and recommended that the proponents of the test fishery coordinate with the National Marine Fisheries Service- (NMFS) proposed genetic stock identification sampling in this area and provide a revised proposal for detailed review at the March 2016 Council meeting.

c. **Council Action: Adopt a 2016 Preseason Management Schedule and Consider Sacramento River Winter Chinook Workgroup Membership and Schedule** [[mp3: 11-14-15am3](#) @ 0:21:20]

Motion: None

Staff Summary: The Council adopted the tentative 2016 salmon management schedule ([Agenda Item D.3, Attachment 1](#)) including plans for public hearings in Westport, Washington and Coos Bay, Oregon on March 28 and Fort Bragg, California on March 29. Additionally, the Council confirmed a schedule and approved membership for an ad hoc Sacramento River Winter Chinook

Workgroup to develop and analyze alternative control rules for this stock. The Council and NMFS are striving to complete the review of Sacramento River winter Chinook incidental harvest policy in time for application for the 2017 salmon management process, but recognize that the schedule is aggressive and relies on a compressed timeframe with a substantial workload.

c. Council Discussion [[mp3: 11-15-15am3](#)@ 0:00:15]

Motion: None

Staff Summary: The Council reiterated its recommendation to NMFS to issue an exempted fishing permit (EFP) to test the use of modified large mesh drift gillnet (DGN) gear for fishing by two boats inside the Pacific Leatherback Conservation Area (PLCA), with fishing triggered at times and areas by favorable oceanographic conditions—for example, when jellyfish (and theoretically sea turtle) abundance has greatly diminished and swordfish abundance is high. The EFP will test generally whether “eco-set triggered fishing” can result in substantially higher swordfish catch and far less bycatch. The Council confirmed it is their intent that if this initial small-scale testing proved successful, it would lead to a subsequent EFP with more vessels in order to gather a higher volume of scientific data. If innovations tested by this and subsequent EFPs prove successful in reliably demonstrating superior target catch and lower bycatch than the current full fleet DGN fishery, this should lead to allowing DGN vessels to access all or portions of the PLCA at times when swordfish catch rates are higher and protected species bycatch is lower. The Council also stated the expectation that any future fishery that includes all or portions of the PLCA would operate under protected species hard caps like those adopted by the Council in September 2015. In consideration of NMFS’ heightened focus on leatherback turtles, the Council directed further work on estimating the global benefits to leatherback turtles that could be provided by a significantly better performing DGN fishery replacing foreign-caught swordfish in the U.S. marketplace.

The Council also recognized the promise of deep-set buoy gear (DSBG) to be an economically viable low/no bycatch gear for catching swordfish. For that reason, the Council expressed its interest to move forward rapidly to authorize DSBG under the Highly Migratory Species Fishery Management Plan while considering the need for a permitting regime to regulate use of this gear.

Initiating a Council process to authorize shallow-set longline gear outside the Exclusive Economic Zone was given lower priority, but still judged to be important in recognition that Hawaii-permitted shallow-set longline vessels are currently landing significant amounts of swordfish on the West Coast.

d. **Council Action: Discuss Workshop Report and Provide Guidance as Appropriate** [[mp3: 11-15-15pm2](#)@ 0:00:11]

Motion: None

Staff Summary: The Council considered the report on the August 2015 Pacific Sardine Distribution Workshop, which reviewed several potential alternatives to the current distribution term in the Pacific sardine harvest control rule. While there are potential alternative approaches to determining the average long-term distribution of the northern subpopulation of Pacific sardine that could be explored further, the Council accepted the conclusion that no currently-available alternative is superior to the existing distribution term and did not schedule further consideration of changing the distribution term at this time. However, the Council did task Council staff with recommending better coastwide stock abundance research and estimation cooperation at the upcoming Tri-National Sardine Forum and promoting the display of the kind of variable “decision tables” currently presented for whiting abundance forecasts, as an element in the next sardine stock assessment.

c. Council Action: Discuss Issues and Provide Guidance as Appropriate [\[mp3: 11-16-15am1@ 0:02:08\]](#)

Motion: None

Staff Summary: The Council requested the Southwest Fisheries Science Center (SWFSC) finalize their initial planning to conduct a stock assessment of northern anchovy in time to be presented at the November 2016 Council meeting, including plans to convene a scientific workshop to be held in Spring 2016 designed to develop the optimum approach for this stock assessment. The Council requested participation in the spring workshop include members from the Scientific and Statistical Committee (SSC), Coastal Pelagic Species Management Team (CPSMT), and Coastal Pelagic Species Advisory Subpanel, and possibly Council members.

The Council also asked the CPSMT to explore alternative management and policy approaches, and report back to the Council in Fall 2016. The Council also tasked Council staff with placing consideration of moving to more active management of anchovy fishing seasons on a future Council meeting agenda.

c. Council Action: Consider Methodology Topics for Review and Provide Additional Guidance as Necessary [[mp3: 11-16-15am2](#)@ 0:39:39]

Motion: None

Staff Summary: The Council considered two proposals for methodology reviews in 2016: the California Department of Fish and Wildlife (CDFW) Southern California Aerial Survey, and the SWFSC acoustic-trawl survey. Based on SSC recommendations, the Council determined that the proposed sampling approaches of the CDFW aerial survey for coastal pelagic species would need to be improved prior to a formal methodology review. The SWFSC did not feel a methodology of the past SAKE acoustic-trawl survey methodology was appropriate at this time, given various critical changes being implemented in the 2016 spring and summer surveys. This methodology review could happen in the 2017 cycle.

Motion as amended carried unanimously

Motion: Council to preliminarily approve and forward [Agenda Item I.2, Attachment 1](#) for further review at the June 2016 Council meeting.

Jeff Feldner/Maggie Sommer

Amendment 1: The preliminary approval is conditioned on the applicants modifying the proposal such that the area off the WA coast would be limited to those waters westward of a line approximating the 75 fathom depth contour.

Phil Anderson/Joanna Grebel (Amendment 1 carried unanimously).

Motion, as amended, carried (Ms. Culver, Mr. Wolford and Ms. Grebel voted no).

Motion: Council to preliminarily approve the application for an EFP for Commercial/midwater hood-and-line rockfish fishing in the Rockfish Conservation Area off Oregon ([Agenda Item I.2, Attachment 4](#)) and forward further review at the June 2016 Council meeting, with the following requests to the applicant:

1. Provide information on the minimum amount of fishing activity required to allow evaluation of the EFP's objectives,
2. Limit the alternative for number of fishing days to those resulting in yelloweye rockfish impacts of 0.2 mt or less,
3. Provide details on proposed arrangements for observer coverage, and
4. Work with NMFS to determine appropriate ESA Salmon bycatch thresholds.

Maggie Sommer/Jeff Feldner (Motion failed; Mr. Anderson, Ms. Culver, Mr. Brizendine, Ms. Grebel, Mr. Lincoln, Mr. Wolford, and Mr. Crabbe voted no).

Staff Summary: The Council approved for further consideration in the 2017-2018 management cycle the EFP proposed by The Nature Conservancy for testing lingcod selective pot gear, with the condition that activity be limited to those waters westward of a line approximating the 75 fathom depth contour. Additionally, it agreed with the NMFS recommendation to expand the number of vessels participating in the fixed gear electronic monitoring EFPs, but recommended a limit of no more than 20 additional vessels. Further, NMFS will consider extending the electronic monitoring EFPs past the 2015/2016 cycle and report back to the Council at a future meeting.

3. Adopt preliminary preferred alternatives for ACLs as described in Agenda Item I.4.a, Supplemental REVISED Attachment 2, Table 4, except:
 - a. For darkblotched and widow rockfish, maintain a range of ACLs as described in Agenda Item I.4.a, Supplemental REVISED Attachment 2, Table 5, for No Action and Alternative 1.
 - b. For canary rockfish, maintain a range of ACLs as displayed in Agenda Item I.4.a, Supplemental REVISED Attachment 2, Table 5, for No Action and Alternative 1, and include a new Alternative 2 that is 33 percent of the No Action ACL (566 mt in 2017 and 524 mt in 2018) for analysis.
4. Approve the models endorsed by the SSC for IFQ catch projection and bycatch of darkblotched rockfish in the at-sea whiting fishery with the SSC-recommended modifications, as described in Agenda Item I.4.a, Supplemental SSC Report.

Michele Culver/Rich Lincoln

Amendment 1: Add the following as 3c: For California scorpionfish, adopt the GAP Recommendation of 150 mt for both 2017/2018. Add an ACL alternative for black rockfish in California that is based on a constant catch scenario that maintains at least a 40 percent depletion level.

Joanna Grebel/David Crabbe (Amendment 1 carried unanimously).

(Motion, as amended, carried unanimously).

Staff Summary: The Council adopted final overfishing limits endorsed by the SSC (see [Agenda Item I.4.a, Supplemental SSC Report](#)); final acceptable biological catches and final annual catch limits (ACLs) for all stocks and complexes other than those for black rockfish in California, California scorpionfish, canary rockfish, darkblotched rockfish, and widow rockfish as depicted in [Agenda Item I.4, Supplemental REVISED Attachment 2](#); and decided a range of alternative ACLs for detailed analysis for black rockfish in California, California scorpionfish, canary rockfish, darkblotched rockfish, and widow rockfish. The Council is scheduled to adopt all remaining final 2017 and 2018 harvest specifications at their April 2016 meeting in Vancouver, Washington.

d. Council Action: Confirm or Revise Adopted Council Final Preferred Alternative for Whiting Fishery Electronic Monitoring and Deem Regulations for Implementing Council Final Action [mp3: 11-17-15pm1@ 1:37:37]

Motion: Council revise the Final Preferred Alternative by making the following changes (referring to Table 2-1 of page 16 of Agenda Item I.5, Attachment 1).

- Alternative 2 to 3: Logbooks to estimate discards for the use in electronic monitoring for audit. Audit initially be 100 percent, with the ability to modify the percentage based on performance in consultation with the Council.
- Under discard accounting: for Mothership, change to Option A
- Remove the options for discard species adjustment (Option B)
- Under video/data processing: remove the footnote under Option D

Dorothy Lowman/Michele Culver

Amendment 1: with regards to moving from alternative 2 to 3; use a Federal discard logbook. Marci Yaremko/David Crabbe (Amendment 1 was withdrawn with consent of the second, after substitute amendment was withdrawn).

Amendment 2 (as a substitute to Amendment 1): with regards to moving from alternative 2 to 3; use a Federal logbook for landings and discards. Dan Wolford/Buzz Brizendine (Amendment 2 was withdrawn with consent of the second). (Motion as originally stated carried unanimously).

Motion: Include in the Final Preferred Alternative, that copies of the discard logbook and state logbook would be required to be submitted to Pacific States Marine Fisheries Commission and postmarked within 24 hours of landing. Phil Anderson/Michele Culver (motion carried unanimously)

Staff Summary: The Council made the following changes to the final preferred alternative for electronic monitoring for the whiting fishery as described in Table 2-1 of [Agenda Item I.5, Attachment 1](#):

- The Council's preferred alternative is now Alternative 3. Rather than Alternative 2, which requires video recording as the data source to replace data collected by human observers, logbooks would be required, with video recordings used to audit the accuracy of logbooks; the Council adopted 100 percent auditing to be required until changed.
- The Council confirmed their preferred option that a third party provider would conduct video reviews and that the industry would be responsible for paying for the review. The payment responsibility provision is a change from the prior policy that directed NMFS (or their agent) to conduct and pay for video reviews until a third party provider certification process was established in regulation.
- The Council removed the Discard Species List Adjustment option because the whiting fishery will be a maximized retention fishery whereby no discard would be allowed. This negates the need for an allowable discard species list and a Council mechanism to adjust the list in the future. Should this option be needed in the future, the Council will revisit the issue,
- The Council also required that discard logbooks and state logbooks be postmarked and submitted to Pacific States Marine Fisheries Commission within 24 hours of landing.
- Under discard accounting for the mothership fishery, the Council revised their preferred Discard Accounting from Option D (Deduct "unintentional minor" Discards Preseason) to Option A (Estimate Discard with EM and Count against IFQ).
- No regulations were finalized via the deeming process at this Council meeting.

During the Workload and Future Meeting Planning agenda item, the Council scheduled final deeming of detailed Code of Federal Regulations- (CFR) style whiting fishery regulations for the April 2016 Council meeting. The Council also adjusted the schedule for reaching finality on fixed gear electronic monitoring (EM) regulations and bottom trawl EM regulations by (1) scheduling an EFP results update for the March 2016 Council meeting to cover both remaining sectors, (2) scheduling deeming of CFR-style fixed gear regulations for the April 2016 Council meeting, and (3) scheduling the next consideration of bottom trawl EM regulations for the November 2016 Council meeting.

Motion: Council to adopt Alternative 1 as the Final Preferred Alternative for Blackgill rockfish and slope rockfish south of 40° 10' N. latitude.

Joanna Grebel/Buzz Brizendine (Motion carried; Mr. Wolford, Mr. Feldner, Mr. Crabbe, Ms. Sommer, and Mr. Lincoln voted no; Mr. Lockhart abstained.)

Staff Summary: The Council took final action to remove blackgill rockfish from the Slope Rockfish complex south of 40° 10' N. latitude and reallocate blackgill rockfish and the remaining species in the southern Slope Rockfish complex to trawl and non-trawl sectors according to the sharing described in [Agenda Item I.6, Attachment 1](#), Alternative 1. Phil Anderson/Rich Lincoln

Amendment 1: Specify that we are talking about the stock assessment planning process for groundfish only.

Marci Yaremko/David Crabbe (Amendment 1 carried unanimously).

Motion, as amended, carried unanimously.

Staff Summary: The Council adopted a new stock assessment prioritization planning process to inform decisions on groundfish stock assessments to be conducted in 2017 to inform management decisions for fisheries in 2019 and beyond. The Council is scheduled to use this new process when deciding groundfish stock assessment priorities for 2017 assessments at the April and June meetings next year.

Motion: Council adopt status quo set-asides except for the new request for 200 mt of widow as reflected in Agenda Item I.9.a, Supplemental Tribal Report and the preliminary 2017-2018 treaty tribal management measures shown in Agenda Item I.9.a, Supplemental Tribal Report 2 for analysis.

David Sones/Phil Anderson (Motion carried unanimously).

Motion: Council adopt the following:

- For blackgill rockfish south of 40° 10' N. latitude, adopt 2017-2018 ACLs identified in Agenda Item I.4, Supplemental REVISED Attachment 2 (120.2 mt and 123.0 mt, respectively) and resulting slope rockfish complex annual catch limits (ACLs) with blackgill removed.
- Adopt the following for #1-9, 11-13, 16 as follows in Supplemental GMT Report 5. If no change is mentioned, apply status quo.
 - #1 - Big skate – alternative 1; option 1 and option 2 for management measures
 - #2 – Starry Flounder - manage within other flatfish complex
 - #4 - Off the top deductions -
 - i. research = adopt 2016 values except for canary =7.2 mt, petrale = 17.7 mt; [Table 1, Supplemental GMT Report 3]
 - ii. incidental open access (OA) = adopt 2016 values except adopt maximum catch approach for darkblotched, Pacific ocean perch, and petrale sole [Table 3, Supplemental GMT Report 3]
 - #5 - ACTs
 - i. cowcod = 4 mt annual catch target (research catches come off annual catch limit) *status quo*;
 - ii. CA scorpionfish = 111 mt for 2017/2018
 - #7 - Allocations (trawl/non trawl)
 - i. OFS: use Sept 2015 scorecard as the starting point, in addition add GAP recommendations for bocaccio and canary rockfish; add GMT option for canary rockfish based on 1990-1999 (Table 4, Supplemental GMT Report 3)
 - ii. Big Skate: Alternative 1 (95:5)
 - #8 - Whiting At-Sea Set-asides: Adopt values in Table 8 (Supplemental GMT Report 3)
 - #9 - Non-Trawl harvest guideline
 - i. MNSRF N - in addition to status quo add (1) an alternative which is based on species contributions based on state boundaries in stock assessments, for those stocks with no stock assessment boundaries, divide equally among states; and (2) an alternative which is based on species contributions based on state boundaries in stock assessment, for those stocks with no stock assessment boundaries, divide based on status quo proportions
 - #12 Non-nearshore Trip limits

- i. Blackgill - to facilitate trip limit modeling, add 70 percent limited entry (LE) and 30 percent OA in addition to status quo
- ii. Sablefish - to facilitate trip limit modeling, add 75 percent LE and 25 percent OA in addition to status quo
- o #13/16 CA Nearshore and Recreational - include CDFW commercial nearshore and recreational management measures identified in September 2015.

Joanna Grebel/Michele Culver

Amendment 1: Include the sector-specific range of allocations expressed in Table 4 of Agenda Item I.9.a, Supplemental GMT Report 3.

Michele Culver/Joanna Grebel (Amendment 1 carried unanimously).

Amendment 2: Replace Alternative #1 with Alternative 2 for big skate; retain options 1 and 2 in the main motion.

Maggie Sommer/Jeff Feldner (Amendment 2 failed unanimously).

(Motion, as amended, carried unanimously).

Motion: Council adopt the following range of alternatives for the Washington recreational fishery for analysis:

- o Recreational Groundfish Bag Limits and Sub-limits
 - o Status quo: Aggregate bag limit of 12 groundfish which includes a sub-limit of 10 rockfish, 2 lingcod, and 2 cabezon in Marine Areas 1-3, and 1 cabezon in Marine Area 4.
 - o Alt. 1: 8 rockfish with status quo lingcod and cabezon sub-limits
 - o Alt. 2: 7 rockfish including up to 1 canary rockfish with status quo lingcod and cabezon sub-limits
- o Recreational Season Dates
 - o Status quo: Open recreational groundfish fishing year-round
 - o Alt. 1: Open recreational groundfish in Marine Areas 1 – 4 (excluding Marine Area 4B) March 15 through October 15 (Note: Even though the groundfish fishery dates would be modified, the status quo lingcod season dates would remain in effect for each Marine Area.)
- o Modify Recreational Deepwater Lingcod Closure
 - o Status quo: Fishing for, retention of, or possession of lingcod is prohibited seaward of a line connecting the following coordinates: 47°31.70' N. lat., 124°45.00' W. long. (Queets River) to 47°38.17' N. lat., 124°30.00' W. long. to 47°38.17' N. lat., 124°21.00' W. long. to 46°28.00' N. lat., 124°21.00' W. long. Year-round except as allowed in Washington Marine Area 2 on days open to the primary Pacific halibut fishery.
 - o Alt. 1: Consider revisions to the lingcod closure. WDFW intends to work with stakeholders over the winter to develop specific changes to the coordinates and will have a more detailed alternative specified and analyzed for April 2016.

Michele Culver/Rich Lincoln (motion carried unanimously).

Motion: Council adopt the following new management measures for further analysis for the 2017-2018 biennial specifications:

- o Retention of flatfish species outside of the seasonal depth restriction in the Oregon recreational fishery, as described in Agenda Item I.9.a, GMT Report.
- o In addition, we will be exploring removing the recreational kelp greenling length limit and routine management measures as described in Agenda Item I.9.a, GMT Report (November 2015).

Maggie Sommer/Jeff Feldner (motion carried unanimously).

Motion: Council adopt the “At-Sea Trawl Buyback Movement” proposal in Agenda Item I.9.a, GMT Report, November 2015, for further analysis for the 2017-2018 biennial specifications.

Maggie Sommer/Jeff Feldner

Amendment 1: Action be characterized as an interim approach and that the provision of this action would be subject to the five-year review of the Catch Sharing Plan, and that the analysis be limited to a five-year outlook.

Phil Anderson/Rich Lincoln (Amendment 1 carried unanimously).

(Motion, as amended, carried; Ms. Grebel and Mr. Lockhart abstained).

Staff Summary: The Council took final action to reclassify the big skate designation in the Fishery Management Plan from an ecosystem component species to a species actively managed in the fishery beginning in 2017. Big skate would be managed using stock-specific harvest specifications with cumulative landing limits and a sorting requirement.

Further, the Council provided guidance to facilitate analysis of the integrated alternatives, which combines the ACL alternatives and adjustments to routine management measures. The Council also forwarded several new management measures for analysis. The Council set a clear priority for the routine matters necessary to achieve a January 1 start of the fishery, and that analysis of new management measures are second-tier priorities, with an overriding priority that the aggregate of routine and accomplishable new management measures achieve the target of a January 1, 2017 fishery start.

Motion: Council adopt as the Preliminary Preferred Alternative measures in the Supplemental EC and GAP reports as captured in Agenda Item C.2.a; with the one modification provided by the EC that the open access non-groundfish trawl, identify alternative 1 for the pink shrimp, and for all other non-groundfish trawl alternatives 2, 3, and 4.

Gregg Casad/David Sones (Motion carried unanimously).

Staff Summary: The Council discussed the following management measures as discussed in [Agenda Item C.2, Attachment 1 - Vessel Movement Monitoring Public Scoping Document](#):

1. Monitoring Restricted Areas with Vessel Monitoring Systems (VMS)
2. Removal of Derelict Crab Pots from Rockfish Conservation Areas (RCAs)
3. Fishery Declaration Enhancements
4. Movement of Individual Fishing Quota (IFQ) Fishpot Gear Across Management Lines

The Council chose to remove for further consideration Management Measure 2, citing that the current state-managed derelict crab gear programs are adequate. The Council adopted the revised purposed and need statements and recommended preliminary preferred alternatives (PPAs) for Management Measures 1, 3, and 4 as presented in the [Agenda Item C.2.a, Supplemental Enforcement Consultants Report](#) and [Agenda Item C.2.a, Groundfish Advisory Subpanel Report](#) and are summarized as follows:

Management Measure 1 PPAs:

- For limited entry (LE) Groundfish, Open Access Non-Groundfish, LE Fixed Gear, Open Access Fixed Gear (non-IFQ), Open Access Non-Groundfish Trawl (except pink shrimp trawl):
 - Alternative 2 (Increase ping rate to 4 times per hour);
 - Alternative 3 (Maintain ping rate one per hour with Electronic Monitoring System on vessel); and
 - Alternative 4 (Allow use of enhanced VMS units (non-type approved).
- For pink shrimp trawl fishery: Alternative 1 (status quo of one ping per hour).
- For LE midwater trawl whiting: Alternative 1 (status quo of one ping per hour)
- For albacore vessels larger than 24 meters: Alternative 1 (status quo of one ping per hour).
- For drift gillnet fishery: Alternative 2 (Increase ping rate to 4 times per hour with a continuous transit requirement), but to conduct additional analysis of Alternatives 3 and 4.

Management Measure 3 PPAs:

During Gear Testing:

- Alternative 3 (Set up formal exemption process to allow only Shorebased IFQ vessels to be exempt from observer coverage for a trip that tests gear. The trip could be during an open or closed season.)
- The Council created a new Alternative 4, (containing the same provisions as Alternative 3 but for groundfish trawl vessels instead of shorebased IFQ vessels).

Whiting Fishery Declaration: Alternative 2 (allow midwater trawl vessels to change their whiting fishery declaration while at sea).

Management Measure 4 PPAs:

- Alternative 2 (allow IFQ fixed gear vessels to move pot gear from one management area to another management area during a single trip, then deploy the gear baited); and
- Alternative 3 (same as Alternative 2 but gear must be deployed non-baited).

Motion: Council adopt the following proposed changes to the Pacific Halibut Catch Sharing Plan for 2016, which are described in detail and accompanied by proposed Catch Sharing Plan language in Agenda Item J.1.a, Supplemental ODFW Report:

- For the Columbia River Subarea:
 - Status quo open 4 days per week (Thursday-Sunday)
- For the Oregon Central Coast Subarea

- Status quo Central Oregon Coast Subarea season structure:
 - 12 percent of the Central Coast Subarea allocation for the nearshore season, 63 percent for the spring all-depth season, and 25 percent for the summer all-depth season.
- Revise the Central Oregon Coast Subarea nearshore season opening date to June 1, with the season running 7 days per week until October 31, or the allocation is attained.
- For the Southern Oregon Subarea:
 - Allow retention of other species of flatfish, Pacific cod, and sablefish when halibut fishing in the Southern Oregon Subarea.

Maggie Sommers/Jeff Feldner (Motion carried unanimously).

Motion: Council adopt the following proposed changes to the Pacific Halibut Catch Sharing Plan for 2016, as described in detail and accompanied by proposed Catch Sharing Plan language in Agenda Item J.1.a, Supplemental WDFW Report:

- For the Washington North Coast Subarea
 - Revise the season opening date in the north coast subarea to be the first Saturday in May. The season structure would maintain the Thursday and Saturday opening during the second week in May and the management closure already in place during the third week in May.
- For the Washington South Coast Subarea
 - Maintain the status quo South Coast subarea season structure
- For the Columbia River Area
 - Maintain the status quo Columbia River subarea season structure

Corey Niles/Rich Lincoln (Motion carried unanimously).

Motion: Council adopt the changes to the Catch Sharing Plan and codified regulations as described in Agenda Item J.1.a, Supplemental NMFS Reports 2, select Alternative 2 from Supplemental NMFS report 3, as the Council Preliminary Preferred Alternative for modifying groundfish automatic action regulations and allow NMFS on this preliminary preferred alternative the flexibility to propose the automatic action changes to Groundfish regulations through whatever regulatory vehicle NMFS deems most appropriate.

Frank Lockhart/Corey Niles (Motion carried unanimously).

Motion: Council apply the status quo management approach used in 2015 for California management in 2016.

Marci Yaremko/Dan Wolford (Motion carried unanimously).

Staff Summary: The Council took final action on the 2016 CSP and regulations including the following: In Washington, the status quo measures will remain except that the season opening date in the north coast subarea will be the first Saturday in May ([Agenda Item J.1.a, WDFW Report, November 2015](#)). The season structure would maintain the Thursday and Saturday openings during the second week in May and the management closure already in place during the third week in May. In Oregon, status quo measures will continue except that the Central Oregon Coast Subarea nearshore season opening date will be June 1, with the season running 7 days per week until October 31, or until the allocation is attained ([Agenda Item J.1.a, Supplemental ODFW](#)

[Report, November 2015](#)). Further, retention of other species of flatfish, Pacific cod, and sablefish when halibut fishing in the Southern Oregon Subarea will be allowed. In California, the same approach used in 2015 to establish the recreational season structure and inseason management processes will be used in 2016 as described in [Agenda Item I.1.a, CDFW Report, September 2015](#). The Council also recommended minor corrections for the CSP and codified regulations proposed by NMFS ([Agenda Item J.1.a, Supplemental NMFS Report 2](#)).

Additionally, the Council selected a preliminary preferred alternative which would provide NMFS the automatic action authority to prohibit retention of halibut in the primary sablefish fishery north of Point Chehalis, Washington. The automatic action would occur upon posting of the notice by the International Pacific Halibut Commission on its website that the halibut quota for this fishery has been reached. Closures will also be announced on the NMFS halibut hotline. The Council is scheduled to take final action on this measure at the March 2016 Council meeting.
