a/ Net weight is defined in IPHC regulations as the weight of halibut that is without gills and entrails, head-off, washed, and without ice and slime. If a halibut is weighed with the head on or with ice and slime, the required conversion factors for calculating net weight are a 2 percent deduction for ice and slime and a 10 percent deduction for the head.

b/ 2015 values are considered preliminary until published by the IPHC in the Annual Report in the fall.

c/ The commercial sablefish incidental allocation comes from the Washington Sport allocation.

d/ Excludes the Columbia River allocation and commercial incidental sablefish allocation.

e/ Excludes the Columbia River allocation.

f/ The 2014 Central Oregon allocation in Table 1 (185,621 lbs.) contained the Southern Oregon allocation (3,712 pounds). The values in Table 3 contain only the Central Oregon allocation (i.e., 185,621 pounds less 3,712 = 181,909). Additionally, the 2014 Southern OR allocation in Table 1 (2,339 lbs.) was incorrect, the correct value is 3,712.
