Subject: Fukushima

To: pfmc.comments@noaa.gov

Why is America unaware there is an extinciton level event going on in the Pacific Ocean from Fukushima? Radiation is killing the wildlife in the Pacific Ocean. This is an outrage!! The fishing must be getting tough in the Pacific if even existent. If researched Fukushima for 5 years now. It is much much worse than Chernobyl and continues today. The ocean is dying from radiation! You will see the lost of most major species in the Pacific. It may be too late already and these fully melted reactors will pour highly radioactive water into the ocean for a 100 years. Its just beginning. Please help stop this extinction event.
