## INTRODUCTION

This document contains or identifies the various elements, documents, and sources comprising the complete and official record of Council meeting discussions and actions. In addition to the Meeting Summary, which follows this introductory section (see #7 below), it includes information or references that serve as the functional detailed minutes for this Council meeting as required by §302(i)(2)(E) of the Magnuson-Stevens Act. The full record is maintained at the Council office, is available on the Council website (<http://www.pcouncil.org/>) or upon request from the Council office, and consists of the following:

1. **Meeting Notice and Proposed Agenda** – These documents are available on the Council Website prior to and following each meeting at <http://www.pcouncil.org/>.
2. **Attendance Records** – These documents are available for the Council meeting and each advisory body meeting by request from the Council office.
3. **All Documents, Reports, and Presentations for Council Consideration** – These items include (1) all documents produced or received for the meeting briefing book, validated by a label assigned by the Council Secretariat and distributed to Council Members; (2) written public comments received at the Council meeting in accordance with agenda labeling requirements; and (3) electronic material or handout materials used in presentations to Council Members during the open session. They are available from links in the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
4. **Council Decisions Summary Document** – This document is distributed shortly after each Council meeting. It provides very brief descriptions of most key Council decisions and is available at <https://www.pcouncil.org/council-meetings/previous-meetings/> and also provided by agenda item in the Meeting Summary of this document.
5. **Draft or Final Decision Documents Finalized after the Council Meeting** – Documents such as Environmental Impact Statements or Environmental Assessments are available on the Council website as they are completed.
6. **Gavel-to-Gavel Audio Recordings** – These recordings contain the testimony, presentations, discussions, and actions occurring at the meeting and are labeled by date and time (e.g., 04-11-15am1) and have been annotated as to the time on the recording for the start of each agenda line item to help facilitate review. The recordings may be accessed from the links contained within the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
7. **Meeting Summary** (immediately follows this section) – The Meeting Summary lists, in agenda item order, the briefing book documents, reports, presentations, and Council motions and actions, including a brief summary from the Council Decisions Summary Document for each agenda item. It constitutes the meeting record formally approved by the Council. The agenda heading for each agenda item, and most listed documents, serve as internet links to the actual briefing book documents. Internet links in brackets (e.g., [[mp3: 11-11-14pm1 @01:21:15](#)]) refer to the audio recording and elapsed time on the recording at which the agenda item was initiated. Links to the audio recordings are annotated by agenda item and may also be accessed at <https://www.pcouncil.org/council-meetings/previous-meetings/>.

- c. **Council Action: Consider Issues Relevant to the Coordinated Ecosystem Indicator Review Initiative and Provide Guidance on Future Process and Schedule** [[mp3: 3-9-16pm1](#) 1:02:45]

**Motion:** None

**Staff Summary:** The Council reviewed progress to date and provided guidance on the schedule and timeline for the Initiative to refine and improve the ecosystem indicators presented in the Annual State of the California Current Ecosystem Report. The Council plans to finalize ecosystem indicators at its September 2016 meeting. Council advisory bodies were tasked with evaluating specific ecosystem indicators relevant to the four Fishery Management Plans (FMPs). Advisory bodies, particularly the Ecosystem Work Group, were also tasked with providing analyses about how ecosystem effects across the FMPs could be addressed in Council actions.

Over the long term, integrating ecosystem information into Council decisions could be facilitated by identifying focal topics that would be taken up in future years. The Council suggested that indicators relevant to setting annual management measures for the ocean salmon fishery would be a useful focal area. A second focal area would be to incorporate ecosystem considerations into the harvest management framework for sablefish. This recommendation comes in light of the fact that sablefish stock biomass has declined despite precautionary management measures.

**Motion:** Council adopt the following range of preliminary options for the ocean Treaty troll fishery for compilation and analysis by the Salmon Technical Team with the understanding that this is only the first step towards the finalizing options this week that will be adopted by the Council to be sent out for public review.

Treaty Troll Options:

Option I: 60,000 Chinook; 40,000 Coho

Option II: 42,500 Chinook; 13,750 Coho

Option III: 30,000 Chinook; 0 Coho

For Chinook: Option 1 to be modeled with 30,000 taken in the May/June Chinook-directed fishery and 30,000 would be taken in the July/August/September all-species fishery. Option II to be modeled with 21,250 taken in the May/June Chinook-directed fishery and 21,250 would be taken in the July/August/September all-species fishery. Option III to be modeled with 20,000 taken in the May/June Chinook-directed fishery and 10,000 would be taken in the July/August/September all-species fishery. Fishing during the July/August/September all-species fishery will be with plugs only.

Alternative I

- Modify the non-Indian TAC to 45,000 coho marked with a healed adipose fin clip.
- Add non-treaty commercial troll TAC of 7,200 coho with a healed adipose fin clip.

- For the troll fishery from the U.S./Canada border to Cape Falcon, May 1 through June 15, change to seven days per week, and modify the landing and possession limits to 60 Chinook per vessel per trip for the area from the U.S./Canada border to the Queets River, and to 75 Chinook per vessel per trip for the area between Leadbetter Point and Cape Falcon.
- For non-treaty troll from the Queets River to Cape Falcon, July 1 through September 20, coho retention allowed with a landing and possession limit of 15 coho per vessel per open period.
- Non-treaty recreational TAC of 37,800 coho with a healed adipose fin clip. Subarea quotas calculated via FMP. Coho retention allowed in all areas.
- For Recreational management alternatives, add to supplemental management information “Various daily limit and species combinations of 1 and 2 salmon will be considered, including “1 fish, 2 fish, 2 fish only one of which may be a Chinook, 2 fish only one of which may be a coho.”

#### Alternative II

- For the troll fishery from the U.S./Canada border to Cape Falcon, May 1 through June 30, change to 5 days per week (Friday through Tuesday), and modify the landing and possession limits to 40 Chinook per vessel per trip for the area from the U.S./Canada border to the Queets River, and to 50 Chinook per vessel per trip for the area between the Queets River and Cape Falcon.
- For the troll fishery from the U.S./Canada border to Cape Falcon, change open period end dates to August 31.
- Change the language for the July fishery to read “July 1-12 with a landing and possession limit of 50 Chinook per vessel for the open period, then open five days per week, Friday through Tuesday July 15-August 31 with a landing and possession limit of 50 Chinook per vessel per open period.”
- For the recreational fishery from the Queets River to Leadbetter Point, modify to five days per week.

C.2.d – North of Cape Falcon, beginning July 1, only 6 inch or larger plugs – change Alternative I to Alternative II

Kyle Adicks/Phil Anderson (Motion carried unanimously)

**Motion:** Council move to adopt for public review the alternatives for non-Indian commercial and recreational fisheries in the area North of Cape Falcon, the alternatives for commercial troll and recreational fisheries as presented in Agenda Item E.7.a, Supplemental STT Report (March 13, 2016) with the following modifications:

#### Page 4: Alternative I

All vessels fishing in this area must land and deliver all fish within this area or Port Orford, within 24 hours of any closure of this fishery, and prior to fishing outside of this area. State regulations require fishers landing from any quota managed season in this area to notify ODFW within one hour of delivery or prior transporting their catch to other locations after first landing in one of these ports notify ODFW prior to transport away from the port of landing by calling [541-867-0300](tel:541-867-0300) Ext. 252 or sending notification via e-mail to [KMZOR.trollreport@state.or.us](mailto:KMZOR.trollreport@state.or.us), with vessel name and number, number of salmon by species, location of delivery, and estimated time of delivery.

Chris Kern/Jeff Feldner (Motion carried unanimously)

**Motion:** Council move to adopt for public review the alternatives for non-Indian commercial and recreational fisheries in the area North of Cape Falcon, the alternatives for commercial troll and recreational fisheries as presented in Agenda Item E.7.a, Supplemental STT Report (March 13, 2016) with the following modifications:

In the commercial troll Alternative 2 on page 7 in the Monterey South cell replace June 1-10 with June 16-30.

Marci Yaremko/Dan Wolford (Motion carried unanimously)

**Motion:** Council move to adopt for the 2016 Treaty Ocean Troll salmon season, three alternatives for public review as they are presented in Table 3 of the Agenda Item E.7.a, Supplemental STT Report (March 13, 2016) on pages 20-21.

Option I quota levels of 50,000 Chinook, and 40,000 coho

Option II quota levels of 42,500 Chinook, and 13,750 coho

Option III quota levels of 30,000 Chinook, and 0 coho

The salmon season will consist of a May/June Chinook-directed fishery and a July/August/September all-species fishery. The Chinook harvest will be split between the two periods with the following sub-quotas:

Option I: 25,000; Option II: 21,250; Option III: 20,000 for the May/June Chinook-directed fishery and the remainder of Chinook in each alternative for the July/August/September all-species fishery, with Option III season to reflect July 1 through earlier of August 31, or 10,000 Chinook quota. Option III will be restricted to plugs 6 inches or larger only.

I would also like to state for the record, that the Tribes and State will continue the North of Falcon planning process and discussions in which the co-managers will evaluate the total impacts of all proposed fisheries on Puget Sound and Columbia River stocks.

Joe Oatman/Jeff Feldner (Motion carried unanimously)

**Staff Summary:** The Council adopted three Alternative sets of management measures for the 2016 ocean commercial, recreational, and tribal salmon fisheries. The detailed alternatives can be found on the Council web page at: [https://www.pcouncil.org/managed\\_fishery/salmon/](https://www.pcouncil.org/managed_fishery/salmon/).

Public hearings on the Alternatives have been scheduled in Westport, WA and Coos Bay, OR for March 28, and Fort Bragg, California for March 29. The Council is scheduled to adopt final 2016 ocean salmon regulations at its April 8-14, 2016 meeting in Vancouver, WA.

**c. Council Action: Consider Issues to be addressed in a Fishery Management Plan Amendment to Authorize Deep-Set Buoy Gear in West Coast Highly Migratory Species Fishery** [[mp3: 3-11-16pm1 0:46:58](#)]

**Motion:** Council to move forward with developing a range of alternatives to authorize a deep-set buoy gear (DSBG) fishery concurrent with continuing to collect information through exempted fishing permits (EFPs), with the following preliminary guidance to the HMS Management Team (HMSMT):

- a. In general, use the provisions included in the DSBG EFPs (i.e., two DSBG EFPs) and descriptions in the letter of acknowledgment (LOA) for the PIER research to guide development of alternatives and potential regulatory language.
- b. Purpose and Need – Use the description in the draft Swordfish Fishery Management and Monitoring Plan (September 2015) relative to the purpose and goals of this proposed action.
- c. Definition of Gear – Develop at least two alternatives: 1) DSBG as “traditionally” defined and referenced in two DSBG EFPs, and 2) both “traditional” DSBG and modified DSBG as described in PIER research proposal for LOA.
- d. “Actively Tended” Gear – Discuss and present alternatives for: 1) requiring gear be actively tended, 2) providing incentives to actively tend gear, and 3) limiting gear (e.g., 10 buoys) to promote active tending.

- e. Geographic Area – Intent is to initially limit the authorization of the gear to the area where it has been tested under one or more of the EFPs.
- f. Species Allowed – Define target species as defined in the EFPs, and prohibited species and incidental catch allowances as defined in the FMP for other HMS fisheries.

Address other topics not covered above that were raised by the National Marine Fisheries Service (Agenda Item F.3.a NMFS Report), California Department of Fish and Wildlife (Agenda Item F.3.a Supplemental CDFW Report), HMSMT Reports, and Enforcement Consultants (Agenda Item F.3.a Supplemental EC Report).

Michele Culver/Rich Lincoln

**Amendment:** Under Geographic Area (e), add that the intent is to initially limit the gear to federal waters off California.

Marci Yaremko/Buzz Brizendine (amendment carried unanimously)  
(Motion, as amended, carried unanimously)

**Staff Summary:** The Council directed the Highly Migratory Species Management Team (HMSMT) to begin developing ranges of alternatives for various aspects related to authorizing a deep-set buoy gear (DSBG) fishery. Development of program elements would occur concurrently with ongoing DSBG EFPs, which are likely to provide additional information relevant to authorizing the fishery. Ranges of alternatives would cover definitions for the gear and the requirement for gear to be actively tended, the geographic area where the fishery would be allowed to operate, identify target species and species that could not be retained or landed (prohibited species) other than those already in the HMS Fishery Management Plan, a licensing regime, and other elements identified in advisory body reports. The Council plans to review and potentially adopt a range of alternatives at its September 2016 meeting.

**Motion:** None

**Staff Summary:** The Council discussed three topic areas of international HMS management.

North Pacific Albacore Management Strategy Evaluation (MSE): The Council endorsed the HMSMT and HMS Advisory Subpanel proposal to schedule a webinar in advance of the May 24-25 MSE workshop to provide guidance to Council representatives to the workshop.

U.S./Canada Albacore Treaty: The current fishing regime under the Treaty expires at the end of the 2016 fishing season. The Council thanked the State Department for its intent to convene a U.S. delegation meeting in the near future to review all current relevant data produced by both the Joint Data Working Group and independent NMFS analysis, and urged the State Department to convene a similar meeting in the Fall to review information collected on the 2016 fishing season, diplomatic notes exchanged during the current fishing regime, and any relevant information from international efforts. The Council scheduled consideration of possible recommendations on a future fishing regime (or lack thereof) at its November 2016 meeting.

90th Meeting of the Inter-American Tropical Tuna Commission: The Council did not make any specific recommendations for U.S. positions at the meeting, which overlaps the June Council meeting.

Frank Lockhart/Rich Lincoln (Amendment carried unanimously)

Motion (as amended) carried unanimously

**Staff Summary:** The Council forwarded the 2017-2018 commercial jig fishing EFP application for public review and possible final adoption at its June 2016 meeting with the following modifications: (1) include monitoring options of (a) 30 percent observer coverage, (b) 100 percent observer coverage; and (c) 30 percent observer coverage augmented by Electronic Monitoring (specific monitoring option to be specified at the time of final Council action); (2) extend the southern boundary for the EFP to Point Conception; (3) add up to three additional vessels to the EFP. The Council adopted set-asides as specified in 2015-16 and reduced the Oregon Department of Fish and Wildlife research set aside for yelloweye by the amount needed for this EFP (0.03 mt).

c. **Council Action: Adopt Recommendations for Adjustments Including Carryover to 2016 Groundfish Fisheries, as Necessary** [[mp3: 3-13-16am2 0:35:52](#)]

**Motion:** Council adopt the recommendations in Supplemental GAP Report, and GMT Reports 1 and 2 on the Limited Entry North of 36 DTL fishery trip limit and on the decision to issue surplus carryover.

Corey Niles/Rich Lincoln (Motion carried unanimously)

**Staff Summary:** The Council adopted landing limits for the limited entry sablefish daily trip limit fishery north of 36° N. latitude of 1,125 pounds per week and 3,375 pounds per bimonthly period. This change would be more efficient for vessels, as three full weekly limits would equate to one bimonthly trip limit (i.e. 1,125 lbs x 3 weeks = 3,375 lbs), and would help ensure that the fishery, which saw increased effort last year, remains within its landing target.

The Council recommended that NMFS issue surplus carryover for all non-whiting individual fishing quota species where the annual catch limit (ACL) is less than the acceptable biological catch (ABC), including sablefish north of 36° N. latitude and canary rockfish. Surplus carryover for petrale sole is not eligible under the current NMFS policy given that the ACL is equal to the ABC. The Council recommended NMFS issue eligible carryover pounds up to the point where the ACL plus surplus carryover equals the ABC.

**Motion:** Council adopt a final Purpose and Need Statement and select Alternative 1 for the final preferred alternative, as specified in the Draft Environmental Assessment (Agenda Item G.5, Attachment 1).

Caren Braby/Jeff Feldner (Motion carried unanimously)

**Motion:** Council requested that gear type as it goes in regulation, that it be known as the “Holloway Gear.”

Dan Wolford/Caren Braby (Motion carried unanimously)

**Staff Summary:** The Council adopted Alternative 1, where midwater long-leader recreational groundfish fishing would be authorized seaward of a line approximating the 40 fm depth curve exclusively off the coast of Oregon from April-September to target abundant and healthy midwater species while avoiding or minimizing interactions with overfished rockfish species. The adopted gear configuration includes no more than one line with three hooks, a minimum of 30 feet between the sinker and the lowest hook, and a non-compressible float required above the hooks. Small plastic worms and flies are allowed along with weighted hooks; bait and large lures would be prohibited. Further, lingcod retention is prohibited. All other existing state and Federal groundfish regulations, such as bag limits, rockfish conservation areas, etc., would remain in effect. This alternative would be monitored with the existing Oregon Recreational Boat Survey program. At the April Council meeting, NMFS will provide an update on the timeline for implementation.

Joanna Grebel/ (motion failed due to lack of second).

**Staff Summary:** The Council clarified and reaffirmed the specifications of its September 2016 motion describing the range of alternatives to be evaluated, tasked the staff with assuring comprehensive recommendations from the Salmon Advisory Subpanel and the Groundfish Advisory Subpanel for Council consideration at the September 2016 Council meeting, and reaffirmed the schedule calling for adoption of a preliminary preferred alternative at the September 2016 Council meeting and a final preferred alternative at the November 2016 Council meeting.

d. **Council Action: Recommend Extensions for Exempted Fishing Permits Related to Electronic Monitoring in Groundfish Catch Share Fisheries** [[mp3: 3-14-16am1 0:50:59](#)]

**Motion:** Council extend the Electronic Monitoring Exempted Fishing Permits for groundfish catch share fisheries through 2018.

David Crabbe/Marci Yaremko (motion carried unanimously).

**Staff Summary:** The Council recommended that NMFS extend the expiration date of all electronic monitoring EFPs for the bottom trawl, non-whiting mid-water trawl, whiting mid-water trawl, and fixed gear catch share fisheries through 2018. However, the Council clarified their intent that the EFPs cease when fleetwide regulations are implemented; fleet-wide regulations for whiting midwater trawl fisheries and fixed gear fisheries are expected January 1, 2017, but fleet-wide regulations for bottom trawl and non-whiting mid-water trawl fisheries are not expected to be implemented January 1, 2017 under current scheduling. Based on the lack of fishery information for the bottom trawl and non-whiting mid-water trawl fisheries, the Council expects that EFP for these fisheries will be needed through December 31, 2018.

The Council is scheduled to verify their final preferred alternative for the fixed gear fishery, and deem the electronic monitoring regulations for fixed gear and the whiting mid-water trawl fisheries at its April 2016 meeting in Vancouver, WA.

**Motion:** Council approve the GAP recommendations (Agenda Item F.8.a. Supplemental GAP Report) as our final preferred alternative.

Herb Pollard/Pete Hassemer

**Amendment 1:** Remove issue G from the final preferred alternative and schedule consideration at a future Council meeting.

Frank Lockhart/Phil Anderson (amendment carried unanimously).

**Amendment 2:** Under Alternative F.3 we select sorting suboption A, in place of what is currently in the motion as suboption B.

Phil Anderson/Frank Lockhart (amendment carried unanimously).

(Motion, as amended, carried unanimously).

**Staff Summary:** The Council selected the final preferred alternatives recommended in the GAP report ([Agenda Item G.8.a, Supplemental GAP Report](#)) except with respect to the use of multiple gears on a trip (Issue F) and fishing in multiple individual fishing quota management areas (Issue G). For Issue F, the Council adopted the Groundfish Advisory Subpanel recommendation to allow vessels to carry and use multiple types of trawl gear on the same trip but recommended that the vessels be required to separate catch by gear type and that landings be recorded on separate electronic fish tickets by gear type (Sorting Suboption A). For Issue G, the Council did not select a final preferred alternative, but scheduled the issue for final consideration at the June 2016 meeting.

**Motion:** Council adopt for public review, the range of Pacific halibut restrictions for the salmon troll fishery from May 1, 2016 to December 31, 2016 and April 1-30, 2017 as shown in Agenda Item H.2.a, Supplemental SAS Report (March 2016).

Phil Anderson/Corey Niles (Motion carried unanimously)

**Motion:** Council set for the fixed gear tier fishery north of Point Chehalis, the halibut catch limit for the 2016 fishery at two fish plus 110 pounds of halibut per 1,000 pounds of sablefish onboard.

Phil Anderson/Corey Niles (Motion carried unanimously)

**Staff Summary:** The Council recommended that the current incidental Pacific halibut catch regulations for the non-Indian salmon troll fishery remain unchanged for the period April 1-30, 2016. The current limit is no more than one halibut per four Chinook, except one halibut may be possessed or landed without meeting the ratio requirement and no more than 12 halibut may be landed per trip. The Council also adopted the following options for public review.

Alternative 1 (Status Quo): May 1, 2016 through December 31, 2016 and April 1-30, 2017, license-holders may land no more than one Pacific halibut per each four Chinook, except one Pacific halibut may be landed without meeting the ratio requirement, and no more than 12 halibut landed per trip.

Alternative 2: May 1, 2016 through December 31, 2016 and April 1-30, 2017, license-holders may land no more than one Pacific halibut per each three Chinook, except one Pacific halibut may be landed without meeting the ratio requirement, and no more than 15 halibut landed per trip.

Alternative 3: May 1, 2016 through December 31, 2016 and April 1-30, 2017, license-holders may land no more than one Pacific halibut per each three Chinook, except one Pacific halibut may be landed without meeting the ratio requirement, and no more than 20 halibut landed per trip.

Final Council action is scheduled on the aforementioned limits at the April Council meeting.

The Council also recommended the fixed gear tier fishery north of Point Chehalis be set at two fish plus 110 pounds of halibut per 1,000 pounds dressed weight of sablefish.

Phil Anderson/Corey Niles (Motion carried unanimously)

**Staff Summary:** The Council recommended that NMFS have the automatic action authority to close retention of Pacific halibut in the limited entry fixed gear sablefish primary fishery upon posting of notice by the International Pacific Halibut Commission on its website that the Pacific halibut quota for this fishery has been reached and further retention is prohibited. Closures will also be announced on the NMFS halibut hotline.
