Subject: Current climate change impacts on pacific fisheries

To: pfmc.comments@noaa.gov

Hi NOAA,

I would love to see more information / publications on the effect climate change is having on pacific coast fisheries.

I have witnessed, anecdotally, a significant decline in marine mammals in the southwest, especially along the Los Angeles coast.

The average citizen has no understanding of what's happening. I believe NOAA should inform their understanding.

Thank you,

Thanks for listening.
