

GROUND FISH ESSENTIAL FISH HABITAT AND ROCK FISH CONSERVATION AREA
PROJECT TEAM REPORT ON FUTURE COUNCIL MEETING AGENDA AND
WORKLOAD PLANNING

The Essential Fish Habitat/Rockfish Conservation Area project team recommends moving selection of final preferred alternatives for Amendment 28 from March 2017 to at least June 2017, based on the need for additional analysis of alternatives, research into impacts on state-managed fisheries, and continued development of the analytical approach for socio-economics.
