

MODEL EVALUATION WORKGROUP REPORT ON SALMON METHODOLOGY
REVIEW PROCESS AND PRELIMINARY TOPIC SELECTION FOR 2017

The Model Evaluation Workgroup's (MEW) April list of items for Salmon Methodology Review include:

- Complete documentation on the development of the new Chinook Fishery Regulation Assessment Model (FRAM) base period.
- Review and update the FRAM documentation and User Manual that is currently on the Council website.

The MEW acknowledges that “documentation” is not by itself a task covered during the Salmon Methodology Review under the Council Operating Procedures. However, the MEW recommends this documentation task for the Methodology Review because of its importance and understanding of how FRAM works.
