INTRODUCTION

This document contains or identifies the various elements, documents, and sources comprising the complete and official record of Council meeting discussions and actions. In addition to the Meeting Summary, which follows this introductory section (see #7 below), it includes information or references that serve as the functional detailed minutes for this Council meeting as required by §302(i)(2)(E) of the Magnuson-Stevens Act. The full record is maintained at the Council office, is available on the Council website (<http://www.pcouncil.org/>) or upon request from the Council office, and consists of the following:

1. **Meeting Notice and Proposed Agenda** – These documents are available on the Council Website prior to and following each meeting at <http://www.pcouncil.org/>.
2. **Attendance Records** – These documents are available for the Council meeting and each advisory body meeting by request from the Council office.
3. **All Documents, Reports, and Presentations for Council Consideration** – These items include (1) all documents produced or received for the meeting briefing book, validated by a label assigned by the Council Secretariat and distributed to Council Members; (2) written public comments received at the Council meeting in accordance with agenda labeling requirements; and (3) electronic material or handout materials used in presentations to Council Members during the open session. They are available from links in the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
4. **Council Decisions Summary Document** – This document is distributed shortly after each Council meeting. It provides very brief descriptions of most key Council decisions and is available at <https://www.pcouncil.org/council-meetings/previous-meetings/> and also provided by agenda item in the Meeting Summary of this document.
5. **Draft or Final Decision Documents Finalized after the Council Meeting** – Documents such as Environmental Impact Statements or Environmental Assessments are available on the Council website as they are completed.
6. **Gavel-to-Gavel Audio Recordings** – These recordings contain the testimony, presentations, discussions, and actions occurring at the meeting and are labeled by date and time (e.g., 04-11-15am1) and have been annotated as to the time on the recording for the start of each agenda line item to help facilitate review. The recordings may be accessed from the links contained within the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
7. **Meeting Summary** (immediately follows this section) – The Meeting Summary lists, in agenda item order, the briefing book documents, reports, presentations, and Council motions and actions, including a brief summary from the Council Decisions Summary Document for each agenda item. It constitutes the meeting record formally approved by the Council. The agenda heading for each agenda item, and most listed documents, serve as internet links to the actual briefing book documents. Internet links in brackets (e.g., [[mp3: 11-11-14pm1 @01:21:15](#)]) refer to the audio recording and elapsed time on the recording at which the agenda item was initiated. Links to the audio recordings are annotated by agenda item and may also be accessed at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
8. **Voting Log** – The voting log lists, in Agenda order, the summarized Council motions and actions for each agenda item that took place during the meeting.

Amendment 1: Amend the proposed changes following the phrase that says "to minimize eelgrass impacts" add "while at the same time ensuring the objective that no net loss is met"

Rich Lincoln/Herb Pollard (amendment carried unanimously).

Amendment 2: Relating to page 3, 2nd paragraph relating to study of double-hung longlines; move to NOT adopt CDFW language amendment #5, modify the HC's language instead – strike all of the language from "such an experiment. . . (through the remainder of the paragraph) and add "Results of the study should be analyzed and used to inform future build-out."

Chris Kern/Rich Lincoln (amendment withdrawn with consent of the second).

Amendment 3: page 3, 2nd paragraph relating to study of double-hung longlines; move to NOT adopt CDFW language amendment #5, modify the HC's language instead. The sentence that ends "proposed methodology"...put a period after "study" and strike the remainder of the sentence. Strike all of the language from "such an experiment...(through the remainder of the

paragraph) and add “Results of the study should be analyzed and used to inform future build-out to 89.5 acres.”

Chris Kern/Rich Lincoln (amendment carried, Mr. Lockhart abstained).

Motion as amended carried, Mr. Lockhart abstained

Staff Summary: The Council directed staff to communicate with the Federal Energy Regulatory Commission and California Department of Water Resources to express Council concerns about thermal regulation at Oroville Dam, to ask for clarity on specific issues related to those concerns, and to invite representatives of the two agencies to present to the Council and/or Habitat Committee (HC) in June. The Council directed staff to work with California Department of Fish and Wildlife staff to identify those specific concerns. The Council may send a follow-up letter in the future.

In addition, the Council directed staff to send the HC’s [letter](#) to the U.S. Army Corps of Engineers on the Permit Renewal and Expansion on the Coast Seafoods project with edits outlined in the [Supplemental California Dept. of Fish and Wildlife Report](#) and further edited by the Council.

The Council also requested both an update from the HC and a draft letter commenting on the Environmental Protection Agency’s National Pollution Discharge Elimination System general permit for the June Briefing Book.

Motion 7 [[mp3: 4-8-17am2 1:51:51](#)]: Council modify and confirm our final preferred Alternative for Non-whiting Midwater and Bottom Trawl Fisheries Electronic Monitoring Regulations as described below. *Modifications from the FPA adopted in September 2014 are shown in italics.*

1. **Alternative 2** – Provide option to use Electronic Monitoring in lieu of Human Observers
2. **Data:** Sub-Option A2: Logbook data is used as the primary data source to debit vessel accounts and EM data is used to audit the validity of the logbook data.
3. **Level of Video Review:** Sub-Option B2. *The level of review should initially be 100 percent, but NMFS would have the ability, in consultation with the Council, to modify the percentage based on performance and the amount of review necessary to verify the accuracy of logbook information, and the performance of individual operators.*
4. **Discard Accounting:** Sub-Option C1: All discards would be debited from IFQ accounts
5. **Retention:** Sub-Option D2: Optimized retention - Vessel operators would be able to discard those species that can be differentiated on camera
6. **Halibut:** *new Sub-Option E8 developed by GEMPAC ([Agenda Item F.2.a, Supplemental GEMPAC Report](#)): Use a NMFS-approved discard mortality rate (DMR), developed in consultation with the Council, with the intent of finalizing halibut DMRs under EM by November 2017*
7. **Vessel Monitoring Plan Expiration:** *Sub-Option F1 (No Expiration): Vessel monitoring plans would be effective until revised.*
8. **Declaration of EM Use:** *Sub-Option G1: No limit on switching between EM and observers*
9. **Data Transfer Process:** Sub-Option H1: A representative of the vessel (vessel operator or crew) would be responsible for delivering the hard drive to the EM service provide *(Remove portion of Sept 2014 FPA that included Sub-Option H3)*
10. **Discard List Adjustments:** *Provide for NMFS, in consultation to the Council make adjustments to the Discard List. The Council's intent is to have a process that does not require rulemaking but provides as opportunity to Council consideration of anticipated adjustments prior to adjusting the discard list.*
11. **Video Review Provider:** *Maintain the current practice of having Pacific States perform video review responsibilities but develop protocols for transferring financial responsibility for the video review from NMFS to the industry to be implemented when NMFS can no longer cover these costs. If in the future, the Council decides to consider incorporating a more expansive 3rd party reviewer provision, this separate rule making would require fully articulated program design alternatives and cost information available to make an informed decision on whether moving to 3rd party providers or staying with a sole provider model best meets the goals and objectives of the program.*

With respect to 3. Video Review Level: Request that NMFS and Council staff work with the GEMPAC and GEMTAC, GMT as well as other appropriate Council advisory bodies to develop a process for reducing the level of video review to the minimum level necessary to audit logbooks to assure compliance and accurate data for NMFS and Council consideration and provide criteria for adjustments up or down relative to performance.

With respect to developing a NMFS approved DMR in consultation with the Council, request that the NMFS and Council staff take the recommendations contained in the [F.2.a, Supplemental GEMPAC Report](#) and [F.2.a, Supplement GMT Report](#) to finalize a schedule and analytical plan that will result at arriving at approved DMR no later than November 2017.

Dorothy Lowman/Maggie Sommer (motion carried, Mr. Lockhart abstained)

Motion 8 [mp3: 4-8-17am2 2:19:45]: Council approve the draft regulations as shown in [Agenda Items F.2.a, Supplemental NMFS Report 2](#) be revised to:

1. Reflect the changes in the FPA just adopted by the Council
2. Add the additional recommended revisions described on Page 3 of the [Agenda Item F.2.a, Supplemental GEMPAC Report](#)
3. Include the recommended changes described in [Agenda Item F.2.a, Supplemental CDFW Report](#)

Dorothy Lowman/David Crabbe (Motion carried, Mr. Lockhart abstained)

Staff Summary: The Council received an update on ongoing EFPs and modified several of the preferred alternatives they had adopted in September 2014 for the non-whiting midwater trawl and bottom trawl fisheries. A complete list of final alternatives is available on the Council website.

The Council also directed:

- NMFS, in consultation to the Council, to develop a process that does not require rulemaking to adjust the discard species list;
- NMFS to maintain the current practice of having Pacific States Marine Fisheries Commission (PSMFC) perform video review responsibilities, but develop protocols for transferring financial responsibility for the video review from NMFS to the industry. The Council would like NMFS to examine the feasibility of using a sole provider (PSMFC) model indefinitely;
- NMFS and Council staff work with the Groundfish Electronic Monitoring Policy Advisory Committee/Technical Advisory Committee, Groundfish Management Team (GMT), and other appropriate Council advisory bodies to develop a process for reducing the level of video review to the minimum level necessary to audit logbooks, and to develop new discard mortality rates for halibut when vessels use electronic monitoring (EM); and
- Revisions to the [draft regulations](#) to include:
 1. Changes in the final preferred alternatives adopted by the Council;
 2. A requirement for self-enforcing agreement groups to submit an annual report to the Council;
 3. Deep-sea sole, sanddabs, and starry flounder in the list of species that can be discarded. Deep-sea sole and sanddabs would be counted as individual fishing quota (IFQ) species, if mixed with IFQ species; and
 4. A provision to allow state-managed species to be landed when using EM, but prohibit sale or use of those fish, and include a landing limit of 150 pounds for California halibut.

Motion 9 [mp3: 4-8-17pm2 0:32:24]: Council approve and recommend the following for the Salmon Endangered Species Act Consultation:

Description of Fisheries

With regard to the scenario that best represents the future conditions in fisheries managed under the Pacific Coast Groundfish Fishery Management Plan (FMP), use Scenario 1A for the whiting fishery, and the distribution and bycatch rate assumptions in Scenario 2B(1) for bottom trawl, limited entry and open access fixed gear, non-whiting midwater trawl, and recreational fisheries, as updated by the Groundfish Management Team (GMT) in F.3.a, Supplemental GMT Reports 1 and 2.

Also, in recognition of the Council's ongoing process to consider revisions to groundfish essential fish habitat and rockfish conservation areas (RCAs), consider the preliminary preferred alternatives as the projected RCA configurations.

Estimated Harvest Levels

In determining the expected amounts of groundfish that would be harvested, include the following assumptions in the analysis:

1. The U.S. share of the Pacific whiting total allowable catch will be achieved and, for the purposes of the analysis, estimate that amount to be up to 500,000 mt in the future;
2. The at-sea trawl whiting groundfish allocations and set asides will be fully harvested by the at-sea sectors;
3. For the individual fishing quota (IFQ) fishery (i.e., shoreside whiting, bottom trawl, and midwater non-whiting trawl), allocations for the following species will be fully harvested: sablefish, petrale sole, lingcod, shortspine and longspine thornyheads, and overfished rockfish species (i.e., bocaccio, cowcod, darkblotched, and yelloweye rockfish, and Pacific ocean perch);

4. For the IFQ fishery, allocations for other groundfish stocks, for which it has harvested 75% or more of its allocations in 2014-2016, will be achieved;
5. For the IFQ fishery, the harvest levels in 2014-2016 for canary, widow, yellowtail, and chilipepper rockfish will be taken in the shoreside whiting and bottom trawl fisheries, and the balance of the IFQ allocations will be harvested in the midwater non-whiting trawl fishery;
6. For all other groundfish stocks, harvest levels for 2014-2016 for trawl fisheries will likely continue; and
7. Limited entry and open access fixed gear and recreational fishery allocations, harvest guidelines, and harvest levels will likely continue.

Chinook Management Thresholds for Analysis

For the Chinook management thresholds, assess the following:

- Whiting fishery: 11,000 Chinook guideline
- Bottom trawl, midwater non-whiting trawl, limited entry and open access fixed gear, and recreational fisheries: 5,500 Chinook guideline
- Bycatch Reserve: 3,500 Chinook

With regard to the Bycatch Reserve, this would not be an entitlement or *de facto* increase in the bycatch threshold, but rather a safety net to minimize disruption to the fishery where actions that were already actively being taken to reduce bycatch were insufficient.

In the analysis of the Reserve, analyze three scenarios such that entire Reserve is taken in the following fisheries in their status quo times and areas: 1) whiting, 2) bottom trawl, and 3) midwater non-whiting trawl. For each scenario, if it is determined that accessing the full amount of the Reserve may result in jeopardy then identify appropriate sub-thresholds, as needed, for each of these sectors.

Future Management Measures

Taking the results of the Reserve analysis described above into consideration, through the Biennial Groundfish Harvest Specifications and Management Process, the Council could consider maintaining the concept of a Reserve and limiting portions of the Reserve to specific sectors, or eliminating the Reserve.

For 2017, it is our understanding that the National Marine Fisheries Service (NMFS) plans to:

- Retain the selective flatfish trawl gear requirement shoreward of the RCA
- Provide a midwater non-whiting trawl fishery through an exempted fishing permit (EFP) that includes the following conditions:
- Fishing to occur north of the Oregon/California border (42° N. latitude) only
- EFP chinook bycatch cap of 3,500 chinook (which is a subset of the 5,500 Chinook management threshold described above)
- Upon projected attainment of the cap, NMFS would terminate the EFP (i.e., participating vessels would need to comply with the selective flatfish trawl gear requirement)

For 2018, the Council would recommend that NMFS consider the discussions, reports, and recommendations under this agenda item when considering issuance of a potential subsequent midwater non-whiting trawl EFP.

For 2019 and 2020, and beyond:

- Through the Biennial Groundfish Harvest Specifications and Management Process, the Council intends to develop and consider a range of alternatives for management measures to address the bycatch of salmon in groundfish fisheries. Such measures may include: sector-specific catch limits, bycatch thresholds, harvest guidelines, time and area closures,

and gear restrictions. These measures may be implemented preseason or inseason, and may be described as NMFS automatic actions or Council actions.

Michele Culver/Rich Lincoln

Amendment 1 [[mp3: 4-8-17pm2 1:17:21](#)]: Include “Agenda Item I.1.a, NMFS Report 1, March 2017) after the “GMT Reports 1 and 2” in the first paragraph.

Maggie Sommer/Joanna Grebel (Amendment carried unanimously).

Motion 9, as amended, carried; Mr. Lockhart abstained.

Staff Summary: The Council provided guidance to NMFS on the proposed action that will be the basis for ESA section 7 consultation on the take of listed salmonids in the Pacific Coast groundfish fishery. The recommendations include:

- A description of groundfish fisheries including the likely future distribution of fishing, range of directed catch volumes, and range of Chinook salmon bycatch rates, which can be used to estimate amount and stock composition of Chinook take.
- Chinook salmon bycatch thresholds of 11,000 for the whiting fishery, 5,500 for all other groundfish fisheries, and a 3,500 reserve to be used for additional bycatch in either of the two fisheries. The sum of these three thresholds, 20,000 Chinook, equals the sum of the bycatch thresholds specified in the current biological opinion.
- Considering additional bycatch mitigation measures as part of the 2019-2020 biennial harvest specifications and management measures process.

NMFS intends to request Council recommendations on a draft incidental take statement at the September 2017 meeting, prior to completing the biological opinion.

Motion: None

Staff Summary: Catch Share Program Review: Review document will be made available as early as possible to facilitate public review.

Intersector Allocation Review: The Council identified issues requiring additional information and proposed a process involving a public review draft adopted at the June Council meeting and final action taken in the fall. The Council directed that the next draft of the intersector allocation review document:

- address the recommendations in the [GMT report](#) and the [GAP report](#);
- include approaches for addressing the sablefish management line and related allocation issues;
- focus on set-asides in the non-trawl sectors for a select number of the species identified as trawl-dominant (i.e., darkblotched rockfish, Pacific ocean perch, petrale sole, and longspine thornyhead north of 40° 10' N. latitude);
- evaluate species that may be constraining the non-trawl fishery while not being fully attained in the trawl fishery (e.g., lingcod south of 40° 10' N. latitude); and,
- discontinue development of the yellowtail rockfish cap issue.

Cost Recovery: Council and NMFS staff will meet to discuss ways to address transparency concerns such as those raised by the [GAP report](#).

Motion: None

Staff Summary: The Groundfish Endangered Species Workgroup (Workgroup) reports to the Council biennially on estimated bycatch of Endangered Species Act- (ESA) listed marine mammals, sea turtles, eulachon, green sturgeon, and seabirds subject to a 2013 biological opinion on the continued operation of the Pacific Coast groundfish fishery. The Workgroup found that recent take of subject species did not warrant consideration of additional mitigation measures by the Council. The Workgroup noted that new biological opinions will be completed in 2017 for eulachon and short-tailed albatross. Based on the [Workgroup Report](#), the Council made the following recommendations:

- Conduct a risk analysis of humpback whale takes in the groundfish fixed gear fishery and work with the fleet to reduce the risk of such takes;
- GMT work with NMFS to better estimate eulachon take in the groundfish fishery;
- Complete the new seabird biological opinion and report to the Council at the June or September 2017 meeting to allow development of additional mitigation measures, as appropriate, through the 2019-2020 groundfish biennial harvest specifications and management measures process; and,
- Facilitate greater engagement by industry representatives in future Workgroup meetings.

- c. Council Action: Adopt Inseason Adjustments, as Necessary to Achieve, but Not Exceed, Annual Catch Limits, and Other Management Objectives [[mp3: 4-11-17am1 1:43:19](#)]**

Motion 18 [[mp3: 4-11-17am1 2:20:04](#)]: Council adopt the revised trip limits for the Open Access Fixed Gear Sablefish Fishery North of 36° N. Latitude as shown in [F.6.a, Supplemental GMT Report](#), Table 2, Alternative 1.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Motion 19 [[mp3: 4-11-17am1 2:29:15](#)]: Council to:

- Reallocate 3.5 mt of Pacific Ocean Perch from the Incidental Open Access off-the-top deduction to the MS whiting sector, and 3.5 mt to the CP sector.
- Request that the GMT develop potential alternatives for criteria for inseason distribution of the POP, darkblotched, and canary rockfish buffers, and present these to the Council in June.

Maggie Sommer/Dorothy Lowman (Motion carried, Mr. Duffy abstained)

Staff Summary: The Council recommended increasing the open access fixed gear trip limits for sablefish north of 36° N. latitude limits to 300 pounds per day, or one landing per week of up to 1,000 pounds, not to exceed 2,000 pounds per two months because effort and landings are tracking behind recent years.

Klamath Chinook salmon, a bycatch species in the groundfish trawl fisheries, will not meet escapement goals for 2017 by a historically large margin. The Council recommended the whiting fleet voluntarily move north to avoid Chinook salmon, recognizing there could be increased interactions with Pacific ocean perch (POP), especially given the historically high whiting quotas. Therefore, the Council also recommended that NMFS reallocate 3.5 mt of POP from the incidental open access off-the-top deduction to the mothership sector and 3.5 mt to the catcher-processor sector as soon as possible.

The Council also directed the GMT to develop alternatives for potentially distributing the POP, darkblotched, and canary rockfish buffers later in the year and report back at the June Council meeting in Spokane, Washington.

Herb Pollard/Peter Hassemer (Amendment carried, Ms. Yaremko abstained)

Motion 17 as amended carried unanimously.

Staff Summary: The Council directed its Enforcement Consultants and Groundfish Advisory Subpanel to meet together at the June Council meeting, discuss non-regulatory possibilities for resolving concerns about the 24-hour reporting requirement associated with electronic fish tickets, and report to the Council.

Motion 10 [[mp3: 4-9-17am3 0:02:56](#)]: The Council task the following:

1. The SSC review the current OFL method, including the basis for the estimates of B_{MSY} and MSY .
2. The SSC review, discuss and recommend alternate methods, if any, to estimate a long-term MSY for CSNA to add to the suite of options for the Council's consideration.
3. Following the ATM methodology review in January 2018, SSC evaluate the utility of ATM indices and the resulting abundance estimates to calculate a biomass estimate and an estimate of F_{MSY} for CSNA.
4. At the April 2018 meeting, SSC provide the results of items #1 and #2, and a report of their progress and expected timeline to complete item #3, to the Council.

Michele Culver/Rich Lincoln (Motion carried unanimously)

Staff Summary: The SSC will further review methods for developing an OFL for the central subpopulation of northern anchovy, evaluate the results of the January 2018 acoustic-trawl survey methodology review as it could apply to anchovy biomass and F_{msy} estimates, and report to the Council in April 2018.

Motion 12[[mp3: 4-10-17am1 0:32:57](#)]: Council confirm the PPA selected by the Council in November 2016 and described in [Agenda Item G.4.a, CPSMT Supplemental Report 3](#) (April 2017) as the Final Preferred Alternative to allow minor directed finfish CPS fishing to continue after a directed CPS fishery is closed, unless otherwise specified by the Council or an ACL is anticipated to be met or exceeded. No vessel or person may land more than one metric ton per day, and no vessel may make more than one trip per day.

Approve the language shown in [G.4.a, CPSMT Supplemental Report 3](#) as Amendment 16 to the CPS Fishery Management Plan, to allow such minor directed CPS fishing, except in Section 5.2 in the last sentence of the second paragraph, add “met or” between the existing phrases “after the ACL is” and “exceeded.”

Request that the CPSMT update the Council on any harvest of sardines that occurs under this authorization in the Sardine Harvest Guidelines and Management Measures agenda item in April, and report on harvest of other CPS finfish in the annual SAFE document.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Staff Summary: The Council adopted Coastal Pelagic Species (CPS) Fishery Management Plan Amendment 26 allowing for small-scale directed fishing on CPS finfish stocks that are otherwise closed to directed fishing. The amendment will allow for landings up to one metric ton per day, with a limit of one trip per day. The Coastal Pelagic Species Management Team will provide an update on the small-scale fishery at its April 2018 meeting.

d. Council Action: Adopt Pacific Sardine Assessment and Final Harvest Specifications and Management Measures for the 2017-2018 Sardine Fishery [[mp3: 4-10-17am2 0:38:13](#)]

Motion 13[\[\[mp3: 4-10-17am2 0:38:57\]\(#\)\]](#): Council:

1. Adopt the Pacific sardine assessment for use in management for the 2017-18 season as shown in [Agenda Item G.5.a, Stock Assessment Report](#);
2. Approve the values for biomass, OFL, P-star buffer, ABC, ACL as shown in Table 2 in [Agenda Item G.5.b, Supplemental CPSMT Report](#), noting that the harvest guideline is zero; and
3. Adopt the accountability measures outlined on page 2 of [Agenda Item G.5.b, Supplemental CPSMT Report](#).

Briana Brady/Maggie Sommer (Motion carried unanimously)

Staff Summary: The Council adopted the 2017 sardine [stock assessment report](#) and the following harvest specifications and management measures, as described in the [Supplemental CPSMT Report](#):

Biomass	86,586 mt
OFL	16,957 mt
P* buffer	0.4
ABC _{0.4}	15,479 mt
ACL	8,000 mt

They adopted the following automatic inseason actions for CPS fisheries:

- An incidental per-landing allowance of 40 percent Pacific sardine in non-treaty CPS fisheries until a total of 2,000 mt of Pacific sardine are landed.
- When the 2,000 mt is achieved, the incidental per-landing allowance would be reduced to 20 percent until a total of 5,000 mt of Pacific sardine have been landed.
- When 5,000 mt have been landed, the incidental per-landing allowance would be reduced to 10 percent for the remainder of the 2017-2018 fishing year.

The Council also adopted a 2 mt incidental per-landing allowance in non-CPS fisheries, and acknowledged a letter from the [Quinault Indian Nation](#) stating their intent to harvest up to 800 mt of sardine. Tribal landings would be accounted for within the ACL.

David Crabbe/Buzz Brizendine (Motion carried unanimously)

Motion 2: Council recommended edits be made to the Coast Seafood's letter as shown in [Agenda Item D.1.b, Supplemental CDFW Report](#), with the following edits:

1. In the CDFW edit #2, shown on page 2: make the following in italics "proponents' proposal to move *many* current activities"
2. Add "while at the same time ensuring the objective that no net loss is met" after the phrase "to minimize eelgrass impacts" and
3. Move to NOT adopt CDFW language amendment #5, modify the HC's language instead. The sentence that ends "proposed methodology" ...put a period after "study" and strike the remainder of the sentence. Strike all of the language from "such an experiment... (through the remainder of the paragraph) and add "Results of the study should be analyzed and used to inform future build-out to 89.5 acres."

Main motion: Marci Yaremko/David Crabbe and Lincoln/Pollard; Kern/Lincoln amendments; motion as amended carried, Mr. Lockhart abstained

Motion 3: Council tentatively adopt for STT collation and analysis the salmon management measures for the 2017 commercial and recreational fisheries in the area from Cape Falcon, Oregon north to the U.S./Canada border as presented in [Agenda Item E.3.e, Supplemental SAS Report](#), dated April 7, 2017.

Motion 4: Council tentatively adopt for STT collation and analysis the salmon management measures for the 2017 commercial and recreational ocean fisheries in the area from Cape Falcon to the Oregon/California border as presented in [Agenda Item E.3.e, Supplemental SAS Report](#), dated April 7, 2017 including the commercial and recreational requirements, definitions, restrictions, and exceptions.

Chris Kern/Jeff Feldner (motion carried unanimously)

Motion 5: Council approve for tentative adoption and analysis by the Salmon Technical Team the following two Treaty troll management options:

Option 1- A Chinook quota of: 40,000 and a coho quota of: 22,000

Option 2- A Chinook quota of: 40,000 and a coho quota of: 12,500

Both options would consist of a May/June Chinook only fishery and a July/August/September all species fishery. The Chinook will be split 20,000 in May/June and 20,000 in July/August/September for both options.

Joe Oatman/Kyle Adicks (Motion carried unanimously)

Motion 6: Council tentatively adopt for STT collation, analysis and public review the salmon management measures for the 2017 commercial and recreational ocean fisheries in the area from the Oregon/California border to the U.S./Mexico border as presented in [Agenda Item E.3.e, Supplemental SAS Report](#) dated April 7 2017, including the commercial and recreational requirements, definitions, restrictions, or exceptions.

Brett Kormos/Marc Gorelnik (Motion carried unanimously)

Motion 7: Council modify and confirm our final preferred Alternative for Non-whiting Midwater and Bottom Trawl Fisheries Electronic Monitoring Regulations as described below. *Modifications from the FPA adopted in September 2014 are shown in italics.*

1. **Alternative 2** – Provide option to use Electronic Monitoring in lieu of Human Observers
2. **Data:** Sub-Option A2: Logbook data is used as the primary data source to debit vessel accounts and EM data is used to audit the validity of the logbook data.
3. **Level of Video Review:** Sub-Option B2. *The level of review should initially be 100 percent, but NMFS would have the ability, in consultation with the Council, to modify the percentage based on performance and the amount of review necessary to verify the accuracy of logbook information, and the performance of individual operators.*
4. **Discard Accounting:** Sub-Option C1: All discards would be debited from IFQ accounts

5. **Retention:** Sub-Option D2: Optimized retention - Vessel operators would be able to discard those species that can be differentiated on camera
6. **Halibut:** new Sub-Option E8 developed by GEMPAC ([Agenda Item F.2.a, Supplemental GEMPAC report](#)): Use a NMFS-approved discard mortality rate (DMR), developed in consultation with the Council, with the intent of finalizing halibut DMRs under EM by November 2017
7. **Vessel Monitoring Plan Expiration:** Sub-Option F1 (No Expiration): Vessel monitoring plans would be effective until revised.
8. **Declaration of EM Use:** Sub-Option G1: No limit on switching between EM and observers
9. **Data Transfer Process:** Sub-Option H1: A representative of the vessel (vessel operator or crew) would be responsible for delivering the hard drive to the EM service provide (Remove portion of Sept 2014 FPA that included Sub-Option H3)
10. **Discard List Adjustments:** Provide for NMFS, in consultation to the Council make adjustments to the Discard List. The Council's intent is to have a process that does not require rulemaking but provides as opportunity to Council consideration of anticipated adjustments prior to adjusting the discard list.
11. **Video Review Provider:** Maintain the current practice of having Pacific States perform video review responsibilities but develop protocols for transferring financial responsibility for the video review from NMFS to the industry to be implemented when NMFS can no longer cover these costs. If in the future, the Council decides to consider incorporating a more expansive 3rd party reviewer provision, this separate rule making would require fully articulated program design alternatives and cost information available to make an informed decision on whether moving to 3rd party providers or staying with a sole provider model best meets the goals and objectives of the program.

With respect to 3. Video Review Level: Request that NMFS and Council staff work with the GEMPAC and GEMTAC, GMT as well as other appropriate Council advisory bodies to develop a process for reducing the level of video review to the minimum level necessary to audit logbooks to assure compliance and accurate data for NMFS and Council consideration and provide criteria for adjustments up or down relative to performance.

With respect to developing a NMFS approved DMR in consultation with the Council, request that the NMFS and Council staff take the recommendations contained in the [F.2.a, Supplemental GEMPAC Report](#) and [F.2.a, Supplemental GMT report](#) to finalize a schedule and analytical plan that will result at arriving at approved DMR no later than November 2017.

Dorothy Lowman/Maggie Sommer (Motion carried, Mr. Lockhart abstained)

Motion 8: Council approve the draft regulations as shown in [Agenda Item F.2.a, Supplemental NMFS Report 2](#) be revised to:

1. Reflect the changes in the FPA just adopted by the Council
2. Add the additional recommended revisions described on Page 3 of the [Supplemental GEMPAC Report \(Agenda Item F.2.a, April 2017\)](#)
3. Include the recommended changes described in [Supplemental CDFW report \(Agenda Item F.2.a, April 2017\)](#)

Dorothy Lowman/David Crabbe (Motion carried, Mr. Lockhart abstained)

Motion 9: Council approve and recommend the following for the Salmon Endangered Species Act Consultation:

Description of Fisheries

With regard to the scenario that best represents the future conditions in fisheries managed under the Pacific Coast Groundfish Fishery Management Plan (FMP), use Scenario 1A for the whiting fishery, and the distribution and bycatch rate assumptions in Scenario 2B(1) for bottom trawl, limited entry and open access fixed gear, non-whiting midwater trawl, and recreational fisheries, as updated by the Groundfish Management Team (GMT) in [F.3.a, Supplemental GMT Reports 1](#), [Agenda Item F.3.a, Supplemental GMT Report 2](#) and [Agenda Item I.1.a, NMFS Report, March 2017](#).

Also, in recognition of the Council's ongoing process to consider revisions to groundfish essential fish habitat and rockfish conservation areas (RCAs), consider the preliminary preferred alternatives as the projected RCA configurations.

Estimated Harvest Levels

In determining the expected amounts of groundfish that would be harvested, include the following assumptions in the analysis:

1. The U.S. share of the Pacific whiting total allowable catch will be achieved and, for the purposes of the analysis, estimate that amount to be up to 500,000 mt in the future;
2. The at-sea trawl whiting groundfish allocations and set-asides will be fully harvested by the at-sea sectors;
3. For the individual fishing quota (IFQ) fishery (i.e., shoreside whiting, bottom trawl, and midwater non-whiting trawl), allocations for the following species will be fully harvested: sablefish, petrale sole, lingcod, shortspine and longspine thornyheads, and overfished rockfish species (i.e., bocaccio, cowcod, darkblotched, and yelloweye rockfish, and Pacific ocean perch);
4. For the IFQ fishery, allocations for other groundfish stocks, for which it has harvested 75 percent or more of its allocations in 2014-2016, will be achieved;
5. For the IFQ fishery, the harvest levels in 2014-2016 for canary, widow, yellowtail, and chilipepper rockfish will be taken in the shoreside whiting and bottom trawl fisheries, and the balance of the IFQ allocations will be harvested in the midwater non-whiting trawl fishery;
6. For all other groundfish stocks, harvest levels for 2014-2016 for trawl fisheries will likely continue; and
7. Limited entry and open access fixed gear and recreational fishery allocations, harvest guidelines, and harvest levels will likely continue.

Chinook Management Thresholds for Analysis

For the chinook management thresholds, assess the following:

- Whiting fishery: 11,000 chinook guideline
- Bottom trawl, midwater non-whiting trawl, limited entry and open access fixed gear, and recreational fisheries: 5,500 chinook guideline
- Bycatch Reserve: 3,500 Chinook

With regard to the Bycatch Reserve, this would not be an entitlement or *de facto* increase in the bycatch threshold, but rather a safety net to minimize disruption to the fishery where actions that were already actively being taken to reduce bycatch were insufficient.

In the analysis of the Reserve, analyze three scenarios such that entire Reserve is taken in the following fisheries in their status quo times and areas: 1) whiting, 2) bottom trawl, and 3)

midwater non-whiting trawl. For each scenario, if it is determined that accessing the full amount of the Reserve may result in jeopardy then identify appropriate sub-thresholds, as needed, for each of these sectors.

Future Management Measures

Taking the results of the Reserve analysis described above into consideration, through the Biennial Groundfish Harvest Specifications and Management Process, the Council could consider maintaining the concept of a Reserve and limiting portions of the Reserve to specific sectors, or eliminating the Reserve.

For 2017, it is our understanding that the National Marine Fisheries Service (NMFS) plans to:

- Retain the selective flatfish trawl gear requirement shoreward of the RCA
- Provide a midwater non-whiting trawl fishery through an exempted fishing permit (EFP) that includes the following conditions:
 - Fishing to occur north of the Oregon/California border (42° N. latitude) only
 - EFP chinook bycatch cap of 3,500 chinook (which is a subset of the 5,500 Chinook management threshold described above)
 - Upon projected attainment of the cap, NMFS would terminate the EFP (i.e., participating vessels would need to comply with the selective flatfish trawl gear requirement)

For 2018, the Council would recommend that NMFS consider the discussions, reports, and recommendations under this agenda item when considering issuance of a potential subsequent midwater non-whiting trawl EFP.

For 2019 and 2020, and beyond:

Through the Biennial Groundfish Harvest Specifications and Management Process, the Council intends to develop and consider a range of alternatives for management measures to address the bycatch of salmon in groundfish fisheries. Such measures may include: sector-specific catch limits, bycatch thresholds, harvest guidelines, time and area closures, and gear restrictions. These measures may be implemented preseason or inseason, and may be described as NMFS automatic actions or Council actions.

Michele Culver/Rich Lincoln with Maggie Sommer/Joanna Grebel Amendment as amended carried, Mr. Lockhart abstained

Motion 10: The Council task the following:

1. The SSC review the current OFL method, including the basis for the estimates of B_{MSY} and MSY .
2. The SSC review, discuss and recommend alternate methods, if any, to estimate a long-term MSY for CSNA to add to the suite of options for the Council's consideration.
3. Following the ATM methodology review in January 2018, SSC evaluate the utility of ATM indices and the resulting abundance estimates to calculate a biomass estimate and an estimate of F_{MSY} for CSNA.
4. At the April 2018 meeting, SSC provide the results of items #1 and #2, and a report of their progress and expected timeline to complete item #3, to the Council.

Michele Culver/Rich Lincoln (Motion carried unanimously)

Motion 11: Council approve the SWFSC request for methodology review of the acoustic trawl survey method for assessing CPS ([Agenda Item G.3.a, SWFSC Report](#)); and include the recommendations by the SSC ([Agenda Item G.3.a, Supplemental SSC Report](#)).

Frank Lockhart/Briana Brady as amended by Michele Culver/Rich Lincoln carried unanimously)

Motion 12: Council confirm the PPA selected by the Council in November, 2016 and described in [Agenda Item G.4.a, CPSMT Report \(April 2017\)](#) as the Final Preferred Alternative to allow minor directed finfish CPS fishing to continue after a directed CPS fishery is closed, unless otherwise specified by the Council or an ACL is anticipated to be met or exceeded. No vessel or person may land more than one metric ton per day, and no vessel may make more than one trip per day.

Approve the language shown in [G.4.a, CPSMT Supplemental Report 3 \(April 2017\)](#) as Amendment 16 to the CPS Fishery Management Plan, to allow such minor directed CPS fishing, except in Section 5.2 in the last sentence of the second paragraph, add “met or” between the existing phrases “after the ACL is” and “exceeded”.

Request that the CPSMT update the Council on any harvest of sardines that occurs under this authorization in the Sardine Harvest Guidelines and Management Measures agenda item in April, and report on harvest of other CPS finfish in the annual SAFE document.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Motion 13: Council:

1. Adopt the Pacific sardine assessment for use in management for the 2017-18 season as shown in [Agenda Item G.5.a, Stock Assessment Report](#);
2. Approve the values for biomass, OFL, P-star buffer, ABC, ACL as shown in Table 2 in Agenda Item [G.5.b, Supplemental CPSMT Report](#), noting that the harvest guideline is zero; and
3. Adopt the accountability measures outlined on page 2 of [Agenda Item G.5.b, Supplemental CPSMT Report](#).

Briana Brady/Maggie Sommer (Motion carried unanimously)

Motion 14: Council adopt the final incidental Pacific halibut landing restrictions for the 2017-2018 non-Indian salmon troll fishery recommended by the SAS ([Agenda Item H.1.a, Supplemental SAS Report, April 2017](#)).

Maggie Sommer/Jeff Feldner (Motion carried unanimously)

Motion 15: Council adopt the GAP recommendations for public review, as shown in [Agenda Item F.7.a, Supplemental GAP Report](#).

Joanna Grebel/Marc Gorelnik (Motion withdrawn)

Motion 16: Council adopt the GAP recommendations for public review, as shown in [Agenda Item F.7.a, Supplemental GAP Report](#), utilizing the appropriate coordinates described in Table 1 of the [CDFW Report, Agenda Item F.7.a](#).

Joanna Grebel/Marc Gorelnik (Motion carried unanimously)

Motion 17: Council to not adopt a range of alternatives for public review, and do not pursue further development of regulatory alternatives at this time. Instead, request the EC and GAP make time to explore and discuss the viability of non-regulatory alternatives at the June meeting and report back to the Council.

Marci Yaremko/Buzz Brizendine as amended by Herb Pollard/Pete Hassemer; carried unanimously.

Motion 18: Council adopt the revised trip limits for the Open Access Fixed Gear Sablefish Fishery North of 36° N. Latitude as shown in [F.6.a Supplemental GMT Report \(April 2017\)](#), Table 2, Alternative 1.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Motion 19: Council to:

- Reallocate 3.5 mt of Pacific Ocean Perch from the Incidental Open Access off-the-top deduction to the MS whiting sector, and 3.5 mt to the CP sector.
- Request that the GMT develop potential alternatives for criteria for inseason distribution of the POP, darkblotched, and canary rockfish buffers, and present these to the Council in June.

Maggie Sommer/Dorothy Lowman (Motion carried, Mr. Duffy abstained)

Motion 20: Council tentatively adopt a natural escapement target of 5,130 for Queets wild coho in 2017.

Kyle Adicks/Phil Anderson (Motion carried unanimously)

Motion 21: Council to adopt for submission to the U.S. Secretary of Commerce the non-Indian commercial and recreational salmon management measures for the area north of Cape Falcon as presented in [Agenda Item E.5.a, Supplemental STT Report, April 11, 2017](#).

Kyle Adicks/Phil Anderson (Motion carried unanimously)

Motion 22: Council to adopt the management measures and quotas for the Treaty Troll Fishery south of the U.S./Canadian border to Cape Falcon, Oregon as shown in [Agenda Item E.5.a, Supplemental STT Report, dated April 11, 2017](#), table 3 including requirements, definitions, restrictions, or exceptions.

The Treaty Indian ocean troll fishery would have a quota of:

- 40,000 Chinook and
- 12,500 coho.

The overall chinook quota would be divided into a 20,000-Chinook sub-quota for the May 1 through June 30 Chinook only fishery and a 20,000-Chinook sub-quota for the all species fishery in the time period of July 1 through September 15.

Joe Oatman/Kyle Adicks (Motion carried unanimously)

Motion 23: Council to adopt the non-Indian commercial and recreational salmon management measures for submission to the U.S. Secretary of Commerce for the area from Cape Falcon, Oregon to the Oregon/California Border as described in [Agenda Item E.5.a Supplemental STT Report dated April 11, 2017](#) including all season descriptions; minimum size; and requirements, definitions, restrictions, or exceptions.

Chris Kern/Jeff Feldner (Motion carried unanimously)

Motion 24: Council to adopt the 2017 non-Indian commercial and recreational salmon management measures for submission to the U.S. Secretary of Commerce for the area from the Oregon/California border to the U.S./Mexico border as presented in [Agenda Item E.5.a,](#)

[Supplemental STT Report dated April 11, 2017](#), including the commercial and recreational requirements, definitions, restrictions, or exceptions, with the following change:

Commercial Fishery - Page 4 - In the area from Point Arena to Pigeon Point (San Francisco)

Strike the language: *During September, all fish must be landed south of Point Arena*

Replace with: *In September, all fish must be landed south of Point Arena until the quota in the Fort Bragg fishery is met and the fishery has closed for 24 hours.*

Brett Kormos/Mark Gorelnik (Motion carried unanimously)

Motion 25: Council adopt the changes and additions to the COPs for COP 1 and COP 20 as represented in [Agenda Item C.3, Attachment 1](#) and [Agenda Item C.3, Attachment 2](#).

Phil Anderson/Rich Lincoln (Motion carried unanimously)
