| ii) Estimate of fishing effor   | t:   |  |  |  |  |
| iii) Additional details:  |  |  |  |  |  |
| iii j Additiolidi detalis.  |  |  |  |  |  |
|   |  |  |  |  |  |

| <b>Data G</b><br>d how v                | <b>aps:</b> Which of the following data gaps are addressed by your Exempted Fishing Permit application vill they be addressed? (See Attachment B) Check all that apply:   |
|---|---|
|   | Bycatch & protected species interactions  |
|   | Having the indicator flag and staying within visual proximity of the DSBG, a quick response to the gear when a fish is hooked will be achieved. The 3 bouy high flag set up seems proper. Using a hydraulic gurdy similar to salmon fishing could decrease retrieval time of by catch and protected species. Circle hooks will limit damage to fish and decrease chances of a gut hook or injury to non target species.   |
| b) <b>√</b> A                           | Active gear tending   |
|   | By running no more than 10 set-ups, most likely 5 in my case to start till the kinks are worked out, no gear will be lost or out of sight, this would be my first time trying this style, so I would keep gear to a moderation to start. This give me a better chance to catch target species and release by catch quicker.   |
| c) 🗸 (                                  | Gear conflicts/number of vessels  |
| How?                                    | I would have no gear conflicts. I would solely use DSBG and only be using my vessel. I am not active in the swordfish industry right now, but I know through  |
| *************************************** | friends who are that the is minimal boat pressure in that area for swordfish. I don't foresee any issues with too many boats fishing.   |
| d) [7] [                                | DSBG time and area use  |
| How?                                    | I would primarily fish from July through November. I would target areas from behind Anacapa, Santa Cruz, and Santa Rosa Island.   |
| e) 🔽 G                                  | ear configuration   |
| How?                                    | The gear configuration seems to be appropriate and covers various water columns.  Attachment A fishing gear set up seems proper. Being flexible and learning from gear failures and catch zones will greatly increase knowledge and success of target species. I believe circle hooks are vital to decreasing injuring by catch.  without ever having fished this style, I will do what is suggested in Attachment A. I have researched several fishing styles and techniques from Texas and Florida where they primarily |
|   | fish swordfish deep water. They are very successful there and seems close to attachment A.  |
| · —                                     | oncurrent gear use  |
| How?<br>                                | I feel other fishing gear, IE harpoon or nets will make it difficult to properly fish DSBG at the same time from my personal boat. Other bigger boats may be able to do both, but I would stick to just fishing DSGB.   |

| 10) Reporting Requirements: Please answer questions   | s identified in application instructions.   |                |
|---|---|----------------|
| All reporting will be done within the requirements set u fisheries, and DFG.  |   |                |
| I believe this could shed new light into a relatively unkil<br>There is information from harpoons and nets, but that<br>Texas and Florida having been hook and line fishing values rates. | its just the upper water column. I know areas of  |                |
| A log book and landing reports will be done precise ar information, and records for the fishery. I think this is a  | nd accurate every trip to gain all knowledge,<br>a great opportunity.                                 |                |
| 11) Observer Coverage:  I acknowledge that observer coverage may be recoverify that I am willing and able to cover the cost of  | quired on up to 100% of my EFP fishing trips, and such coverage.                                      | i              |
| If you are unable to cover the entire cost of the obse<br>you may be able to cover and identify other sources<br>observer costs.  | rver coverage requirement, please explain what po<br>of funding which may be available to help you co | ortion<br>over |
| I don't know the exact price of an observer, but I sobserver. I believe the are grants that may help as   | hould be able to cover my portion of the sist with this as well.                                      |                |
