

**2019 AND 2020 GROUNDFISH HARVEST SPECIFICATIONS UNDER DEFAULT  
HARVEST CONTROL RULES**

**List of Tables**

Table 1. 2019 and 2020 OFLs (mt) and stock category designations for west coast groundfish stocks and stock complexes under default harvest control rules (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in status quo stock complexes in <i>italics</i> ). ....	2
Table 2. The range of alternative 2019 ABCs (mt) varied by the probability of overfishing (P*) for west coast groundfish stocks (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in status quo stock complexes in <i>italics</i> ).....	8
Table 3. The range of alternative 2020 ABCs (mt) varied by the probability of overfishing (P*) for west coast groundfish stocks (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in status quo stock complexes in <i>italics</i> ).....	12
Table 4. 2019 and 2020 harvest specifications (overfishing limits (OFLs in mt), acceptable biological catches (ABCs in mt), and annual catch limits (ACLs in mt)) under default harvest control rules for determining these specifications, for west coast groundfish stocks and stock complexes (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in stock complexes in <i>italics</i> ).....	16

**Table 1. 2019 and 2020 OFLs (mt) and stock category designations for west coast groundfish stocks and stock complexes under default harvest control rules (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in status quo stock complexes in *italics*).**

a/ A shortbelly rockfish assessment was done as an academic exercise in 2007 to understand the potential environmental determinants of fluctuations in the recruitment and abundance of an unexploited rockfish population in the California Current ecosystem (Field, et al. 2008). This assessment was not reviewed in a STAR Panel; however, the estimated MSY was used to determine the OFL.

**Table 2. The range of alternative 2019 ABCs (mt) varied by the probability of overfishing (P\*) for west coast groundfish stocks (overfished stocks in CAPS; stocks with new assessments in bold; component stocks in status quo stock complexes in *italics*).**
