b) Active gear tending vessel speed may allow for timely
How? checking of gear more than 3 miles apart

c) Gear conflicts/number of vessels

How? work with other vessels to insure
minimum conflict, as is done in other
long line and net fisheries. Work to possibly
establish legal distances from deployed gear

d) DSBG time and area use

How? Use standard gear following to warm thermocline
to the north in the spring and summer, and
back to the south in the fall. I would like to
use the three CCCs in So Cal, and the Albatross
North, due to sea keeping abilities and speed.

e) Gear configuration

How? There is always improvements in gear, all
changes to be logged and photographed. ~~Any~~ No
major changes.

f) Concurrent gear use

How? I would like to troll albacore while the
DSGB is deployed, but prioritizing the DSGB

10) Reporting Requirements: Please answer questions identified in application instructions.

It seems to be quite clear how and when reports must be made.

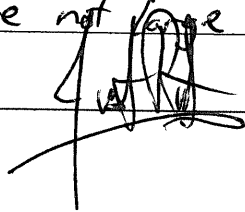

11) Observer Coverage:

I acknowledge that observer coverage may be required on up to 100% of my EFP fishing trips, and verify that I am willing and able to cover the cost of such coverage.

If you are unable to cover the entire cost of the observer coverage requirement, please explain what portion you may be able to cover and identify other sources of funding which may be available to help you cover observer costs.

Of course its expensive, and I would hope smaller vessels like mine might get some exemption, or use cameras, I have VMSS on both vessels. But at 36' & 40' these are not large boats, and income is concurrent.

many years fishing, want to do
this out, professional boats and crew.
I know this application came late,
but I will be at the Spokane
meeting with my brother, Josh Porter,
F/V Fearless II, we think this may
be a viable way to harvest these
fish with minimal bycatch, the
bane of most of our fisheries.

Thank you,
