INTRODUCTION

This document contains or identifies the various elements, documents, and sources comprising the complete and official record of Council meeting discussions and actions. In addition to the Meeting Summary, which follows this introductory section (see #7 below), it includes information or references that serve as the functional detailed minutes for this Council meeting as required by §302(i)(2)(E) of the Magnuson-Stevens Act. The full record is maintained at the Council office, is available on the Council website (<http://www.pcouncil.org/>) or upon request from the Council office, and consists of the following:

1. **Meeting Notice and Proposed Agenda** – These documents are available on the Council Website prior to and following each meeting at <http://www.pcouncil.org/>.
2. **Attendance Records** – These documents are available for the Council meeting and each advisory body meeting by request from the Council office.
3. **All Documents, Reports, and Presentations for Council Consideration** – These items include (1) all documents produced or received for the meeting briefing book, validated by a label assigned by the Council Secretariat and distributed to Council Members; (2) written public comments received at the Council meeting in accordance with agenda labeling requirements; and (3) electronic material or handout materials used in presentations to Council Members during the open session. They are available from links in the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
4. **Council Decisions Summary Document** – This document is distributed shortly after each Council meeting. It provides very brief descriptions of most key Council decisions and is available at <https://www.pcouncil.org/council-meetings/previous-meetings/> and also provided by agenda item in the Meeting Summary of this document.
5. **Draft or Final Decision Documents Finalized after the Council Meeting** – Documents such as Environmental Impact Statements or Environmental Assessments are available on the Council website as they are completed.
6. **Gavel-to-Gavel Audio Recordings** – These recordings contain the testimony, presentations, discussions, and actions occurring at the meeting and are labeled by date and time (e.g., 04-11-15am1) and have been annotated as to the time on the recording for the start of each agenda line item to help facilitate review. The recordings may be accessed from the links contained within the Meeting Summary of this document or at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
7. **Meeting Summary** (immediately follows this section) – The Meeting Summary lists, in agenda item order, the briefing book documents, reports, presentations, and Council motions and actions, including a brief summary from the Council Decisions Summary Document for each agenda item. It constitutes the meeting record formally approved by the Council. The agenda heading for each agenda item, and most listed documents, serve as internet links to the actual briefing book documents. Internet links in brackets (e.g., [[mp3: 11-11-14pm1 @01:21:15](#)]) refer to the audio recording and elapsed time on the recording at which the agenda item was initiated. Links to the audio recordings are annotated by agenda item and may also be accessed at <https://www.pcouncil.org/council-meetings/previous-meetings/>.
8. **Voting Log** – The voting log lists, in agenda order, the summarized Council motions and actions for each agenda item that took place during the meeting.

Caren Braby/Brad Pettinger (motion carried unanimously)

Staff Summary: The Council adopted a technical revision to the Marine Survival Index of the Oregon Coastal Natural coho harvest matrix, which reduced the number of life-cycle monitoring sites used to forecast marine survival from six to five due to Oregon Department of Fish and Wildlife budget reductions.

Brett Kormos/Buzz Brizendine (Motion carried, Dr. Peter Dygert abstained)

Staff Summary: The Council recommended National Marine Fisheries Service (NMFS) consider use of a new harvest control rule for Sacramento River winter Chinook as an Endangered Species Act consultation standard. The control rule restricts harvest rates south of Point Arena, California, and allowable rates decrease as forecast abundance decreases. The recommended control rule uses forecast abundance rather than past-year average to make it more responsive to current circumstances, and the allowable impact rate does not go to zero until abundance falls to zero. It is anticipated that the new consultation standard will be in place for 2018 ocean salmon fisheries. The Council recommended the new control rule be reviewed five years after implementation.

Staff Summary: The Council adopted the tentative [2018 salmon management schedule](#) including the tentative dates and sites for the public meetings. One exception was the California meeting site would likely not be in Fort Bragg, and would be moved to a more southern location, preferably along Highway 101 and potentially in the city of Salinas, California.

Motion 7 [[mp3: 11-16-17am1](#) 1:08:32]: Council adopt the recommendations for the 2018 Pacific Halibut Catch Sharing Plan as shown in Agenda Item E.1.a, WDFW Report 1, November 2017. Michele Culver/Phil Anderson (Motion carried unanimously)

Staff Summary: The Council adopted final changes to the 2018 Catch Sharing Plan and annual fishing regulations, consistent with the [recommendations provided by Washington Department of Fish and Wildlife](#) as follows:

1. Retain the current statewide season structure (i.e. manage the North Coast, South Coast and Puget Sound subareas under a common season) with status quo management where each subarea has its own quota and is managed to remain within that individual quota.
 - Each subarea will be open on the season dates listed below unless the individual quota for that subarea has been reached. Season dates for these three subareas include:
 - Open four days in May (Friday May 11, Sunday May 13, Friday May 25, Sunday May 27).
 - Open seven days in June (Thursday June 7, Saturday June 9, Saturday June 16, Thursday June 21, Saturday June 23, Thursday June 28, Saturday June 30).
2. Revise the catch sharing calculations for incidental halibut retention in the sablefish fishery north of Pt. Chehalis so that when the Area 2A total allowable catch is less than 1.5 million pounds, the status quo formula would apply up to a maximum allocation of 50,000 lbs. When the Area 2A total allowable catch allocation is 1.5 million pounds or more, the maximum allocation would increase to 70,000 lbs.
3. The annual bag limit will be four (4) fish per angler.
4. For the Columbia River subarea - the days open for the all-depth fishery will be Thursday, Friday, and Sunday (3 days).

No changes were adopted for the Oregon Central Coast Subarea, consistent with the recommendations of the Oregon Department of Fish and Wildlife.

c. **Council Action: Adopt Final Trawl Catch Share Review Report and a Preliminary Range of Alternatives for Follow-On Actions** [[mp3: 11-16-17pm2](#) 0:41:52]

Motion 8 [[mp3: 11-16-17pm2](#) 0:46:44]: Council:

1. Adopt the West Coast Groundfish Trawl Catch Share Program Five-Year Review Report, with the modifications to Chapter 4 as shown in Agenda Item F.2.a, Attachment 5. Allow authors latitude to make revisions to address minor edits or data corrections that become apparent during final editing. For Chapter 5, affirm those advisory body recommendations that are in line with a review every six years and a mandatory survey of QS owners as reflected in the following recommendations on a preliminary range of alternatives. Finally, include in the Chapter 5 recommendations a list of the follow-on actions that the Council will be considering coming out of the review process.

With regard to the preliminary range of alternatives, the Council:

2. Include alternatives for data collection of Catcher-Processor ownership information and quota share owner cost and revenue data, as recommended in Chapters 4 and 5 of Agenda Item F.2.a, Attachment 4.
3. Consider coordinating the review timing with the biennial specifications process as recommended in Section 5.0 of Agenda Item F.2.a, Attachment 4—that is, to schedule the next review to start in 2022 and occur every six years thereafter.
4. For At-Sea Whiting Fishery Bycatch Needs (Issue 1), as a priority, focus analysis on alternatives for
 - a. Set-aside management, and
 - b. Increasing amounts available for harvest.

Consider items

- c. Between sector quota pound trading,
 - d. Changing within trawl and trawl/non-trawl FMP allocations, and
 - e. Carryover of at-sea set-asides as potential additions for the omnibus list.
5. Include the complete list of potential actions in Attachment 6 as alternatives for Council consideration for Shorebased Individual Fishing Quota (IFQ) Accumulation Limits (Issue 3), Shorebased IFQ Sector Harvest Complex Needs (Issue 4), and Adaptive Management Plan QP Pass-Through (Issue 6).
6. Adopt the GMT recommendations, as described in Agenda Item F.2.a, Supplemental GMT Report, for: At-Sea Bycatch Needs (6a, 6b, and 6c); Shorebased Non-Whiting IFQ Aggregate Limit (8a); and Shorebased IFQ Sector Harvest Needs (9a). Also, in restructuring the shorebased IFQ sector harvest alternatives as recommended by the GMT, incorporate the elaborations developed by the Community Advisory Board (CAB), as described in Agenda Item F.2.a, Supplemental CAB Report 1.
7. Adopt the alternatives developed by the CAB for the Catcher-Processor Sector Accumulation Limits as the preliminary range of alternatives moving forward for further analysis, as described in Agenda Item F.2.a, Supplemental CAB Report 1. These alternatives would replace those previously identified by the Council.

Michele Culver/Rich Lincoln (Motion carried unanimously)

Staff Summary: At its November 2017 meeting, the Council finalized its trawl catch share review document and moved forward a number of possible actions that were identified during the five-year review of the trawl catch share program. The processes through which these possible actions will be considered are identified in the following lists.

Catch Share Review Follow-on Included in the Biennial Specifications Process: The following will be addressed in the biennial groundfish specifications process and may be implemented with the management measures for those specifications at the start of 2019.

- Increasing amounts available for harvest, for example, by using values other than historic maximums to determine set-aside amounts.
- Daily vessel quota pound (QP) limits (though possibly only for rebuilt species, i.e. excluding cowcod, yelloweye) and Pacific halibut.
- Continuation of the adaptive management program pass-through.

Catch Share Review Follow-on in a Follow-on Action Package: The following issues will be addressed as part of a catch share review follow-on package that will be considered at the March

2018 meeting. At that time, the Council will finalize a range of alternatives to be analyzed over the summer. A final decision is expected in the fall of 2018.

- At-sea set-asides. Permanently change bycatch management for the at-sea fishery from catch limits to set-asides for canary rockfish, darkblotched rockfish, Pacific ocean perch and widow rockfish. Remove from the Fishery Management Plan the formulas for allocation and set-aside amounts for darkblotched rockfish, Pacific ocean perch and widow rockfish.
- Revise individual species annual vessel QP limits.
- Allow post-season QP trading and provide post-season relief from vessel QP limits.
- Eliminate the September 1 expiration for QP that has not been moved to a vessel account.
- Establish catcher-processor accumulation limits for permit ownership and amount of processing, including a decision on whether to apply the limits immediately or only if the catcher-processor co-op reverts to an individual fishing quota program.
- Require the submission of catcher-processor ownership information during the permit review process.
- Require all owners of quota shares (QS) to provide information on their ownership to the Economic Data Collection Program (currently only QS owners that also own vessels or first receiver licenses are required to submit this information).

Catch Share Review Follow-on as a Stand Alone Agenda Item (possibly March 2018): The Council requested some additional information be available in March to help decide on the process for moving forward, as well as provide some guiding principles to whatever group will be working on the following issues:

- Sablefish 36° Line – Eliminate the line for the trawl sector management or modify the catch area requirements, including applicable annual vessel QP limits.
- Limit gear switching.
- Reduce sablefish annual vessel QP limit.

Increasing Trawl Carryover and Flexibility in ACL Management: At its March meeting, the Council will take up increasing the QP carryover to some amount above 10 percent as part of its consideration of flexibility in ACL management.

Catch Share Review Actions for Later Prioritization in the Omnibus Process: The following topics will be considered for possible action during the Council's groundfish omnibus prioritization process in the Fall of 2018;

- Between trawl sector QP trading.
- Trawl/nontrawl allocations.
- Carryover of at-sea set-asides.
- Aggregate nonwhiting control limits and the weightings used to calculate aggregate holding.

Maggie Sommer/Brad Pettinger (Motion carried unanimously)

Staff Summary: The Council adopted a new stock assessment for [Pacific ocean perch](#) (POP) and a new rebuilding analysis for [yelloweye rockfish](#), as endorsed by the [Scientific and Statistical Committee](#). The POP stock assessment and the yelloweye rockfish rebuilding analysis will be used to inform management decisions for 2019 and beyond. The adopted POP stock assessment indicates the stock is at 77 percent of its initial unfished biomass and therefore has been successfully rebuilt. The official declaration of POP stock status will be announced once NMFS confirms the assessment is the best scientific information available for management decision-making.

c. **Council Action: Adopt Final Policy Alternative for Mid-Biennium Harvest Specifications Adjustments** [[mp3: 11-17-17am2 1:16:05](#)]

Motion: None

Staff Summary: The Council considered a new policy framework that would allow an increase in harvest specifications in the second year of a biennial management cycle when a new assessment indicates a substantial increase in the available harvest of a stock. The Council decided to halt further consideration of this new policy in deference to other higher priority tasks. However, the Council requested the NMFS Northwest Fishery Science Center provide information to inform stock assessment priorities for both 2019 and 2021 when assessment priorities are identified in March 2018, as was contemplated in the Council's consideration of mid-biennium harvest adjustments.

Motion 11 [[mp3: 11-17-17pm2 0:03:12](#)]: Council:

1. Adopt the OFLs and SSC-endorsed sigmas and stock categories as described in Agenda Item F.6.a, Supplemental REVISED Attachment 1, Table 1, except:
 - a. For Pacific Ocean Perch, adopt the OFLs associated with the status quo management structure north and south of 40° 10' N. latitude;
 - b. For the Other Fish Complex, analyze the values in Table 1 as an alternative and add Alternative 1 from F.6.a, WDFW Report 1;
 - c. For yelloweye rockfish, analyze a range of OFL alternatives for 2019 and 2020 associated with a range of spawning potential ratios of 70 percent to 76 percent.
2. Adopt the final P* values, and ABCs, and ACLs as preliminary preferred ACLs in F.6.a, Supplemental REVISED Attachment 1, Table 4, incorporating the recommendations of the GMT in F.6.a, GMT Report 1 and Supplemental GMT Report 2, and the GAP in F.6.a, Supplemental GAP Report, except:
 - a. For the Other Fish Complex, analyze the values in Table 4 as an alternative and add Alternative 1 from F.6.a, WDFW Report 1;
 - b. For yelloweye rockfish, analyze a range of ABC and ACL alternatives for 2019 and 2020 associated with a range of spawning potential ratios of 70 percent to 76 percent.

Michele Culver/Rich Lincoln

Amendment 1 [[mp3: 11-17-17pm2 0:028:42](#)]: For yelloweye, add an alternative to analyze SPR of 65 percent.

Joanna Grebel/Marc Gorelnik (Amendment 1 carried unanimously).

Motion, as amended, carried unanimously

Staff Summary: The Council adopted final 2019 and 2020 overfishing limits (OFLs) for all groundfish stocks endorsed by the [Scientific and Statistical Committee](#) except for yelloweye rockfish. The Council also adopted the stock category designations and sigma values, which are used to determine acceptable biological catches (ABCs; sigma, the estimated biomass uncertainty, and P*, the overfishing probability, are used to determine the size of the precautionary reduction from the OFL, which defines the ABC). The Council also adopted the final ABCs and preliminary preferred ACLs recommended by the [Groundfish Management Team](#) and the [Groundfish Advisory Subpanel](#). The yelloweye rockfish OFLs are dependent on the final annual catch limits (ACLs) decided for that stock. The Council selected three alternative harvest control rules (HCRs) for managing yelloweye rockfish: the status quo HCR and harvest specifications under the spawning potential ratio (SPR) harvest rate of 76 percent and those under SPR harvest rates of 70 percent and 65 percent based on the [yelloweye rebuilding analysis](#). The Council did not indicate a preference for a yelloweye rockfish HCR and rebuilding plan at this time. The Council is

scheduled to decide final 2019 and 2020 ACLs and make a final decision on the yelloweye rockfish rebuilding plan at their April meeting in Portland, Oregon.

Motion: None

Staff Summary: The Council discussed the range of measures to mitigate the take of ESA-listed Chinook salmon in the Pacific Coast groundfish fishery. Potential measures that would be implemented through the 2019-2020 biennial harvest specifications and management measures were adopted under Agenda Item F.9. The Council will receive an update on the completed Biological Opinion at its March 2018 meeting.

The Council also tentatively scheduled action on a regulatory proposal to mitigate take of ESA-listed short-tailed albatross in groundfish fixed gear fisheries for its September 2018 meeting.

Motion 13 [[mp3: 11-18-17pm2 1:17:18](#)]: Council:

- 1) Forward the following proposed groundfish EFPs for public review, with all modifications recommended by the GMT in Agenda Item F.8.a, Supplemental GMT Report 1, November 2017, and the recommendations on research banners in F.8.a, Supplemental GAP Report 1, November 2017:

- Commercial Jig Fishing Targeting Yellowtail Rockfish off California – San Francisco Community Fishing Association and Dan Platt
- Commercial Midwater Hook and Line Rockfish Fishing in the RCA off Oregon – Cook
- Monterey Bay Fishermen Exempted Fishing Permit - Lovell

- 2) Adopt yield set-asides for these three EFPs as recommended in F.8.a, Supplemental GMT Report 1, November 2017, except for the Cook EFP revise the amount of yelloweye rockfish from 0.26 to 0.13 metric tons.

Maggie Sommer/Dorothy Lowman

Amendment 1 [[mp3: 11-18-17pm2 1:21:56](#)]: Amend the main motion to include the Tom Mattusch EFP application in Agenda Item F.8.a, Supplemental GMT Report 1.

Marc Gorelnik/Brad Pettinger (Amendment 1 carried, Mr. Anderson, Ms. Yaremko, and Mr. Niles voted no)

Amendment 2 [[mp3: 11-18-17pm2 1:27:06](#)]: With regard to the yield set-aside values identified in Table 1 of GMT Report recommend modifying the Cook value for yelloweye from .26 to .12, and the value for Canary from 10 to 3.

Marci Yaremko/Buzz Brizendine (Amendment withdrawn with consent of the second)

Amendment 3 [[mp3: 11-18-17pm2 1:36:28](#)]: Make the following change in the main motion under section 2) change value of yelloweye from 0.13 to 0.12 metric tons. Amend Table 1 of the GMT Report for yelloweye as follows: Increase Lowell to .06 and change canary for Cook from 10 to 3 mt.

Marci Yaremko/Buzz Brizendine (Amendment carried, Mr. Anderson, Mr. Lincoln, and Mr. Niles voted no)

Motion 13, as amended, carried (Mr. Anderson voted no and Ms. Yaremko abstained)

Staff Summary: The Council recommended the following groundfish EFP for public review, including all the modifications contained in the [Groundfish Management Team \(GMT\) report](#), as follows

- [San Francisco Community Fishing Association and Dan Platt Application](#) - Commercial jig fishing targeting yellowtail rockfish in the Rockfish Conservation Area (RCA) off California.
- [Scott Cook and Oregon Department of Fish and Wildlife Application](#): Commercial midwater hook-and-line rockfish fishing in the RCA off Oregon. The Council recommended caps be reduced to 0.12 mt for yelloweye rockfish and 3 mt for canary.
- [Monterey Bay Fishermen Exempted Fishing Application](#) – The Council recommended caps be increased for yelloweye rockfish cap to 0.06 mt.
- [Tom Mattusch Application](#) and [Addendum](#): Recreational long leader gear targeting chilipepper and yellowtail rockfish in the RCA. The Council also recommended vessels under this EFP be identified with a research banner.

The Council is scheduled to take final action on EFPs for 2019-2020 in June 2018.

Motion 14 [[mp3: 11-19-17am2 0:50:55](#)]: Council adopt the following for #2-12 and #16 as follows in Supplemental GMT Report 3. If no change is mentioned, apply status quo.

#2 - RCA Revisions

- Adopt revisions in California for detailed analysis

#3 - Off the top deductions

- Adopt as recommended in Supplemental GMT Report 2 and Supplemental CDFW Report 1 with the following changes/clarifications:
 - Cowcod: 0.1 mt is included in buffer between ACT and ACL, not additive to current research set-aside
 - IOA Darkblotched: decrease from 24.5 mt to 7 mt

#4 - ACTs

- cowcod = 6 mt ACT (research catches come off ACL)

#5 - HG

- Blackgill S of 40°10' – status quo until Amendment 26 rulemaking completed
- Blue RF S of 42° - remove state HG

#6 - Allocations (trawl/non trawl)

- Yelloweye: status quo as a starting point noting additional allocations can be developed for April
 - #7 – Allocations (w/in trawl)
 - Canary – adopt GMT recommendation
 - #8 - Whiting At-Sea Set asides
 - Adopt GMT recommended values in Table 13
 - #9 - Non-Trawl HG
 - Yelloweye: status quo as a starting point noting additional allocations can be developed for April
 - Lingcod Size Limit: Do not consider removal of size limit for commercial fishery sectors
 - #10 – Shorebased IFQ
 - Adopt GMT recommendation
 - #11 & 12 Non-nearshore and Nearshore
 - Non-trawl RCA - evaluate changes to seaward boundary from 100 fm to 75 fm between 40° 10' and 42° and evaluate deeper depth restrictions inside CCA.
 - Canary S of 40° 10' – add March-April closure
 - Lingcod S of 40° 10' – evaluate modifications to trip limits to remain within allowable limits
 - North of 40° 10' – evaluate 500 lb/month limit for OA slope and darkblotched rockfish
 - #16 – CA Recreational
 - Include changes identified in Sept 2017 CDFW report (season dates, bag limit modifications, depth restrictions, etc).
- Joanna Grebel/Marc Gorelnik

Amendment 1 [[mp3: 11-19-17am2 1:24:57](#)]: Add to #11 Non-Nearshore: For N of 40° 10' evaluate a 50 lb per month limit for OA shortspine and longspine thornyheads

Maggie Sommer/Dorothy Lowman (Amendment carried, Ms. Grebel voted no)

Motion 14, as amended, carried unanimously

Motion 15 [[mp3: 11-19-17am2 1:30:25](#)]: Council adopt the following:

#27 Remove FMP formula for establishing the darkblotched rockfish and Pacific ocean perch set-asides for catcher-processors and motherships

- Do not include this item in analysis for 2019-2020 management measures.

#29 Lingcod and sablefish discard mortality rates

- Include for analysis for 2019-2020 management measures.

#30 Modification or removal of the IFQ quota pound daily vessel limits

- Move all alternatives forward

#31 Modifications to the IFQ quota pound individual species limits

- Do not include in the 2019-2020 new management measure analysis. Keep with five-year review follow-on action process.
- Recommend preliminary analysis of reducing the sablefish annual vessel use limit along with preliminary analysis of removing the sablefish area management line.

#34 Amendment 21-3 automatic action

- Modify regulations for 2019 and beyond to change the automatic action authority to discretionary authority to close either at-sea sector if the catcher-processor and mothership sectors were projected to exceed their set-aside values for darkblotched rockfish and Pacific Ocean Perch.

#36 Change Canary and widow rockfish at-sea allocations to set-asides

- Do not include this action as a new management measure; keep with catch shares five-year review follow on action process.

Maggie Sommer/Brad Pettinger

Amendment 1 [[mp3: 11-19-17am2 1:49:25](#)]: Add under #31: analysis of sablefish vessel caps for the area North of 36° be included.

Brad Pettinger/Marc Gorelnik (Amendment failed; Mr. Pettinger voted yes, Mr. Wulff abstained. Motion 15 carried (Mr. Wulff abstained))

Motion 16 [[mp3: 11-19-17pm1 0:00:20](#)]: Council adopt the following for #17, #19, #21-26, #28, #32-33 from Supplemental GMT Report 4 and Supplemental GAP Report 1.

- #17 – Housekeeping
 - Update scientific name for giant grenadier
- #19 – Western CCA boundary
 - Adopt GMT recommendation to evaluate in stand-alone agenda item
- #21 – Carryover
 - Adopt GAP recommendation
- #22 – Multi-year average catch policy
 - Adopt GAP recommendation
- #23 – ESA Mitigation Measures for Short-tailed Albatross
 - Develop in a separate process
- #24 – ESA Salmon Consultation Measures
 - Adopt GMT recommendation
- #25 – Modify trawl regulations for crab retention in California
 - Adopt GMT recommendation
- #26 – Biennial set-asides for Pacific Whiting
 - Adopt GAP recommendation
- #28 – Adaptive Management
 - Adopt GMT recommendation
- #32 – Depth restrictions for directed Pacific halibut fishery
 - Remove from further consideration and analysis
- #33 – VMS for directed Pacific halibut fishery
 - Remove from further consideration and analysis
- #35 – Sablefish Trawl Management Line
 - Do not include in Spex

Joanna Grebel/Buzz Brizendine (Motion carried unanimously)

Motion 17: Council include the following new management measures for 2019-2020 for further analysis:

#18 Stock complex alternatives

- Include for analysis the following stock complex alternatives for 2019-2020:
 - Oregon blue/deacon/black/nearshore rockfish north proposal from Agenda Item F.9.a, GMT Report 1, November 2017
 - Oregon kelp greenling/cabazon/other fish proposal from Agenda Item F.9.a, GMT Report 1, November 2017

Maggie Sommer/Dorothy Lowman (Motion carried; Ms. Grebel voted no, and Mr. Wulff abstained)

Staff Summary: The Council provided guidance on the methods and values necessary to initiate the analysis of management measures for 2019-2020. The Council recommended stock complex alternatives that affect the following stocks: Oregon blue/deacon, Oregon black rockfish, and the Nearshore Rockfish North of 40° 10' N. latitude complex; and Oregon kelp greenling, Oregon cabazon, and the Other Fish complex. Additionally, the Council forwarded an alternative for analysis that would remove Washington cabazon and Washington kelp greenling from the Other Fish complex and manage them in a separate Washington cabazon/kelp greenling complex.

The Council also included the following new measures for analysis as described in [GMT Report 4](#): salmon mitigation measures for midwater trawl gears and rules for all sectors for accessing the salmon reserve (item 24), sablefish, and lingcod discard mortality rates applied to Shorebased Individual Fishing Quota (IFQ) Program QP (item 29), removal of the daily vessel limits in the Shorebased IFQ program (item 30), removal of the automatic action provision that closes the at-sea Pacific whiting sectors if a darkblotched or Pacific ocean perch set-aside and the associated buffer is attained (item 34).

The results of the 2019-2020 harvest specifications and management measure analysis will be provided to the Council during an informational presentation at the March 2018 meeting. In April 2018, the Council is scheduled to adopt a preliminary preferred suite of management measures. After a public review period, the Council will take final action at the June 2018 Council meeting with implementation scheduled for January 1, 2019.

- Off-Year Science Workshops
 - Review of Data-Limited Methods for use in groundfish stock assessments.
 - Follow-up workshop on historical catch reconstruction.
- Methodology Reviews during 2018
 - Improve catch estimation methods in sparsely sampled mixed stock fisheries.
 - Proposed remotely operated vehicle (ROV) survey of nearshore stocks, California and Oregon.

In addition, recommend participation by representatives of the GAP and GMT in these workshops and methodology reviews where appropriate.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Staff Summary: The Council adopted the off-year science and stock assessment methodology review recommendations of the [Scientific and Statistical Committee](#). Off-Year Science Workshops that will be conducted next year include a review of data-limited methods for use in groundfish stock assessments and a follow-up workshop on historical catch reconstruction with a focus on historical catch reconstructions of skate species. Methodology reviews planned for next year include a review of catch estimation methods in sparsely sampled mixed stock fisheries and a review of proposed remotely operated vehicle (ROV) surveys of nearshore stocks in California and Oregon. The focus of the methodology review of the nearshore ROV surveys will be how collected data can be used to inform stock assessments. The Council recommended participation by representatives of the Groundfish Advisory Subpanel and the Groundfish Management Team in these workshops and methodology reviews where appropriate.

c. Council Action: Adopt Final Pacific Halibut Discard Mortality Rates, Discard Species Lists, and a Third-Party Review Policy for Groundfish Trawl Electronic Monitoring Regulations [mp3: 11-19-17pm2 1:42:51]

Motion 19 [mp3: 11-19-17pm2 1:43:33]: Council conditionally adopt the following discard mortality rates for Pacific Halibut in the bottom trawl and non-whiting midwater trawl fisheries coastwide with the condition the best handling practices are followed:

For Bottom Trawl

Adopt Option 2 – Implement a vessel-specific DMR rate for each halibut discarded under EM using the GMT model identified in Agenda Item F.11.a, GMT Report 1. In addition, implement the documentation steps identified in Agenda Item F.11.a, Supplemental GMT Report 2.

For the Non-Whiting Midwater Trawl

If a vessel declares optimized retention, then apply Option 1 - Default rate of 90 percent DMR for all discarded halibut under EM.

If a vessel declares maximized retention, then apply Option 2 -The halibut must be landed and a DMR of 100 percent is applied.

Implementation Condition

Implementation of the revised discard mortality rates would be put in effect only after the GMT has communicated with the chairs of the SSC groundfish and economic subcommittees and received their concurrence that the GMT had fulfilled the conditions of the SSC as identified in Agenda Item F.11.a.

Phil Anderson/Rich Lincoln (Motion carried unanimously)

Motion 20 [mp3: 11-19-17pm2 1:53:09]: Council adopt as Final Preferred Alternatives for Electronic monitoring:

1: Discard Species List Adjustment: Option 2 as shown in Agenda Item F.11.a, NMFS Report 1 as the process to adjust the discard species list.

2: Video Review: Third Party Model (Supplemental GEMPAC Report 1)

Dorothy Lowman/Brad Pettinger (Motion carried unanimously)

Motion 21 [mp3: 11-19-17pm2 2:00:13]: Council adopt the recommendation in the supplemental EC report, Agenda item F.11.a, that NMFS maintain the maximized retention requirement in the whiting fishery as it finalizes the EM regulations, to disallow discards except as otherwise provided.

Marci Yaremko/Marc Gorelnik (motion carried unanimously)

Staff Summary: The Council adopted Pacific halibut discard mortality rates (DMR) for the bottom trawl and non-whiting midwater trawl fisheries that use electronic monitoring (EM).

For the bottom trawl fishery, a DMR model based on time on deck was conditionally approved by the [SSC](#). The modeled mortality rate (or revised rates) will be applied after the SSC receives confirmation that the GMT has fulfilled the conditions identified by the SSC. All vessels will be required to use best handling practices for the modeled rate to be applied, otherwise a default rate of 90 percent would be applied.

For the non-whiting midwater trawl fishery, the following will be applied:

- When a vessel declares optimized retention, a default rate of 90 percent will be applied to all halibut that are discarded.
- When a vessel declares maximized retention, the halibut must be landed and a DMR of 100 percent will be applied.

In addition, the Council adopted the following final preferred alternatives for electronic monitoring:

- For the Discard Species List Adjustment process, the Council selected Option 2 whereby a species may be added or removed under an inseason action during one Council meeting. Vessel monitoring plans would be updated to reflect the change.
- The Council selected the [Third Party Video Review Model](#), in which Pacific States Marine Fisheries Commission and other eligible entities would compete as a video review provider for the industry.

The Council also asked the Executive Director to explore opportunities to create a designated funding mechanism for electronic monitoring to help offset the cost of EM, similar to that used by the North Pacific Fishery Management Council as authorized in Section 314 of the Magnuson-Stevens Act (MSA).

Motion 22 [[mp3: 11-20-17am1 0:53:18](#)]: Council adopt:

- 2018 Big skate trip limits for the shorebased IFQ fishery: Alternative 2, as recommended by the GAP and shown in F.13.a, Supplemental Revised GMT Report 1, Table 4
- 2018 Sablefish DTL trip limits, Alternative 1, F.13.a, Supplemental Revised GMT Report 1, Table 7
- 2018 Lingcod trip limits: Alternative 2 for LE and OA fisheries (Supplemental Revised GMT Report 1, Table 9)
- 2018 Pacific whiting set aside for research and pink shrimp sectors: 1,500 mt (F.13.a, Supplemental Revised GMT Report 1)

In addition, recommend that the National Marine Fisheries Service:

- Amend the LE and OA trip limit tables in Federal regulations as recommended in F.13.a, Supplemental Revised GMT Report 1
- Consider changing the terms and conditions of the Platt/Emley EFP to allow for canary rockfish to be sold in 2018

Maggie Sommer/Brad Pettinger (Motion carried unanimously)

Staff Summary: The Council considered the most recent data on fishery performance and recommended NMFS implement the following adjustments for 2018 fisheries, intended to increase attainment of the annual catch limits:

Big skate trip limits, in pounds, for the Shorebased Individual Fishing Quota Program as follows

Jan-Feb	Mar-Apr	May-Jun	Jul-Aug	Sept-Oct	Nov-Dec
Period 1	Period 2	Period 3	Period 4	Period 5	Period 6
5,000	30,000	35,000	40,000	15,000	5,000

In addition, the Council recommended that NMFS clarify that the limited entry (LE) and open access (OA) trip limits for big skate are unlimited.

Sablefish north of 36° N. latitude trip limits for the LE and OA fixed gear fisheries as follows

Sector	Trip Limit for Periods 1-6
LE	1,100 lbs per week, not to exceed 3,300 lbs/2 mo
OA	300 lbs/day, or 1 landing per week up to 1,000 lbs, not to exceed 2,000 lbs/2 mo

Trip limits for lingcod north of 40° 10' N. latitude as follows

Sector	JAN-FEB	MAR-APR	MAY-JUN	JUL-AUG	SEP-OCT	NOV-DEC
LE	600 lb/2 months		1,400 lb/2 months			700 lb/mo 400 lb/mo

The Council also recommended that NMFS establish a 1,500 mt deduction from the 2018 Pacific whiting set total allowable catch to account for Pacific whiting mortality in research and pink shrimp fisheries. Finally, the Council recommended NMFS modify the 2018 EFP terms and conditions of the San Francisco Community Fishing Association & Dan Platt to allow for canary rockfish to be sold, given that the stock is rebuilt.

Staff Summary: The Council endorsed NMFS-proposed trip limits for Pacific bluefin tuna commercial landings in 2018. A 1 mt trip limit would apply to all fisheries except for the large mesh drift gillnet fishery, which would be subject to a 2 mt trip limit. These limits would prevent rapid attainment of the low 2018 catch limit of approximately 120 mt while minimizing regulatory discards due to unavoidable incidental catch on a single trip.

David Crabbe/Buzz Brizendine (Motion carried unanimously)

Staff Summary: The Council reviewed two revised applications ([Mintz](#), [Foster](#)) and recommended NMFS issue EFPs to the applicants. It also recommended NMFS issue an EFP based on one new application ([Carson](#)) but asked the applicant to submit additional information to NMFS related to his past experience using deep-set buoy gear.

Finally, the Council asked three applicants ([Brockman](#), [Ekstrom](#), [Greyshock](#)) resubmit revised applications that include additional information on how they would address data gaps.

Motion 1: Adopt [Agenda Item A.4, November 14-20, 2017](#) Council Meeting Agenda with the changes of cancelling Agenda Item C.3 Methodology Review Preliminary Topic Selection and changing the scheduling of I.1 Tri-State Enforcement Report to this afternoon.

Herb Pollard/Buzz Brizendine (Motion carried unanimously)

Motion 2: Council adopt the preliminary Exempted Fishing Permit proposals ([Agenda Item C.2, Attachment 1](#) and [Attachment 2](#)) for public review, and that proponents revise the proposals according to feedback from the SSC ([Agenda Item C.2.a, Supplemental SSC Report](#)) and CPSMT ([Agenda Item C.2.a, Supplemental CPSMT Report 1](#)) statements.

Briana Brady/Marc Gorelnik (Motion carried unanimously)

Motion 3: Council adopt the reduced index method for Oregon OCN in 2018 and beyond ([Agenda Item D.2, Attachment 1](#))

Caren Braby/Brad Pettinger (motion carried unanimously)

Motion 4: Council recommend to NMFS Control Rule 10 as presented in [Agenda Item D.3.a, SRWCW Report 1](#): Further Evaluation of Sacramento River Winter Chinook Salmon Control Rules: Addendum to Ad Hoc SRWC Workgroup (2017), for their review of the consultation standards under the ESA.

Brett Kormos/Buzz Brizendine (Motion carried, Dr. Peter Dygert abstained)

Motion 5: Council adopt the proposed schedule and process for developing 2018 ocean salmon fishery management measures as shown in [Agenda Item D.4, Attachment 1, November 2017](#) with the specification of the California hearing as Salinas, California.

Phil Anderson/Caren Braby (with Kormos/Gorelnik Amendment) carried unanimously

Motion 6: Council maintain status quo management of the Oregon Central Coast Subarea as one unit in the 2018 Pacific Halibut Catch Sharing Plan.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Motion 7: Council adopt the recommendations for the 2018 Pacific Halibut Catch Sharing Plan as shown in [Agenda Item E.1.a, WDFW Report 1, November 2017](#).

Michele Culver/Phil Anderson (Motion carried unanimously)

Motion 8: Council:

1. Adopt the West Coast Groundfish Trawl Catch Share Program Five-Year Review Report, with the modifications to Chapter 4 as shown in [Agenda Item F.2.a, Attachment 5](#). Allow authors latitude to make revisions to address minor edits or data corrections that become apparent during final editing. For Chapter 5, affirm those advisory body recommendations that are in line with a review every six years and a mandatory survey of QS owners as reflected in the following recommendations on a preliminary range of alternatives. Finally, include in the Chapter 5 recommendations a list of the follow-on actions that the Council will be considering coming out of the review process.

With regard to the preliminary range of alternatives, the Council:

2. Include alternatives for data collection of Catcher-Processor ownership information, and quota share owner cost and revenue data, as recommended in Chapters 4 and 5 of [Agenda Item F.2.a, Attachment 4](#).
3. Consider coordinating the review timing with the biennial specifications process as recommended in Section 5.0 of [Agenda Item F.2.a, Attachment 4](#)—that is, to schedule the next review to start in 2022 and occur every six years thereafter.
4. For At-Sea Whiting Fishery Bycatch Needs (Issue 1), as a priority, focus analysis on alternatives for
 - a. Set-aside management, and
 - b. Increasing amounts available for harvest.

Consider items

- c. Between sector quota pound trading,
- d. Changing within trawl and trawl/non-trawl FMP allocations, and
- e. Carryover of at-sea set-asides as potential additions for the omnibus list.

5. Include the complete list of potential actions in [Attachment 6](#) as alternatives for Council consideration for Shorebased Individual Fishing Quota (IFQ) Accumulation Limits (Issue 3), Shorebased IFQ Sector Harvest Complex Needs (Issue 4), and Adaptive Management Plan QP Pass-Through (Issue 6).
6. Adopt the GMT recommendations, as described in Agenda Item F.2.a, Supplemental GMT Report, for: At-Sea Bycatch Needs (6a, 6b, and 6c); Shorebased Non-Whiting IFQ Aggregate Limit (8a); and Shorebased IFQ Sector Harvest Needs (9a). Also, in restructuring the shorebased IFQ sector harvest alternatives as recommended by the GMT, incorporate the elaborations developed by the Community Advisory Board (CAB), as described in [Agenda Item F.2.a, Supplemental CAB Report 1](#).
7. Adopt the alternatives developed by the CAB for the Catcher-Processor Sector Accumulation Limits as the preliminary range of alternatives moving forward for further analysis, as described in [Agenda Item F.2.a, Supplemental CAB Report 1](#). These alternatives would replace those previously identified by the Council.

Michele Culver/Rich Lincoln (Motion carried unanimously)

Motion 9: Council adopt the Pacific ocean perch stock assessment endorsed by the SSC for use in the 2019-2020 management cycle and beyond ([Agenda Item F.4.a, Supplemental SSC Report 1, November 2017](#)).

Maggie Sommer/Brad Pettinger (Motion carried unanimously)

Motion 10: Council adopt the yelloweye rockfish rebuilding analysis endorsed by the SSC for use in the 2019-2020 management cycle and beyond ([Agenda Item F.4.a, Supplemental SSC Report 1, November 2017](#)).

Maggie Sommer/Brad Pettinger (Motion carried unanimously)

Motion 11: Council:

1. Adopt the OFLs and SSC-endorsed sigmas and stock categories as described in [Agenda Item F.6.a, Supplemental REVISED Attachment 1, Table 1](#), except:
 - a. For Pacific Ocean Perch, adopt the OFLs associated with the status quo management structure north and south of 40° 10' N. latitude;
 - b. For the Other Fish Complex, analyze the values in Table 1 as an alternative and add Alternative 1 from [F.6.a, WDFW Report 1](#);
 - c. For yelloweye rockfish, analyze a range of OFL alternatives for 2019 and 2020 associated with a range of spawning potential ratios of 70 percent to 76 percent.
2. Adopt the final P* values, ABCs, and ACLs as preliminary preferred ACLs in [F.6.a, Supplemental REVISED Attachment 1](#), Table 4, incorporating the recommendations of the GMT in [F.6.a, GMT Report 1](#) and [Supplemental GMT Report 2](#), and the GAP in [F.6.a, Supplemental GAP Report](#), except:
 - a. For the Other Fish Complex, analyze the values in Table 4 as an alternative and add Alternative 1 from [F.6.a, WDFW Report 1](#);
 - b. For yelloweye rockfish, analyze a range of ABC and ACL alternatives for 2019 and 2020 associated with a range of spawning potential ratios of 70 percent to 76 percent, and a SPR of 65 percent.

Michele Culver/Rich Lincoln (as amended by Grebel/Gorelnik) carried unanimously

Motion 12: Council approve to recommend to NMFS the EFP applications as recommended in [Agenda Item H.3.a, HMSMT Report 1](#) with the one adjustment with the recommendation of the HMSAS Report ([Agenda Item H.3.a, Supplemental HMSAS Report 1](#)).

David Crabbe/Buzz Brizendine (Motion carried unanimously)

Motion 13: Council:

1) Forward the following proposed groundfish EFPs for public review, with all modifications recommended by the GMT in [Agenda Item F.8.a, Supplemental GMT Report 1](#), November 2017, and the recommendations on research banners in [F.8.a, Supplemental GAP Report 1, November 2017](#):

- Commercial Jig Fishing Targeting Yellowtail Rockfish off California – San Francisco Community Fishing Association and Dan Platt
- Commercial Midwater Hook and Line Rockfish Fishing in the RCA off Oregon – Cook
- Monterey Bay Fishermen Exempted Fishing Permit – Lovell
- Chilipepper/Yellowtail Long Leader Exempted Fishing Permit – Mattusch (amendment1)

2) Adopt yield set-asides for these three EFPs as recommended in [F.8.a, Supplemental GMT Report 1, November 2017](#), except for the Cook EFP revise the amount of yelloweye rockfish from 0.26 to 0. 0.12 metric tons. And amend Table 1 of the GMT Report for yelloweye as follows: Increase Lowell to .06 and change canary for Cook from 10 to 3 mt. (Amendment 3)

Maggie Sommer/Dorothy Lowman

Motion 13 (as amended by Gorelnik/Pettinger and Yaremko/Brizendine) carried (Mr. Anderson voted no and Ms. Yaremko abstained)

Motion 14 Council adopt the following for #2-12 and #16 as follows in [Supplemental GMT Report 3](#). If no change is mentioned, apply status quo.

#2 - RCA Revisions

- Adopt revisions in California for detailed analysis

#3 - Off the top deductions

- Adopt as recommended in [Supplemental GMT Report 2](#) and [Supplemental CDFW Report 1](#) with the following changes/clarifications:
 - Cowcod: 0.1 mt is included in buffer between ACT and ACL, not additive to current research set-aside
 - IOA Darkblotched: decrease from 24.5 mt to 7 mt

#4 - ACTs

- cowcod = 6 mt ACT (research catches come off ACL)

#5 - HG

- Blackgill S of 40° 10' – status quo until Amendment 26 rulemaking completed
- Blue RF S of 42° - remove state HG

#6 - Allocations (trawl/non trawl)

- Yelloweye: status quo as a starting point noting additional allocations can be developed for April

#7 – Allocations (w/in trawl)

- Canary – adopt GMT recommendation
 - #8 - Whiting At-Sea Set asides
 - Adopt [GMT recommended values in Table 13](#)
 - #9 - Non-Trawl HG
 - Yelloweye: status quo as a starting point noting additional allocations can be developed for April
 - Lingcod Size Limit: Do not consider removal of size limit for commercial fishery sectors
 - #10 – Shorebased IFQ
 - Adopt GMT recommendation
 - #11 & 12 Non-nearshore and Nearshore
 - Non-trawl RCA - evaluate changes to seaward boundary from 100 fm to 75 fm between 40° 10' and 42° and evaluate deeper depth restrictions inside CCA.
 - Canary S of 40° 10' – add March-April closure
 - Lingcod S of 40° 10' – evaluate modifications to trip limits to remain within allowable limits
 - North of 40° 10' – evaluate 500 lb/month limit for OA slope and darkblotched rockfish
 - Non-Nearshore: For N of 40° 10' evaluate a 50 lb per month limit for OA shortspine and longspine thornyheads (Amendment 1)
 - #16 – CA Recreational
 - Include changes identified in [Sept 2017 CDFW report](#) (season dates, bag limit modifications, depth restrictions, etc).
- Joanna Grebel/Marc Gorelnik as amended by Sommer/Lowman; (Motion carried unanimously)

Motion 15: Council adopt the following:

- #27 Remove FMP formula for establishing the darkblotched rockfish and Pacific ocean perch set-asides for catcher-processors and motherships
 - Do not include this item in analysis for 2019-2020 management measures.
- #29 Lingcod and sablefish discard mortality rates
 - Include for analysis for 2019-2020 management measures.
- #30 Modification or removal of the IFQ quota pound daily vessel limits
 - Move all alternatives forward
- #31 Modifications to the IFQ quota pound individual species limits
 - Do not include in the 2019-2020 new management measure analysis. Keep with five-year review follow-on action process.
 - Recommend preliminary analysis of reducing the sablefish annual vessel use limit along with preliminary analysis of removing the sablefish area management line.
- #34 Amendment 21-3 automatic action
 - Modify regulations for 2019 and beyond to change the automatic action authority to discretionary authority to close either at-sea sector if the catcher-processor and mothership sectors were projected to exceed their set-aside values for darkblotched rockfish and Pacific Ocean Perch.
- #36 Change Canary and widow rockfish at-sea allocations to set-asides
 - Do not include this action as a new management measure; keep with catch shares 5 year review follow on action process.

Maggie Sommer/Brad Pettinger
Motion 15 carried (Mr. Wulff abstained)

Joanna Grebel/Buzz Brizendine (Motion carried unanimously)

Motion 17: Council include the following new management measures for 2019-2020 for further analysis:

#18 Stock complex alternatives

- Include for analysis the following stock complex alternatives for 2019-2020:
 - Oregon blue/deacon/black/nearshore rockfish north proposal from [Agenda Item F.9.a, GMT Report 1, November 2017](#)
 - Oregon kelp greenling/cabezon/other fish proposal from [Agenda Item F.9.a, GMT Report 1, November 2017](#)

Maggie Sommer/Dorothy Lowman (Motion carried, Ms. Grebel voted no, and Mr. Wulff abstained)

Motion 18: Council approve the recommendations of the SSC in [Agenda Item F.10.a, Supplemental SSC Report 1, November 2017](#), including adopting the following workshops and methodology reviews for improvements to groundfish management science for 2018:

- Off-Year Science Workshops
 - Review of Data-Limited Methods for use in groundfish stock assessments.
 - Follow-up workshop on historical catch reconstruction.
- Methodology Reviews during 2018
 - Improve catch estimation methods in sparsely sampled mixed stock fisheries.
 - Proposed remotely operated vehicle (ROV) survey of nearshore stocks, California & Oregon.

In addition, recommend participation by representatives of the GAP and GMT in these workshops and methodology reviews where appropriate.

Maggie Sommer/Dorothy Lowman (Motion carried unanimously)

Motion 19: Council conditionally adopt the following discard mortality rates for Pacific Halibut in the bottom trawl and non-whiting midwater trawl fisheries coastwide with the condition the best handling practices are followed:

For Bottom Trawl

Adopt Option 2 – Implement a vessel-specific DMR rate for each halibut discarded under EM using the GMT model identified in [Agenda Item F.11.a, GMT Report 1](#). In addition, implement the documentation steps identified in [Agenda Item F.11.a, Supplemental GMT Report 2](#).

For the Non-Whiting Midwater Trawl

If a vessel declares optimized retention, then apply Option 1 - Default rate of 90 percent DMR for all discarded halibut under EM.

If a vessel declares maximized retention, then apply Option 2 -The halibut must be landed and a DMR of 100 percent is applied.

Implementation Condition

Implementation of the revised discard mortality rates would be put in effect only after the GMT has communicated with the chairs of the SSC groundfish and economic subcommittees and received their concurrence that the GMT had fulfilled the conditions of the SSC as identified in [Agenda Item F.11.a](#).

Phil Anderson/Rich Lincoln (Motion carried unanimously)

Motion 20: Council adopt as Final Preferred Alternatives for Electronic monitoring:

- 1: Discard Species List Adjustment: Option 2 as shown in [Agenda Item F.11.a, NMFS Report 1](#) as the process to adjust the discard species list.
- 2: Video Review: Third Party Model ([Supplemental GEMPAC Report 1](#))

Dorothy Lowman/Brad Pettinger (Motion carried unanimously)

Motion 21: Council adopt the recommendation in the [Supplemental EC Report, Agenda Item F.11.a](#), that NMFS maintain the maximized retention requirement in the whiting fishery as it finalizes the EM regulations, to disallow discards except as otherwise provided.

Marci Yaremko/Marc Gorelnik (motion carried unanimously)

Motion 22: Council adopt:

- 2018 Big skate trip limits for the shorebased IFQ fishery: Alternative 2, as recommended by the GAP and shown in F.13.a, [Supplemental Revised GMT Report 1, Table 4](#)

- 2018 Sablefish DTL trip limits, Alternative 1, [F.13.a, Supplemental Revised GMT Report 1, Table 7](#)
- 2018 Lingcod trip limits: Alternative 2 for LE and OA fisheries ([Supplemental Revised GMT Report 1, Table 9](#))
- 2018 Pacific whiting set aside for research and pink shrimp sectors: 1,500 mt ([F.13.a, Supplemental Revised GMT Report 1](#))

In addition, recommend that the National Marine Fisheries Service:

- Amend the LE and OA trip limit tables in Federal regulations as recommended in [F.13.a, Supplemental Revised GMT Report 1](#)
- Consider changing the terms and conditions of the Platt/Emley EFP to allow for canary rockfish to be sold in 2018

Maggie Sommer/Brad Pettinger (Motion carried unanimously)
