a/ Inseason estimates are preliminary.

b/ Non-Indian coho fisheries prior to Sept. are mark-selective and non-mark-selective recreational fisheries occur in Sept., (except NOF rec.) see the regulations for details.

c/ Effort is reported as landings. Chinook summer quota of 20,000 increased by adding spring quota rollover on an impact neutral basis by 16,720 fish. Total allowable catch is 40,000 Chinook for Treaty Indian fisheries in 2017.

d/ Numbers shown as Chinook quotas for NOF non-Indian troll and rec. fisheries are guidelines not quotas; only the total Chinook allowable catch is a quota.

e/ NOF non-Indian troll coho quota is adjusted from pre-season due to impact neutral transfer to recreational fishery. The pre-season quota was 5,600 coho.

f/ NOF recreational coho quotas are adjusted from pre-season due to impact neutral transfers between areas and from the NOF non-Indian troll fishery. The pre-season quotas were: U.S./Canada Border to Cape Alava- 4,370 coho; Cape Alava to Queets River - 1,090 coho; Queets River to Leadbetter Point - 15,540 coho; Leadbetter Point to Cape Falcon - 21,000 coho.

g/ Cape Falcon to Humbug Mt. recreational coho quota for September is adjusted from pre-season due to an impact neutral transfer from the recreational (mark-selective) coho quota for June-July. The pre-season quota for September was 6,000 coho.
