

HABITAT COMMITTEE REPORT ON  
LEGISLATIVE MATTERS

The Habitat Committee (HC) received a briefing on H.R. 2936, the Resilient Federal Forests Act of 2017. The HC is concerned that if this bill were to pass it would have devastating consequences on West Coast salmon habitats. We recognize the Council has not received a request for comments on the bill but encourage the Council, the Legislative Committee, and the salmon advisory bodies to track the bill to the extent possible.
