

ECOSYSTEM ADVISORY SUBPANEL REPORT ON SABLEFISH ECOSYSTEM
INDICATORS: MANAGEMENT STRATEGY EVALUATION

The Ecosystem Advisory Subpanel (EAS) received a presentation by Dr. Melissa Haltuch on “Assessing the Effects of Climate Change of U.S. West Coast Sablefish Productivity and on the Performance of Alternative Management Strategies.”

The EAS appreciated the presentation by Dr. Haltuch as an example of the use of climate information in Management Strategy Evaluation. We encourage further development of this approach.
