Agenda Item E.5.a Supplemental STT Report 1 April 2018

PRELIMINARY ANALYSIS OF TENTATIVE 2018 OCEAN SALMON FISHERY MANAGEMENT MEASURES

April 10, 2018

A. SEASON DESCRIPTIONS North of Cape Falcon Supplemental Management Information 1. Overall non-Indian Commercial Iroll TAC: 25:000 Chinock and 5:00 marked cohe. 2. Non-Indian commercial Iroll TAC: 25:000 Chinock and 5:00 marked cohe. 3. Trade: May be considered at the April Council meeting. 4. Overall Chinook and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements: upon conclusion of negotiations in the North of Falcon forum, or upon neceipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries. Model #: Coho-1830, Chinook 32186 U.S./Canada Border to Cape Falcon • May 1 through the arailer of Juno 30 or 16:500 Chinock, no more than 5:200 of which may be caught in the area between the U.S./Canada border and the Queets River; and no more than 4:600 of which may be caught in the area between the adbetter PL: and Cape Falcon (C.B). Open seven days per week (C.1). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches tratal length (B). See compliance requirements (C.1) and gaer restrictions and definitions (C.2, C.3). Chinook kanding and possession limits per vases per landing week (Thurs Wed.) are in place: -Queets River to Laadbetter Point: 100 Chinook (C. 1, C.G). When it is projected that approximately 60% of the overall Chinook suddale neab the ducets River, or approximately 60% of the Chinook subarea guideline has been landed. in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook (C. 1, C.G). <	TABLE 1. 2018 Commercial troll management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 1 of 6)
Supplemental Management Information Overall non-Indian TAC: 55:00 Chinook and 5:00 China Narked 4:00 Chinook and 5:00 China Narked 2:00. I. Trade: May be considered at the April Council meeting. J. Trade: May be considered at the April Council meeting. I. Trade: May be considered at the April Council meeting. J. Trade: May be considered at the April Council meeting. J. Trade: May be considered at the April Council meeting. Model #: Cohn-1830, Chinook 3218 US/Canada Border to Cape Falcon V. May 1 through the asing of 16,000 Chinook, no more than 5,200 of which may be aught in the area between the U.S./Canada border and the Queets River, and no more than 4,600 of which may be aught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week (C-1). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B). See compliance requirements (C.1) and gaar restrictions and definitions (C.2, C.3). Chinook Indring and possession limits per vessel per landing week (Thurs Wed.) are in place: -U.S./Canada border to No Queets River. 20 Chinook; -Leadbetter Point Cape Falcon: 50 Chinook; -Leadbetter Point Cape Falcon: 50 Chinook (C.1, C.6). When its projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook and the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be aught in the area between the U.S./Canada border and the Queets River, and porapproximately 60% of the Chinook and the area between the U.S./C	A. SEASON DESCRIPTIONS
 1 Overall non-Indian TAC: 55,000 Chinook and 47,600 coho marked with a healed adipose fin clip (marked). 2. Non-Indian commercial turbl TAC: 27,500 Chinook and 5,600 marked coho. 3. Tade: May be considered at the Apri Council meeting. 4. Overall Chinook and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements, upon conclusion of negotations in the North of Falcon forum, or upon receipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries. Model #: Coho-1830. Chinook 3218 U.S./Canada Border to Cape Falcon May 1 through the earlier of June 30 or 16,500 Chinook, no more than 5,200 of which may be caught in the area between the U.S./Canada Border and the Queets River, and no more than 4,600 of which may be caught in the area between Leadbetter PL and Cape Falcon (C.8). Open seven days per week (C.1). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B). See compliance requirements (C.1) and gaar restrictions and definitions (C.2, C.3). Chinook landing and possession limits per vessel per landing week (Thurs Wed.) are in place: -U.S./Canada border to the Queets River, 50 Chinook; -U.S./Canada border to Laabetter Point to Cape Falcon (C.6). When it is projected that approximately 60% of the coverall Chinook guideline has been landed, or approximately 60% of the Chinook subarag guideline has been landed in the area between the U.S./Canada border to M. B. Seen ompliance requirements (U.1). 400 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border to M. B. Seen ompliance requirements (U.2). Canada border to apper Palcon (C.8). J. Hue area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border to the seen betail	
 Non-Indian commercial troll TAC: 27,500 Chinock and 5,600 marked coho. Strade: May be considered at the April Council meeting. Overall Chinock and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements, upon conclusion of negatiations in the Nnth of Falcon forum, or upon receipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries. Model #: Cohol 1830, Chinock 3218 U.S./Canada border to Cape Falcon May 1 through the earlier of June 30 or 16,500 Chinock, no more than 5,200 of which may be caught in the area between the U.S./Canada border and the Queets River, and no more than 4,600 of which may be caught in the area between the U.S./Canada border to the Queets River, and no more than 4,600 of which may be caught in the area between the U.S./Canada border to the Queets River, 50 Chinock, and Cape Falcon (C.S.) Open seven days per week (C.1). All salmon except coho may be retained (C.4, C.7). Chinock minimum size limit of 28 inches total length (B). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Chinock landing and possession limits per vessel per landing week (Thurs Wed.) are in place: -U.S./Canada border to the Queets River; 50 Chinock; -Leadbetter Point to Cape Falcon: -Leadbetter Point Cape Falcon: -Lonock subarea guideline has been landed in the area between the U.S./Canada border to Cape Falcon: -Lonock tage Falcon: -Lonock tage Falcon: -Lonock may be retained, except no chum retention north of Cape Alava, Washington in August and September 19 or 11,000 Chinock of 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 4,600 Chinook may be caught in the area between the U	
 May 1 through the earlier of June 30 or 16,500 Chinook, no more than 5,200 of which may be caught in the area between the U.S./Canada border and the Queets River, and no more than 4,600 of which may be caught in the area between Leadbetter PL and Cape Falcon (C.8). Open seven days per week (C.1). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Chinook landing and possession limits per vessel per landing week (Thurs Wed.) are in place: -U.S./Canada border to the Queets River: 50 Chinook; -Leadbetter Point to Cape Falcon: 50 Chinook (C.1, C.6). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline is not exceeded. U.S./Canada Border to Cape Falcon. July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River and the area between Leadbetter P1. and Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook knimimum size limit of 28 inches total length. Coho minimum size limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6).	 Non-Indian commercial troll TAC: 27,500 Chinook and 5,600 marked coho. Trade: May be considered at the April Council meeting. Overall Chinook and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements, upon conclusion of negotiations in the North of Falcon forum, or upon receipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries.
 U.S./Canada border and the Queets River, and no more than 4,600 of which may be caught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week (C.1). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Chinook landing and possession limits per vessel per landing week (Thurs Wed.) are in place: U.S./Canada border to the Queets River; 50 Chinook; -Queets River to Leadbetter Point: 100 Chinook; -Leadbetter Point to Cape Falcon; 50 Chinook (C.1, C.6). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter P1. and Cape Falcon, inseason action will be considered to ensure the guideline has been landed in the area between Leadbetter P1. and Cape Falcon (U.S./Canada Border to Equate Falcon (C.8). U.S./Canada Border to Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 16 inches total allength. Coho minimum size limit of 16 inches total allength (B, C.1). All coho must be marked with a healed adipose fin clip (C.8). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and poss	U.S./Canada Border to Cape Falcon
 total length (B). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Chinook landing and possession limits per vessel per landing week (Thurs Wed.) are in place: U.S./Canada border to the Queets River: 50 Chinook; -Leadbetter Point to Cape Falcon: 50 Chinook (C.1, C.6). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border to Cape Falcon. July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River and the area between teadbetter P1. and Cape Falcon, in a digat apposition (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 28 inchoes total length. Coho must be marked with a healed adipose fin clip (C.8.e). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River, Wed.) will be in place (C.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing	U.S./Canada border and the Queets River, and no more than 4,600 of which may be caught in the area between Leadbetter Pt.
 U.S./Cañada border to the Queeis River: 50 Chinook; -Queeis River to Laadbetter Point 100 Chinook; -Leadbetter Point to Cape Falcon: 50 Chinook (C.1, C.6). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. U.S./Canada Border to Cape Falcon July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no churn retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 26 inchos total length. Chono kinimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.8,e). See compliance requirements (C. 1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (C1t). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline has been landed	
When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. U.S./Canada Border to Cape Falcon - July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 28 inches total length. Coho minimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.6.e). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (S.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (S.1, C.6). Landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (S.1, C.6). Landing and possession limit of 50 chinook per vessel per landing week (Thurs Wed.) will be inplace (S.1, C.6). Landing and possession fase landed in the area between the U.S./Canada border and	-U.S./Canada border to the Queets River: 50 Chinook;
subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. U.S./Canada Dorder to Cape Falcon • July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 28 inches total length. Coho minimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.8.e). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 50 chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 10 coho per vessel per landing week (C.1). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the L.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the L.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the L.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the L.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed	-Leadbetter Point to Cape Falcon: 50 Chinook (C.1, C.6).
 July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area between Leadbetter Pt. and Cape Falcon (C.8). Open seven days per week. All salmon may be retained, except no chum retention north of Cape Alava, Washington in August and September (C.4, C.7). Chinook minimum size limit of 28 inches total length. Coho minimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.8.e). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 10 coho per vessel per landing week (C.1). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. For all commercial troll fisheries north of Cape Falcon: Mandatory closed areas include: Salmon troll Yelloweye Rockfish Conservation Area, Cape Flatery and Columbia Control Zones, and beginning August 13, Grays Harbor Control Zone (C.5). Vessels must land and deliver their salmon while fishing, <u>outh</u> of Leadbetter Point must land and deliver all species of fish within the area and north of Leadbetter Point. Vessels fishing, or in possession of salmon while fishing, <u>south</u> of Leadbetter Point must land and deliver all species of fish within the area and north of Leadbetter Point. Vessels fishing on in possession of salmon while fishing esouth of Lea	subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded.
and September (C. 4, C.7). Chinook minimum size limit of 28 inches total length. Coho minimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.8.e). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). In the area between the U.S./Canada border and the Queets River and the area between Leadbetter Pt. and Cape Falcon, a landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 10 coho per vessel per landing week (C.1). When it is projected that approximately 60% of the overall Chinook guideline has been landed, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 60% of the Chinook subarea guideline has been landed in the area between Leadbetter Pt. and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. For all commercial troll fisheries north of Cape Falcon: Mandatory closed areas include: Salmon troll Yelloweye Rockfish Conservation Area, Cape Flattery and Columbia Control Zones, and beginning August 13, Grays Harbor Control Zone (C.5). Vessels fishing, or in possession of salmon while fishing, <u>north</u> of Leadbetter Point must land and deliver all species of fish within the area and north of Leadbetter Point, except that Oregon permitted vessels may also land all species	• July 1 through the earlier of September 19 or 11,000 Chinook or 5,600 coho, no more than 4,600 Chinook may be caught in the area between the U.S./Canada border and the Queets River, and no more than 1,300 Chinook may be caught in the area
 landing and possession limit of 50 Chinook per vessel per landing week (Thurs Wed.) will be in place (C.1, C.6). Landing and possession limit of 10 coho per vessel per landing week (C.1). Vessels fishing, or in possession of salmon while fishing, <u>south</u> of Leadbetter Point must land and deliver all species of fish within the area and south of Leadbetter Point, except that Oregon permitted vessels may also land all species of fish in Garibaldi, Oregon. Under state law, vessels must report their catch on a state fish receiving ticket. Oregon State regulations require all fishers landing salmon into Oregon from any fishery between Leadbetter Point, Washington and Cape Falcon, Oregon must notify ODFW within one hour of delivery or prior to transport away from the port of landing by either calling 541-867-0300 ext. 271 or sending notification via e-mail to nfalcon.trollreport@state.or.us. Notification shall include vessel name and number, number of salmon by species, port of landing and location of delivery, and estimated time of delivery. Inseason actions may modify harvest guidelines in later fisheries to achieve or prevent exceeding the overall allowable troll harvest impacts (C.8). Vessels in possession of salmon <u>north</u> of the Queets River may not cross the Queets River line without first notifying WDFW at 360-249-1215 with area fished, total Chinook, coho and halibut catch aboard, and destination. Vessels in possession of salmon <u>south</u> of the Queets River may not cross the Queets River line without first notifying WDFW at	Conservation Area, Cape Flattery and Columbia Control Zones, and beginning August 13, Grays Harbor Control Zone (C.5).

TABLE 1. 2018 Commercial troll management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 2 of 6)
A. SEASON DESCRIPTIONS
South of Cape Falcon Supplemental Management Information
1. Sacramento River fall Chinook spawning escapement of 151,009 hatchery and natural area adults.
2. Sacramento Index exploitation rate of 34.2%.
3. Klamath River recreational fishery allocation: 3,490 adult Klamath River fall Chinook.
 Klamath tribal allocation: 18,122 adult Klamath River fall Chinook. CA/OR share of Klamath River fall Chinook commercial ocean harvest: 75% / 25%.
6. Fisheries may need to be adjusted to meet NMFS ESA consultation standards, FMP requirements, other management objectives, or upon receipt of new allocation recommendations from the California Fish and Game Commission.
Cape Falcon to Humbug Mt.
• May 4-14, and 19-31;
 June 4-12, and 16-30; July 5-12, and 16-31;
 August 3-7, 13-17, and 25-29;
• September 1-October 31 (C.9.a).
Open seven days per week. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B, C.1). All vessels fishing in the area must land their salmon in the State of Oregon. See gear restrictions and definitions (C.2, C.3) and Oregon State regulations for a description of special regulations at the mouth of Tillamook Bay.
Beginning September 1 no more than 50 Chinook allowed per vessel per landing week (ThursWed.); and only open shoreward of the 40 fathom management line beginning October 1.
In 2019, the season will open March 15 for all salmon except coho. Chinook minimum size limit of 28 inches total length. Gea restrictions same as in 2018. This opening could be modified following Council review at its March 2019 meeting.
Humbug Mt. to OR/CA Border (Oregon KMZ)
• May 4-14, and 19-31;
• June 4-12, and 16-30, or a 1,500 Chinook quota;
 July 5-12, and 16-31, or a 2,000 Chinook quota; August 3-7, 13-17, and 25-29, or a 500 Chinook quota; (C.9.a).
Open seven days per week. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 28 inches total length (B, C.1). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Prior to June 1, all salmon caught in this area must be landed and delivered in the State of Oregon.
June 4 - August 29 weekly landing and possession limit of 50 Chinook per vessel per landing week (ThursWed.). Any remaining portion of a monthly Chinook quota may be transferred inseason on an impact neutral basis to the next open quota period (C.8.b).
All vessels fishing in this area from June through August must land and deliver all salmon within this area or into Port Orford, within 24 hours of any closure of this fishery, and prior to fishing outside of this area. For all quota managed seasons, Oregon state regulations require fishers to notify ODFW within one hour of landing and prior to transport away from the port of landing by calling 541-867-0300 Ext. 252 or sending notification via e-mail to kmzor.trollreport@state.or.us, with vessel name and number, number of salmon by species, location of delivery, and estimated time of delivery.
In 2019, the season will open March 15 for all salmon except coho. Chinook minimum size limit of 28 inches total length. Gea restrictions same as in 2018. This opening could be modified following Council review at its March 2019 meeting.
OR/CA Border to Humboldt South Jetty (California KMZ)
May 1 through the earlier of May 29, or a 3,600 Chinook quota;
 June 1 through the earlier of June 30, or a 4,000 Chinook quota; July 1 through the earlier of July 31, or a 4,000 Chinook quota;
 August 3 through the earlier of August 31, or a 4,000 Chinook quota (C.9.b).
Open five days per week (FriTue.). All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 26 inches
total length (B, C.1). Landing and possession limit of 20 Chinook per vessel per day (C.8.f). Any remaining portion of a monthl
Chinook quota may be transferred inseason on an impact neutral basis to the next open quota period (C.8.g). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).
All fish caught in this area must be landed within the area and within 24 hours of any closure of the fishery and prior to fishing
outside the area (C.10). Klamath Control Zone closed (C.5.e). See California State regulations for additional closures adjacent to
the Smith and Klamath rivers.
Humboldt South Jetty to Horse Mt.
Closed. For all commercial troll fisheries south of Cape Falcon When the fishery is closed between the OR/CA border and Humbug
Mountain and open to the south, vessels with fish on board caught in the open area off California may seek temporary mooring in Brookings, Oregon prior to landing in California, only if such vessels first notify the Chetco River Coast Guard Station via VHI channel 22A between the hours of 0500 and 2200 and provide the vessel name, number of fish on board, and estimated time or arrival (C.6).

TABLE 1. 2018 Commercial troll management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 3 of 6)
A. SEASON DESCRIPTIONS
 Horse Mt. to Point Arena (Fort Bragg) July 26-31; August 3-29; September 1-30 (C.9.b). Open seven days per week. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 26 inches total length (B, C.1). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). All salmon must be landed in California.
All salmon caught in California prior to September 1 must be landed and offloaded no later than 11:59 p.m., August 30 (C.6). When the CA KMZ fishery is open, all fish caught in the area must be landed south of Horse Mountain until the CA KMZ fishery has been closed for at least 24 hours (C.6). During September, all fish must be landed north of Point Arena (C.6).
In 2019, the season will open April 16-30 for all salmon except coho, with a 27 inch Chinook minimum size limit and the same gear restrictions as in 2018. All salmon caught in the area must be landed in the area. This opening could be modified following Council review at its March 2019 meeting.
 Point Arena to Pigeon Point (San Francisco) July 26-31; August 3-29; September 1-30 (C.9.b). Open seven days per week. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 26 inches total length (B, C.1). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). All salmon must be landed in California.
All salmon caught in California prior to September 1 must be landed and offloaded no later than 11:59 p.m., August 30 (C.6). When the CA KMZ fishery is open, all fish caught in the area must be landed south of Horse Mountain until the CA KMZ fishery has been closed for at least 24 hours (C.6). During September, all fish must be landed south of Point Arena (C.6).
 Point Reyes to Point San Pedro (Fall Area Target Zone) October 1-5 and 8-12. Open five days per week, Monday through Friday. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 26 inches total length (B, C.1). All salmon caught in this area must be landed between Point Arena and Pigeon Point (C.6). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).
Pigeon Point to U.S./Mexico Border (Monterey)
 May 1-7; June 19-30 (C.9.b).
Open seven days per week. All salmon except coho may be retained (C.4, C.7). Chinook minimum size limit of 26 inches total length (B, C.1). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). All salmon must be landed in California.
All salmon caught in the area must be landed and offloaded no later than 11:59 p.m., July 15 (C.6).
When the CA KMZ fishery is open, all fish caught in the area must be landed south of Horse Mountain until the CA KMZ fishery has been closed for at least 24 hours (C.6).
For all commercial troll fisheries In California: California State regulations require all salmon be made available to a CDFW representative for sampling immediately at port of landing. Any person in possession of a salmon with a missing adipose fin, upon request by an authorized agent or employee of the CDFW, shall immediately relinquish the head of the salmon to the State (California Fish and Game Code §8226).

Pigeon Pt. to U.S./Mexico Border	26	19.5	-	-	26	

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS

C.1. Compliance with Minimum Size or Other Special Restrictions: All salmon on board a vessel must meet the minimum size, landing/possession limit, or other special requirements for the area being fished and the area in which they are landed if the area is open or has been closed less than 48 hours for that species of salmon. Salmon may be landed in an area that has been closed for a species of salmon more than 48 hours only if they meet the minimum size, landing/possession limit, or other special requirements for the area in which they were caught. Salmon may not be filleted prior to landing.

Any person who is required to report a salmon landing by applicable state law must include on the state landing receipt for that landing both the number and weight of salmon landed by species. States may require fish landing/receiving tickets be kept on board the vessel for 90 days or more after landing to account for all previous salmon landings.

C.2. Gear Restrictions:

- Salmon may be taken only by hook and line using single point, single shank, barbless hooks. a.
- Cape Falcon, Oregon, to the OR/CA border. No more than 4 spreads are allowed per line. b.
- OR/CA border to U.S./Mexico border: No more than 6 lines are allowed per vessel, and barbless circle hooks are required c. when fishing with bait by any means other than trolling.
- C.3. Gear Definitions:

Trolling defined: Fishing from a boat or floating device that is making way by means of a source of power, other than drifting by means of the prevailing water current or weather conditions.

Troll fishing gear defined. One or more lines that drag hooks behind a moving fishing vessel engaged in trolling. In that portion of the fishery management area off Oregon and Washington, the line or lines must be affixed to the vessel and must not be intentionally disengaged from the vessel at any time during the fishing operation.

Spread defined: A single leader connected to an individual lure and/or bait.

Circle hook defined: A hook with a generally circular shape and a point which turns inward, pointing directly to the shank at a 90° angle.

C.4. Vessel Operation in Closed Areas with Salmon on Board:

- Except as provided under C.4.b below, it is unlawful for a vessel to have troll or recreational gear in the water while in any a. area closed to fishing for a certain species of salmon, while possessing that species of salmon; however, fishing for species other than salmon is not prohibited if the area is open for such species, and no salmon are in possession.
- b. When Genetic Stock Identification (GSI) samples will be collected in an area closed to commercial salmon fishing, the scientific research permit holder shall notify NOAA OLE, USCG, CDFW, WDFW, ODFW and OSP at least 24 hours prior to sampling and provide the following information: the vessel name, date, location and time collection activities will be done. Any vessel collecting GSI samples in a closed area shall not possess any salmon other than those from which GSI samples are being collected. Salmon caught for collection of GSI samples must be immediately released in good condition after collection of samples.

C.5.Control Zone Definitions:

- Cape Flattery Control Zone The area from Cape Flattery (48°23'00" N. lat.) to the northern boundary of the U.S. EEZ; and a. the area from Cape Flattery south to Cape Alava (48°10'00" N. lat.) and east of 125°05'00" W. long.
- Mandatory Yelloweye Rockfish Conservation Area The area in Washington Marine Catch Area 3 from 48°00.00' N. lat.; 125°14.00' W. long. to 48°02.00' N. lat.; 125°14.00' W. long. to 48°02.00' N. lat.; b. 125°16.50' W. long. and connecting back to 48°00.00' N. lat.; 125°14.00' W. long.
- Grays Harbor Control Zone The area defined by a line drawn from the Westport Lighthouse (46° 53'18" N. lat., 124° 07'01" c. W. long.) to Buoy #2 (46° 52'42" N. lat., 124°12'42" W. long.) to Buoy #3 (46° 55'00" N. lat., 124°14'48" W. long.) to the Grays Harbor north jetty (46° 55'36" N. lat., 124°10'51" W. long.).
- Columbia Control Zone An area at the Columbia River mouth, bounded on the west by a line running northeast/southwest d. between the red lighted Buoy #4 (46°13'35" N. lat., 124°06'50" W. long.) and the green lighted Buoy #7 (46°15'09' N. lat., 124°06'16" W. long.); on the east, by the Buoy #10 line which bears north/south at 357° true from the south jetty at 46°14'00" N. lat.,124°03'07" W. long. to its intersection with the north jetty; on the north, by a line running

TABLE 1. 2018 Commercial troll management Alternatives for non-Indian ocean salmon fisheries - STT analyzed. (Page 5 of 6)

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS (continued)

C.5.Control Zone Definitions:

northeast/southwest between the green lighted Buoy #7 to the tip of the north jetty (46°15'48" N. lat., 124°05'20" W. long.), and then along the north jetty to the point of intersection with the Buoy #10 line; and, on the south, by a line running northeast/southwest between the red lighted Buoy #4 and tip of the south jetty (46°14'03" N. lat., 124°04'05" W. long.), and then along the south jetty to the point of intersection with the Buoy #10 line.

- e. Klamath Control Zone The ocean area at the Klamath River mouth bounded on the north by 41°38'48" N. lat. (approximately 6 nautical miles north of the Klamath River mouth); on the west by 124°23'00" W. long. (approximately 12 nautical miles off shore); and on the south by 41°26'48" N. lat. (approximately 6 nautical miles south of the Klamath River mouth).
- f. Waypoints for the 40 fathom regulatory line from Cape Falcon to Humbug Mt. (50 CFR 660.71 (k) (12)-(70). 45°46.00' N. lat., 124°04.49' W. long.; 44°41.68' N. lat., 124°15.38' W. long.; 43°17.96' N. lat., 124°28.81' W. long.; 45°44.34' N. lat. 124°05.00' W. long.; 44°34.87' N. lat. 124°15.80' W. long.; 43°16.75' N. lat. 124°28.42' W. long.;

44°42.26' N. lat., 124°13.81' W. long.;	43°20.83' N. lat., 124°26.63' W. long.;	

C.6. <u>Notification When Unsafe Conditions Prevent Compliance with Regulations</u>: If prevented by unsafe weather conditions or mechanical problems from meeting special management area landing restrictions, vessels must notify the U.S. Coast Guard and receive acknowledgment of such notification prior to leaving the area. This notification shall include the name of the vessel, port where delivery will be made, approximate number of salmon (by species) on board, the estimated time of arrival, and the specific reason the vessel is not able to meet special management area landing restrictions.

In addition to contacting the U.S. Coast Guard, vessels fishing south of the Oregon/California border must notify CDFW within one hour of leaving the management area by calling 800-889-8346 and providing the same information as reported to the U.S. Coast Guard. All salmon must be offloaded within 24 hours of reaching port.

C.7. Incidental Halibut Harvest: During authorized periods, the operator of a vessel that has been issued an incidental halibut harvest license may retain Pacific halibut caught incidentally in Area 2A while trolling for salmon. Halibut retained must be no less than 32 inches in total length, measured from the tip of the lower jaw with the mouth closed to the extreme end of the middle of the tail, and must be landed with the head on. When halibut are caught and landed incidental to commercial salmon fishing by an IPHC license holder, any person who is required to report the salmon landing by applicable state law must include on the state landing receipt for that landing both the number of halibut landed, and the total dressed, head-on weight of halibut landed, in pounds, as well as the number and species of salmon landed.

License applications for incidental harvest must be obtained from the International Pacific Halibut Commission (phone: 206-634-1838). Applicants must apply prior to mid-March 2018 for 2018 permits (*exact date to be set by the IPHC in early 2018*). Incidental harvest is authorized only during April, May, and June of the 2018 troll seasons, and after June 30 in 2018 if quota remains and if announced on the NMFS hotline (phone: 800-662-9825 or 206-526-6667). WDFW, ODFW, and CDFW will monitor landings. If the landings are projected to exceed the IPHC's 35,620 pound preseason allocation or the total Area 2A non-Indian commercial Pacific halibut allocation, NMFS will take inseason action to prohibit retention of halibut in the non-Indian salmon troll fishery.

Incidental Pacific halibut catch regulations in the commercial salmon troll fishery adopted for 2018, prior to any 2018 inseason action, will be in effect when incidental Pacific halibut retention opens on April 1, 2019 unless otherwise modified by inseason action at the March 2019 Council meeting

May 1, 2018 until the end of the 2018 salmon troll season, and April 1-30, 2019, license holders may land or possess no more than one Pacific halibut per two Chinook, except one Pacific halibut may be possessed or landed without meeting the ratio requirement, and no more than 25 halibut may be possessed or landed per trip.

TABLE 1. 2018Commercial troll management Alternatives for non-Indian ocean salmon fisheries - STT analyzed. (Page 6 of 6)

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS (continued)

a. "C-shaped" yelloweye rockfish conservation area is an area to be voluntarily avoided for salmon trolling. NMFS and the Council request salmon trollers voluntarily avoid this area in order to protect yelloweye rockfish. The area is defined in the Pacific Council Halibut Catch Sharing Plan in the North Coast subarea (Washington marine area 3), with the following coordinates in the order listed:

48°18' N. lat.; 125°18' W. long.; 48°18' N. lat.; 124°59' W. long.; 48°11' N. lat.; 124°59' W. long.; 48°11' N. lat.; 125°11' W. long.; 48°04' N. lat.; 125°11' W. long.; 48°04' N. lat.; 124°59' W. long.; 48°00' N. lat.; 124°59' W. long.; 48°00' N. lat.; 125°18' W. long.; and connecting back to 48°18' N. lat.; 125°18' W. long.

- C.8. <u>Inseason Management</u>: In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance is provided to NMFS:
 - a. Chinook remaining from the May through June non-Indian commercial troll harvest guideline north of Cape Falcon may be transferred to the July through September harvest guideline if the transfer would not result in exceeding preseason impact expectations on any stocks.
 - b. Chinook remaining from the June or July non-Indian commercial troll quotas in the Oregon KMZ may be transferred to the Chinook quota for the next open quota period if the transfer would not result in exceeding preseason impact expectations on any stocks.
 - c. NMFS may transfer salmon between the recreational and commercial fisheries north of Cape Falcon if there is agreement among the areas' representatives on the Salmon Advisory Subpanel (SAS), and if the transfer would not result in exceeding preseason impact expectations on any stocks.
 - d. At the March 2019 meeting, the Council will consider inseason recommendations for special regulations for any experimental fisheries (proposals must meet Council protocol and be received in November 2018).
 - e. If retention of unmarked coho (adipose fin intact) is permitted by inseason action, the allowable coho quota will be adjusted to ensure preseason projected impacts on all stocks is not exceeded.
 - f. Landing limits may be modified inseason to sustain season length and keep harvest within overall quotas.
 - g. Chinook remaining from the remaining May, June, and /or July non-Indian commercial troll quotas in the California KMZ may be transferred to the Chinook quota for the next open period if the transfer would not result in exceeding preseason impact expectations on any stocks.

C.9. State Waters Fisheries: Consistent with Council management objectives:

- a. The State of Oregon may establish additional late-season fisheries in state waters.
- b. The State of California may establish limited fisheries in selected state waters.
- Check state regulations for details.
- C.10. For the purposes of California Fish and Game Code, Section 8232.5, the definition of the Klamath Management Zone (KMZ) for the ocean salmon season shall be that area from Humbug Mountain, Oregon, to Horse Mountain, California.

TABLE 2. 2018 Recreational management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 1 of 5)

A. SEASON DESCRIPTIONS

North of Cape Falcon

Supplemental Management Information

1. Overall non-Indian TAC: 55,000 Chinook and 47,600 coho marked with a healed adipose fin clip (marked).

- 2. Recreational TAC: 27,500 Chinook and 42,000 marked coho; all retained coho must be marked.
- 3. A trade with commercial troll may be considered in April.
- 4. No Area 4B add-on fishery.

5. Buoy 10 fishery opens August 1 with an expected landed catch of 25,000 marked coho in August and September.

6. Overall Chinook and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements, upon conclusion of negotiations in the North of Falcon forum, or upon receipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries.

U.S./Canada Border to Cape Alava (Neah Bay Subarea)

• June 23 through earlier of September 3 or 4,370 marked coho subarea quota with a subarea guideline of 4,900 Chinook (C.5).

Open seven days per week. All salmon may be retained, except no chum beginning August 1; two salmon per day, no more than one of which may be a Chinook. All coho must be marked with a healed adipose fin clip (C.1).

Beginning August 1, Chinook non-retention east of the Bonilla-Tatoosh line (C.4.a) during Council managed ocean fishery. See gear restrictions and definitions (C.2, C.3).

Cape Alava to Queets River (La Push Subarea)

• June 23 through earlier of September 3 or 1,090 marked coho subarea quota with a subarea guideline of 1,500 Chinook (C.5)

Open seven days per week. All salmon may be retained, two salmon per day. All coho must be marked with a healed adipose fin clip (C.1). See gear restrictions and definitions (C.2, C.3).

Queets River to Leadbetter Point (Westport Subarea)

• July 1 through earlier of September 3 or 15,540 marked coho subarea quota with a subarea guideline of 13,100 Chinook (C.5).

Open five days per week (Sun. - Thurs.). All salmon may be retained; two salmon per day, no more than one of which may be a Chinook. All coho must be marked with a healed adipose fin clip (C.1). See gear restrictions and definitions (C.2, C.3).

Grays Harbor Control Zone closed beginning August 13 (C.4.b).

Leadbetter Point to Cape Falcon (Columbia River Subarea)

• June 23 through earlier of September 3 or 21,000 marked coho subarea quota with a subarea guideline of 8,000 Chinook (C.5).

Open seven days per week. All salmon may be retained; two salmon per day, no more than one of which may be a Chinook. All coho must be marked with a healed adipose fin clip (C.1). See gear restrictions and definitions (C.2, C.3).

Columbia Control Zone closed (C.4.c).

For all recreational fisheries North of Cape Falcon: Inseason management may be used to sustain season length and keep harvest within the overall Chinook and coho recreational TACs for north of Cape Falcon (C.5).

TABLE 2. 2018 Recreational management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 2 of 5)
A. SEASON DESCRIPTIONS
South of Cape Falcon
Supplemental Management Information
1. Sacramento River fall Chinook spawning escapement of 151,009 hatchery and natural area adults.
2. Sacramento Index exploitation rate of 34.2%.
3. Klamath River recreational fishery allocation: 3,490 adult Klamath River fall Chinook.
 Klamath tribal allocation: 18,122 adult Klamath River fall Chinook. Overall recreational coho TAC: 35,000 coho marked with a healed adipose fin clip (marked), and 3,500 coho in the non-mark-
selective coho fishery.
6. Fisheries may need to be adjusted to meet NMFS ESA consultation standards, FMP requirements, other management
objectives, or upon receipt of new allocation recommendations from the CFGC.
Cape Falcon to Humbug Mt.
• March 15-October 31 (C.6), except as provided below during the mark-selective coho fishery and the non-mark-selective coho
fishery (C.5).
Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of
24 inches total length (B). See gear restrictions and definitions (C.2, C.3).
October 1-31: The fishery is only open shoreward of the 40 fathom management line.
In 2019, the season will open March 15 for all salmon except coho, two salmon per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2018 (C.2, C.3).
Cape Falcon to Humbug Mt.
Mark-selective coho fishery:
 June 30 through the earlier of September 3, or a landed catch of 35,000 marked coho (C.6).
Open seven days per week. All salmon, two salmon per day. All retained coho must be marked with a healed adipose fin clip (C.1).
See minimum size limits (B). See gear restrictions and definitions (C.2, C.3, C.5.e).
Non-mark-selective coho fishery:
 September 7-8, and each Friday through Saturday thereafter through the earlier of September 29 or a landed catch of a 3,500
non-mark-selective coho quota (C.6). Open days may be modified inseason.
All salmon, two salmon per day (C.1). See minimum size limits (B). See gear restrictions and definitions (C.2, C.3).
Humbug Mt. to OR/CA Border (Oregon KMZ)
• May 19-August 26 (C.6).
Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of
24 inches total length (B). See gear restrictions and definitions (C.2, C.3).

For Recreational Fisheries from Cape Falcon to Humbug Mt.: Fishing in the Stonewall Bank yelloweye rockfish conservation area restricted to trolling only on days the all depth recreational halibut fishery is open (call the halibut fishing hotline 1-800-662-9825 for specific dates) (C.3.b, C.4.d).

TABLE 2. 2018 Recreational management measures for non-Indian ocean salmon fisheries - STT analyzed. (Page 3 of 5)

A. SEASON DESCRIPTIONS

OR/CA Border to Horse Mt. (California KMZ)

• June 1-September 3 (C.6).

Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of 20 inches total length (B). See gear restrictions and definitions (C.2, C.3).

Klamath Control Zone closed in August (C.4.e). See California State regulations for additional closures adjacent to the Smith, Eel, and Klamath Rivers.

Horse Mt. to Point Arena (Fort Bragg)

• June 17-October 31 (C.6).

Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of 20 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2019, season opens April 6 for all salmon except coho, two salmon per day (C.1). Chinook minimum size limit of 20 inches total length (B); and the same gear restrictions as in 2018 (C.2, C.3).

Point Arena to Pigeon Point (San Francisco)

• June 17-October 31 (C.6).

Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of 20 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2019, season opens April 6 for all salmon except coho, two salmon per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2018 (C.2, C.3).

Pigeon Point to U.S./Mexico Border (Monterey)

• April 7-July 2 (C.6).

Open seven days per week. All salmon except coho may be retained, two salmon per day (C.1). Chinook minimum size limit of 24 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2019, season opens April 6 for all salmon except coho, two salmon per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2018 (C.2, C.3).

California State regulations require all salmon be made available to a CDFW representative for sampling immediately at port of landing. Any person in possession of a salmon with a missing adipose fin, upon request by an authorized agent or employee of the CDFW, shall immediately relinquish the head of the salmon to the state. (California Code of Regulations Title 14 Section 1.73)

B. MINIMUM SIZE (Inches) (See C.1)

Area (when open)	Chinook	Coho	Pink	
North of Cape Falcon	24	16	None	
Cape Falcon to Humbug Mt.	24	16	None	
Humbug Mt. to OR/CA Border	24	16	None	
OR/CA Border to Horse Mt.	20	-	20	
Horse Mt. to Pt. Arena	20	-	20	
Pt. Arena to Pigeon Pt.	20	-	20	
Pigeon Pt. to U.S./Mexico Border	24	-	24	

TABLE 2. 2018 Recreational management Alternatives for non-Indian ocean salmon fisheries - STT analyzed. (Page 4 of 5)

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS

C.1. <u>Compliance with Minimum Size and Other Special Restrictions</u>: All salmon on board a vessel must meet the minimum size or other special requirements for the area being fished and the area in which they are landed if that area is open. Salmon may be landed in an area that is closed only if they meet the minimum size or other special requirements for the area in which they were caught. Salmon may not be filleted prior to landing.

Ocean Boat Limits: Off the coast of Washington, Oregon, and California, each fisher aboard a vessel may continue to use angling gear until the combined daily limits of Chinook and coho salmon for all licensed and juvenile anglers aboard have been attained (additional state restrictions may apply).

- C.2. <u>Gear Restrictions</u>: Salmon may be taken only by hook and line using barbless hooks. All persons fishing for salmon, and all persons fishing from a boat with salmon on board, must meet the gear restrictions listed below for specific areas or seasons.
 - a. U.S./Canada Border to Pt. Conception, California: No more than one rod may be used per angler; and no more than two single point, single shank barbless hooks are required for all fishing gear.
 - b. Horse Mt., California, to Pt. Conception, California: Single point, single shank, barbless circle hooks (see gear definitions below) are required when fishing with bait by any means other than trolling, and no more than two such hooks shall be used. When angling with two hooks, the distance between the hooks must not exceed five inches when measured from the top of the eye of the top hook to the inner base of the curve of the lower hook, and both hooks must be permanently tied in place (hard tied). Circle hooks are not required when artificial lures are used without bait.

C.3. Gear Definitions:

- a. Recreational fishing gear defined: Off Oregon and Washington, angling tackle consists of a single line that must be attached to a rod and reel held by hand or closely attended; the rod and reel must be held by hand while playing a hooked fish. No person may use more than one rod and line while fishing off Oregon or Washington. Off California, the line must be attached to a rod and reel held by hand or closely attended; weights directly attached to a line may not exceed four pounds (1.8 kg). While fishing off California north of Pt. Conception, no person fishing for salmon, and no person fishing from a boat with salmon on board, may use more than one rod and line. Fishing includes any activity which can reasonably be expected to result in the catching, taking, or harvesting of fish.
- b. Trolling defined: Angling from a boat or floating device that is making way by means of a source of power, other than drifting by means of the prevailing water current or weather conditions.
- c. *Circle hook defined*: A hook with a generally circular shape and a point which turns inward, pointing directly to the shank at a 90° angle.

C.4. Control Zone Definitions:

- a. The Bonilla-Tatoosh Line: A line running from the western end of Cape Flattery to Tatoosh Island Lighthouse (48°23'30" N. lat., 124°44'12" W. long.) to the buoy adjacent to Duntze Rock (48°24'37" N. lat., 124°44'37" W. long.), then in a straight line to Bonilla Pt. (48°35'39" N. lat., 124°42'58" W. long.) on Vancouver Island, British Columbia.
- b. Grays Harbor Control Zone The area defined by a line drawn from the Westport Lighthouse (46° 53'18" N. lat., 124° 07'01" W. long.) to Buoy #2 (46° 52'42" N. lat., 124°12'42" W. long.) to Buoy #3 (46° 55'00" N. lat., 124°14'48" W. long.) to the Grays Harbor north jetty (46° 55'36" N. lat., 124°10'51" W. long.).
- c. Columbia Control Zone: An area at the Columbia River mouth, bounded on the west by a line running northeast/southwest between the red lighted Buoy #4 (46°13'35" N. lat., 124°06'50" W. long.) and the green lighted Buoy #7 (46°15'09' N. lat., 124°06'16" W. long.); on the east, by the Buoy #10 line which bears north/south at 357° true from the south jetty at 46°14'00" N. lat., 124°03'07" W. long. to its intersection with the north jetty; on the north, by a line running northeast/southwest between the green lighted Buoy #7 to the tip of the north jetty (46°15'48" N. lat., 124°05'20" W. long. and then along the north jetty to the point of intersection with the Buoy #10 line; and on the south, by a line running northeast/southwest between the red lighted Buoy #4 and tip of the south jetty (46°14'03" N. lat., 124°04'05" W. long.), and then along the south jetty to the point of intersection with the Buoy #10 line.
- d. Stonewall Bank Yelloweye Rockfish Conservation Area: The area defined by the following coordinates in the order listed: 44°37 46' N. lat: 124°24 92' W. long

44 37.40 N. Ial., 124 24.92 W. IUNY.
44°37.46' N. lat.; 124°23.63' W. long.
44°28.71' N. lat.; 124°21.80' W. long.
44°28.71' N. lat.; 124°24.10' W. long.
44°31.42' N. lat.; 124°25.47' W. long.
and connecting back to 44°37 46' N

- and connecting back to 44°37.46' N. lat.; 124°24.92' W. long.
- e. *Klamath Control Zone*: The ocean area at the Klamath River mouth bounded on the north by 41°38'48" N. lat. (approximately 6 nautical miles north of the Klamath River mouth); on the west by 124°23'00" W. long. (approximately 12 nautical miles off shore); and, on the south by 41°26'48" N. lat. (approximately 6 nautical miles south of the Klamath River mouth).

TABLE 2. 2018 Recreational management Alternatives for non-Indian ocean salmon fisheries - STT analyzed. (Page 5 of 5)

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS (continued)

- C.5. <u>Inseason Management</u>: Regulatory modifications may become necessary inseason to meet preseason management objectives such as quotas, harvest guidelines, and season duration. In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance is provided to NMFS:
 - a. Actions could include modifications to bag limits, or days open to fishing, and extensions or reductions in areas open to fishing.
 - b. Coho may be transferred inseason among recreational subareas north of Cape Falcon to help meet the recreational season duration objectives (for each subarea) after conferring with representatives of the affected ports and the Council's SAS recreational representatives north of Cape Falcon, and if the transfer would not result in exceeding preseason impact expectations on any stocks.
 - c. Chinook and coho may be transferred between the recreational and commercial fisheries north of Cape Falcon if there is agreement among the representatives of the SAS, and if the transfer would not result in exceeding preseason impact expectations on any stocks.
 - d. Fishery managers may consider inseason action modifying regulations restricting retention of unmarked (adipose fin intact) coho. To remain consistent with preseason expectations, any inseason action shall consider, if significant, the difference between observed and preseason forecasted (adipose-clipped) mark rates. Such a consideration may also include a change in bag limit of two salmon, no more than one of which may be a coho.
 - e. Marked coho remaining from the Cape Falcon to Humbug Mt. recreational mark-selective coho quota may be transferred inseason to the Cape Falcon to Humbug Mt. non-mark-selective recreational fishery if the transfer would not result in exceeding preseason impact expectations on any stocks.
- C.6. <u>Additional Seasons in State Territorial Waters</u>: Consistent with Council management objectives, the States of Washington, Oregon, and California may establish limited seasons in state waters. Check state regulations for details.

 TABLE 3. 2018 Treaty Indian ocean troll management measures for ocean salmon fisheries - STT Analysis.
 (Page 1 of 2)

 A. SEASON DESCRIPTIONS

Supplemental Management Information

1. Overall Treaty-Indian TAC: 40,000 Chinook and 12,500 coho.

Overall Treat/Findal TrAC: 40,000 Chillock and 12,000 cond.
 Overall Chinook and/or coho TACs may need to be reduced or fisheries adjusted to meet NMFS ESA guidance, FMP requirements, upon conclusion of negotiations in the North of Falcon forum, or upon receipt of preseason catch and abundance expectations for Canadian and Alaskan fisheries.

• May 1 through the earlier of June 30 or 16,000 Chinook quota.

All salmon may be retained except coho. If the Chinook quota is exceeded, the excess will be deducted from the later all-salmon season (C.5). See size limit (B) and other restrictions (C).

• July 1 through the earlier of September 15, or 24,000 Chinook quota, or 12,500 coho quota.

All Salmon. See size limit (B) and other restrictions (C).

B. MINIMUM SIZE (Inches)

	Chir	nook	Coł	าด	
Area (when open)	Total Length	Head-off	Total Length	Head-off	Pink
North of Cape Falcon	24.0 (61.0 cm)	18.0 (45.7 cm)	16.0 (40.6 cm)	12.0 (30.5 cm)	None

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS

C.1. <u>Tribe and Area Boundaries</u>. All boundaries may be changed to include such other areas as may hereafter be authorized by a Federal court for that tribe's treaty fishery.

<u>S'KLALLAM</u> - Washington State Statistical Area 4B (defined to include those waters of Puget Sound easterly of a line projected from the Bonilla Point light on Vancouver Island to the Tatoosh Island light, thence to the most westerly point on Cape Flattery and westerly of a line projected true north from the fishing boundary marker at the mouth of the Sekiu River [WAC 220-301-030]).

MAKAH - Washington State Statistical Area 4B and that portion of the FMA north of 48°02'15" N. lat. (Norwegian Memorial) and east of 125°44'00" W. long.

*QUILEUTE - A polygon commencing at Cape Alava, located at latitude 48°10'00" north, longitude 124°43'56.9" west; then proceeding west approximately forty nautical miles at that latitude to a northwestern point located at latitude 48°10'00" north, longitude 125°44'00" west; then proceeding in a southeasterly direction mirroring the coastline at a distance no farther than forty nautical miles from the mainland Pacific coast shoreline at any line of latitude, to a southwestern point at latitude 47°31'42" north, longitude 125°20'26" west; then proceeding east along that line of latitude to the Pacific coast shoreline at latitude 47°31'42" north, longitude 124°21'9.0" west.

HOH - That portion of the FMA between 47°54'18" N. lat. (Quillayute River) and 47°21'00" N. lat. (Quinault River) and east of 125°44'00" W. long.

*QUINAULT - A polygon commencing at the Pacific coast shoreline near Destruction Island, located at latitude 47°40'06" north, longitude 124°23'51.362" west; then proceeding west approximately thirty nautical miles at that latitude to a northwestern point located at latitude 47°40'06" north, longitude 125°08'30" west; then proceeding in a southeasterly direction mirroring the coastline no farther than thirty nautical miles from the mainland Pacific coast shoreline at any line of latitude, to a southwestern point at latitude 46°53'18" north, longitude 124°53'53" west; then proceeding east along that line of latitude to the pacific coast shoreline at latitude 46°53'18" north, longitude 124°7'36.6" west.

* On March 5, 2018, the Federal District Court for the Western District of Washington issued an order to revise the western U&A boundaries for the Quileute and Quinault Tribes. Most notably, the western boundaries are at set distances from the coast, rather than following a line of longitude.

C.2. Gear restrictions

- a. Single point, single shank, barbless hooks are required in all fisheries.
- b. No more than eight fixed lines per boat.
- c. No more than four hand held lines per person in the Makah area fishery (Washington State Statistical Area 4B and that portion of the FMA north of 48°02'15" N. lat. (Norwegian Memorial) and east of 125°44'00" W. long.)

TABLE 3. 2018 Treaty Indian ocean troll management measures for ocean salmon fisheries - STT Analysis. (Page 2 of 2)

C. REQUIREMENTS, DEFINITIONS, RESTRICTIONS, OR EXCEPTIONS (continued)

C.3. Quotas

- a. The quotas include troll catches by the S'Klallam and Makah Tribes in Washington State Statistical Area 4B from May 1 through September 15.
- b. The Quileute Tribe will continue a ceremonial and subsistence fishery during the time frame of October 1 through October 15 in the same manner as in 2004-2015. Fish taken during this fishery are to be counted against treaty troll quotas established for the 2018 season (estimated harvest during the October ceremonial and subsistence fishery: 20 Chinook; 40 coho).

C.4. Area Closures

- a. The area within a six nautical mile radius of the mouths of the Queets River (47°31'42" N. lat.) and the Hoh River (47°45'12" N. lat.) will be closed to commercial fishing.
- b. A closure within two nautical miles of the mouth of the Quinault River (47°21'00" N. lat.) may be enacted by the Quinault Nation and/or the State of Washington and will not adversely affect the Secretary of Commerce's management regime.
- C.5. <u>Inseason Management</u>: In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance is provided to NMFS:
 - a. Chinook remaining from the May through June treaty-Indian ocean troll harvest guideline north of Cape Falcon may be transferred to the July through September harvest guideline on a fishery impact equivalent basis.

		2018	
Key Stock/Criteria	Projected	Criteria	Spaw ner Objective or Other Comparative Standard as Noted ^{b/}
CHINOOK	CHINOOK		CHINOOK

--

0040

a/ Model results for Chinook include updates to northern stock abundances and total allow able catch in 2018 AABM fisheries. Model results for coho include final 2018 Canadian abundances and updated proxy 2018 Canadian fisheries.

b/ Ocean escapement is the number of salmon escaping ocean fisheries and entering freshw ater with the following clarifications. Ocean escapement for Puget Sound stocks is the estimated number of salmon entering Area 4B that are available to U.S. net fisheries in Puget Sound and spaw ner escapement after impacts from the Canadian, U.S. ocean, and Puget Sound troll and recreational fisheries have been deducted. Numbers in parentheses represent Council area exploitation rates for Puget sound coho stocks. For Columbia River early and late coho stocks, ocean escapement represents the number of coho after the Buoy 10 fishery. Exploitation rates for LCN coho include marine impacts only. Exploitation rates for OCN coho represent marine and freshw ater impacts. Values reported for Klamath River fall Chinook are natural area adult spaw ners. Values reported for Sacramento River fall Chinook are hatchery and natural area adult spaw ners.

c/ Includes minor contributions from East Fork Lew is River and Sandy River.

d/ Annual management objectives may be different than FMP goals, and are subject to agreement between WDFW and the treaty tribes under U.S. District Court orders. It is anticipated that fishery management will be adjusted by state and tribal comanagers during the preseason planning process to comply with stock management objectives.

e/ Includes projected impacts of inriver fisheries that have not yet been shaped.
