Please support my generation!

Heirs To Our Oceans respectfully request:

- 1) Please make decisions to protect overall inshore habitat.
- 2) Please protect the Southern California Bight from Bottom trawlers.
- 3) Please protect Methane seeps as they are incredibly important considering climate change challenges.
- 4) Please prevent bottom contact of demersal fishing gears below 3500 meters.

Thank you for all you have done
to protect our coast!
