

GROUND FISH ADVISORY SUBPANEL REPORT ON
RESEARCH AND DATA NEEDS DOCUMENT – PRELIMINARY DRAFT

The Groundfish Advisory Subpanel (GAP) received an overview on the agenda item from Mr. John DeVore of the Council staff. The GAP would like to see a future version of the research and data needs document that more easily distills the items to make it more digestible for prioritization, similar to the omnibus list. Without that, it is difficult for the GAP to provide a concise list of priorities.
