

GROUND FISH ADVISORY SUBPANEL REPORT ON
FEDERAL FISHERY PERMIT CITIZENSHIP REQUIREMENTS – SCOPING

The Groundfish Advisory Subpanel (GAP) received a presentation about this agenda item from Dr. Kit Dahl. The GAP appreciates the Council's broader review of citizenship requirements across current fishery management plans (FMP) and regulations. The GAP is satisfied with status quo for the groundfish FMP. Therefore, if the Council moves forward with future consideration of this agenda item, the GAP recommends a narrow focus for the highly migratory species permit eligibility criteria.
