\*List information for additional EFP applicants/vessels/participants on a separate page.

4) Do any of the applicants/vessel operators have current/pending state or federal violations in any commercial fishery?  Yes  No (If yes, follow-up on the nature and status of any violations may be required as part of the application review process.)

5) **Duration:** The EFP will normally be issued for a two-year period from the date of issuance. If you have good reason for receiving an EFP for a longer period, specify the requested number of years and provide justification for the longer duration:

HOPEFULLY TWO YEARS SHOULD PROVIDE THE DATA NEEDED TO START A PROGRAM FOR THIS FISHERY

6) **Intended DSBG Configuration** (see Attachment A):  Standard  Linked

Describe proposed gear modifications (if any) that differ from the descriptions in Attachment A:

I INTEND TO UTILIZE BOTH THE DSBG AND WOULD LIKE TO TRY LINKING THE GEAR TOGETHER IF ALLOWED DEPENDING ON THE CONDITIONS WHAT EVER WOULD BENEFIT WITH I THINK IF ALLOWED WOULD HAVE MANY BENEFITS

7) Do you intend to target any species other than swordfish?  Yes  No

(This does not include other species that may be caught incidentally when targeting swordfish.)

If you do plan to use the gear to catch other species, list the species and how the fishing method you plan to use would differ (depth, time of day, season, etc.):

BUT HOPEFULLY WE CAN KEEP AND  
SELL THE BY CATCH

8) Fishing Area and Effort:

Area	Number of vessels / Vessel names	Estimated fishing effort in number of days or sets
Southern California Bight (Pt. Conception to the U.S.-Mex. Border)	1	100-120 DAY SETS
Central California (Point Reyes to Point Conception)		
Northern California (42° N. latitude to Point Reyes)		
Oregon (Columbia River to 42° N. latitude)		

Please note that the Council is prioritizing applications to fish outside Southern California Bight.

Additional information you think would be helpful in reviewing the application concerning where you plan to fish and the amount of fishing:

I CAN FISH FROM 3 TO 200 MILES OFF SHORE  
AND WOULD ALL DEPEND WHERE THE FISH  
ARE WATER TEMPS CURRENTS AND OTHER CONDITIONS  
ALL IS IN CONJUNCTION WITH WEATHER PERMITTING

9) **Data Gaps:** Will your EFP fishing specifically address any of the following data gaps? (See Attachment B for descriptions)

- Active gear tending
- Gear conflicts/number of vessels
- Gear configuration
- Concurrent gear use

Explain what methods you would use, or information you plan to gather, to address the data gaps you checked off above:

I WOULD THINK THAT USING AN AUSTRIAN POWDER RANGE APP 12 MIL ON EACH DBSG WOULD LET YOU TRACK YOUR GEAR WITH MINIMUM GEAR LOSS WITH LESS CONFLICT OF GEAR INTERACTION JUST A SUGGESTION I HAVE USED SATELLITE BOOYS TO TRACK MY GEAR IN THE PAST. I WILL USE WHAT EVER GEAR IS REQUIRED

10) **Reporting Requirements and Observer Coverage:**

- You must maintain a logbook for reporting catch and other operational information (such as time and location of catch) in a format specified by National Marine Fisheries Service
- Up to 100% observer coverage may be required on your EFP fishing trips
- Data gathered as part of the EFP will be publicly available

I acknowledge the above conditions, and verify that I am willing and able to cover the cost of any level of observer coverage required under permit terms and conditions.

If you are unable to cover the entire cost of the observer coverage requirement, please explain what portion you may be able to cover and identify other sources of funding which may be available to help you cover observer costs.

IT WOULD BE HELPFUL IF THERE WAS A SOURCE TO HELP COVER THE OBSERVER COST STARTING OFF BEING THAT THIS A NEW TYPE OF FISHING METHOD WITH A LEARNING CURVE. NO PROBLEM WITH OBSERVER
