

COASTAL PELAGIC SPECIES MANAGEMENT TEAM REPORT ON THE FISHERY
ECOSYSTEM PLAN FIVE YEAR REVIEW – SCOPING

The Coastal Pelagic Species Management Team (CPSMT) reviewed the Ecosystem Workgroup (EWG) report on the Fishery Ecosystem Plan (FEP) five year review scoping. The CPSMT supports the effort to update the FEP, but recognizes the need for additional time to make appropriate recommendations to revise the plan. The CPSMT suggests the Council schedule actions on updating the FEP at a future Council meeting (i.e. March 2019) which will allow more involvement from the management teams.
