

SALMON ADVISORY SUBPANEL REPORT ON  
COUNCIL OPERATING PROCEDURE 22

The Salmon Advisory Subpanel (SAS) was briefed at the August 14 webinar by Council Staff Officer Kerry Griffin on Council Operating Procedure (COP) 22 – Essential Fish Habitat (EFH) Review Process. The SAS supports updating COP 22 to include all Council fishery management plans (FMPs) so that there is a clear and consistent process across all FMPs that will guide any necessary review or changes to EFH provisions.
